MONTREAL, July 12.—The latest returns from the Manitoba elections give the Roblin Government 27 seats and the Opposition 14, Government 13 majority.  
The Conservatives gained six seats and the Liberals five, each from the opposed party, the other seats remaining unchanged.

ATLANTIC CITY, July 11.—Glenn Curtiss set an American record for a fifty mile flight in an aeroplane today by covering fifty miles in five minutes and one second, fourteen minutes and fifty-nine seconds.  
In the early evening Curtiss set a new mark for quick climbing by sweeping his machine 1,000 feet in the air in five minutes and fifty-nine seconds.  
Brookings started up immediately after Curtiss landed, and described sharp curves and turns, ending with his first exhibition of a triple turn that almost stood his machine on end. Brookings and Coffyn then went the plane. Later in the day, Coffyn went up alone, giving another thrilling exhibition of turning and swooping. During his lone flight, Brookings made a 1,000 foot swoop along the beach just over the heads of the crowd, ending by driving his machine over the breakers, hardly a foot from the surface.

Special to The Guardian.  
ST. JOHN, July 12.—Later reports of the conflagration which yesterday visited the prosperous town of Campbellton, only add to the horror of the first despatches.  
The town is isolated and all communication is crippled, but the few details of the disaster which have trickled over the wires are sufficient to tell the story of a holocaust as one of the most disastrous in the history of the Dominion.  
With the first shock of the disaster over and the full horror becoming generally realized, measures for the immediate relief of the homeless are being undertaken throughout the Province.  
The Mayor of Campbellton has been authorized to draw upon the Government for \$2,000 for the immediate relief of the distressed and a wire was despatched to the Minister of Militia by Premier Hazen advising him of the conflagration and calling upon him to forward militia tents and supplies for the temporary housing of the afflicted.  
Special trains bearing supplies and equipment are being rushed to the scene.  
The larger centres of the Province are busying themselves with the problem and the authorities here soon to have the situation in hand.  
The value of the property in the town was about \$1,970,000.  
Buildings and property in Campbellton were insured to the extent of about \$1,000,000, which will cover about seventy-five per cent of the loss.  
At two o'clock yesterday the fire started in Richards' Mill.  
A terrific gale was blowing from the west and despite the efforts of the firemen the conflagration rapidly spread.  
A panic was the result and all conception of what would be done to save what buildings then remained seemed to have left the minds of the frantic citizens.  
By nine o'clock the town was completely wiped out and the homeless citizens were thronged about the remains of their homes, some in the outskirts of the city, others along the railway line, and still others travelling for shelter to Dalhousie.  
Hundreds of people passed a sleepless night around the ruins of the town.

One hundred reached Dalhousie, where all that was possible was done to accommodate them and one hundred and fifty camped for the night along the railway lines running from the city.  
The great lumber mills with their piles of lumber, every store and office, the banks, railway depots, hotels and schools, hospitals, churches, factories, post office and custom house were all destroyed and what was yesterday a thriving and prosperous town is now reduced to a heap of ashes.  
By nine o'clock the fire had spent itself, no inflammable material remaining within reach of the hungry flames.  
The town of Dalhousie responded to the hurried call of its neighbors and sent its department to the scene of the disaster. During the absence of firemen a blaze broke out in the west end of Dalhousie, which, had it not been for the courage and despatch of the men in extinguishing it, might well have caused a repetition of the Campbellton disaster.  
A report is current in Dalhousie that Dr. Doherty of Campbellton, who has been in ill health, died while en route to the town.  
The exception of one child, Doyle, which met its death in the fire, no other fatalities have been learned of.  
Of all the town which yesterday appeared so substantial and permanent, today but five buildings remain standing.  
These are residences at the outskirts of the city, removed from the reach of the flames and their value is trifling compared with the extent of the loss.  
Not a single factory or industry of any sort is found in what remains of Campbellton today.

few scattered private residences, lying on the outskirts, nothing but smoking timbers remain to indicate what, until yesterday, was one of the most prosperous towns in New Brunswick.  
The fire started during the afternoon of yesterday in Richards' Lumber Mill; and it soon got beyond control of the Local Brigade.  
Assistance was asked from nearby points; but before help arrived the flames had gained such headway that confining could be done to check the fire. All the hotels are gone five miles north of the town, not less than \$2,000,000. Five thousand people are homeless, and are finding refuge at Dalhousie and at Mission Point.  
Richardsville village, three miles distant, was also completely destroyed; and there is an unconfirmed rumor that 70 men perished in an explosion in Alexander's store.  
The sawmills included several of the largest and best equipped in Eastern Canada.  
The Roman Catholic convent was also a most expensive structure.  
The Intercolonial Railway property to the value of one hundred thousand dollars went up in smoke; and, in short, practically nothing whatever remains of the thriving town.  
The fire burned all evening. But after six o'clock last night, the people gave no attention to the saving of property, but only thought of protecting themselves from the flames. About that time, too, the telephone and telegraph stations went out of commission; and thereafter no word was received from Dalhousie. A message was sent to St. John asking for assistance.  
ST. JOHN, July 12.—In response to an urgent appeal from the Mayor of Campbellton, a special train loaded with supplies of all sorts left here today.  
Mayor Frink has taken steps to forward, without delay, whatever contributions are received for the fire sufferers.  
Citizens are responding generously to the call; and although there must be a certain amount of suffering it is believed that this call will be reduced to a minimum.

Special to The Guardian.  
MONTREAL, July 12.—Marion Croche, an Italian, killed his wife and child today and then shot himself.  
Croche was jealous of attentions to his wife and the tragedy followed a quarrel.

### AMHERST SAYS "WELCOME BACK"

AMHERST, N. S., July 11.—A great success is the verdict of every one with regard to the old home week celebration. The sons and daughters of Amherst are arriving on every train, and are warmly welcomed. Not only the young and middle aged but many of the older citizens. Among others is Col. C. J. Stewart, of Halifax, now in his 90th year. Chief Justice Townshend is also taking a lively interest in the scheme.  
Today's program opened with an automobile parade. There were about forty in the line, many of them gaily decorated. The prizes for the most original design went to J. Fred Christie and J. L. Raiston. The latter had his car in the design of an aeroplane, and it attracted a great deal of attention. The Ramblers and the Moncton base ball boys met in a double header on the Ramblers grounds and both games drew good crowds. Moncton won in both instances.

Special to The Guardian.  
AMHERST, N. S., July 12.—This afternoon the ten mile race on the Ramblers' grounds drew a tremendous crowd.  
Over 3,000 people were packed on the grounds and every seat in both grand stands was taken.  
President George B. Cutten of Acadia College was the referee and E. N. Rhodes, M. P. the starter.  
The contestants were Fred S. Cameron of the Ramblers, John Robertson, Wm Hackett and John Cook of the Brookline Athletic Club, Alfred Horne of Everett, Mass and Clarence Deniar of Dorchester Mass.  
At the pistol shot the runners dashed away as if in a low yard sprint. Horne took the lead but Cameron soon forged ahead and maintained the lead until the finish.  
Robertson and Cook soon passed Horne who was taken with cramps, but Deniar held to the track.  
Cameron lapped him in the eleventh lap.  
The pace proved too much for Robertson, who left the track in the 17th lap.  
Then Cook's shoes were bothering him and he was compelled to stop. Cameron lapped him in the 18th lap and Cook gave up the struggle in the 21st.  
The race was then left to Hackett, Deniar, Horne and Cameron.  
Deniar was passed by Cameron in the fifth mile.  
Hackett pressed the leader closely and Horne, who had recovered his running condition, was putting up a splendid race, recovering his lost ground rapidly.  
The time for the first five miles was 27:52.  
From the fifth to the tenth mile the position of the runners did not change. Cameron leading, closely pressed by Hackett, with Deniar and Horne contending for third place.  
Cameron led Hackett by about a quarter of a lap, but in the final round put in a fine burst of speed leaving him in the rear.  
Hackett finished second with Deniar third.  
The American lads have become very popular in Amherst and received a fair share of the applause, but surely the hero of the hour was Fred Cameron.  
The time was 58 minutes and 4 seconds.

### CANNOT PREVENT FIGHT PICTURES BEING SHOWN.

LONDON, July 11.—The British government has no power to prevent the exhibition of pictures of the Johnson-Jeffries fight, according to a statement which Winston Churchill, the secretary of state for home affairs, made in the house of commons today in reply to a question put by Sir Howell Davies. ### I. C. R. SURPLUS FOR QUARTER

OTTAWA, July 11.—An Intercolonial surplus of approximately \$125,000 for the first quarter of the current fiscal year is indicated by the returns so far received at the department of railways. The figures are regarded as being very satisfactory, particularly in view of a heavy outlay on renewals, etc.  
Present indications are for a fine surplus, for the year but much, of course, depends upon the cost of operation during the winter months and that is largely governed by the amount of snow and weather conditions.
