Interpreting The War

Led forces are but 40 miles or so apart. In the conventional military way, all that remains is for the Germans to complete the encirclement by hammering their way around to the east, isolating the city completely and bringing it under massed artillery fire and bomb attack from every direction.

NO GAS? THEN

trucks and cars can be powered with producer gas and be kept in operation without gasoline, an official said. An official described a road test with one producer-gas appliance weighing about 250 pounds and installed in a light truck. Charcoal was first placed in the container and burning paper placed on top. Then it was closed and an airblower used to drive the gas through the charcoal bed into a pipe leading to the manifold of the motor.

CHICAGO, Sept. 4.—(AP)—Professional golfer's story-telling "gamboier"—fast shooting, fast talking Leonard Dodson of Kansas City—did a record-smashing job as he stole the show today in the opening act of the year's richest championship—the \$1,000 Tam O'Shanter Open.

Dodson, the 29-year-old Missourian whose locker-room yarns and trick shot wagers are legendary in the sport world until scores of better-known stars had been positioned. Then he came in with a blazing 65 that gave him the first-round lead by two strokes and the competitive record for the Tam O'Shanter by one stroke.

To even series

SPRINGHILL, N.S., Sept. 4.—(CP)—New Waterford Strands behind the four-hit pitching of O'Dell evened their semi-final Nova Scotia senior baseball playoff with Springhill at two victories each, by defeating the Fencebusters 6-1 here today.

Interpreting The War

(Continued from page 1)

The urgent defence task is to halt the German rather than the Finn advance. Although the Nazis comrades in arms are reported but 20 miles away in the Karelian isthmus to the north, they have indicated a lack of enthusiasm for an assault on the city itself, taking the position that Leningrad is Hitler's prize, theirs but the recovery of lost territory.
