

Pownal News

The writer had the extreme pleasure recently of visiting the cattle and fox ranches of Mr. J. Walter Jones at Pownal. The visit to the stables revealed the beautiful Hottentots receiving the final touch for the Winter Fair at Amherst to which 30 were sent. Nothing is spared to make Bossy look her best as you would be convinced if you could look into the "beauty parlour" where each in turn are clipped. (the dutch clip), their horns and hoofs polished and their faces powdered. A visit to the fox ranch was also very interesting. The ranch was fenced between 300 and 400 valuable animals, whose fur is at its best just now.

The Misses Helen and Charlotte Drake, students at P. W. C., spent the week end with their parents, Mr. and Mrs. William Drake, Water-side.

Miss Viola Blinn, Charlottetown, spent the week end with her friend Miss Edythe Lawton.

The Young Peoples League held their opening social at the Mansie Oct. 31st. The program was in keeping with Halloween. The games were very enjoyable and heartily entered into by all. The officers were elected for the present term. Mr. Ernest Smith being made president. A delightful lunch was served at the close by the hostess.

The flivver season is getting near the end, the frequent rains making motoring quite precarious. However they certainly are a wonderful means of getting there quick. Many queer cargoes are transferred from one part of the Island to the other, the most humorous of these being a beautiful little foal transferred from somewhere in Lot 48 to the capital, by one of our neighboring boys, now a prospective merchant in Charlottetown. This filly foal enjoyed the trip immensely, regardless of vanity case or cigarette.

What might have been a fatal accident occurred last Saturday in Pownal when the steering wheel of a Ford car driven by Mr. Wright broke when he was crossing the bridge at Acorn's Mills. The car plunged through the railing and landed upside down in the water. Fortunately the tide was out or conditions would have been worse. For the driver who emerged from the wreckage somewhat excited and shocked but otherwise uninjured. Mr. George Tweedy happened along and conveyed the driver to the city.

Jack Frost paid a little visit to Pownal last night, the 30th, when he almost stopped the plough but we farmers are hoping for a mild spell to get our turnips, etc. in some of which are a good crop and vice versa. Potato shipping is going on quite lively and despite the poor price the farmers are cheerful and happy looking, perhaps the thought of the two bazaars to be held in this vicinity shortly.

Miss Edythe Lawton was a visitor to the city Saturday where she resumed her lessons in pianoforte under the capable tutorage of Miss Roberta Spencer. At the closing recital given by her teacher last spring Edyth played two piano solos which were very highly commented on. We understand it is her intention to take up pipe organ instruction this term. Miss Lawton also possesses a clear, sweet voice, which along with her instrumental attainments will some day make her famous. She is but 13 years of age. We will watch her progress with interest.

WILL VISIT WINTER FAIR

Arrangements are being made and a tentative program drawn up for the entertainment of 500 junior farmers who are planning to visit the Royal Winter Fair. The boys will spend three days in Toronto. It is planned to have Premier Ferguson and Canon Cody attend them at a Hart House dinner.

ALBION CROSS SCHOOL

ROGERS BATTERYLESS RADIO

Christmas is coming! Come in and choose one of these new Rogers-Batteryless models now, make a small deposit, and instruct us to deliver it just before "the big day".

"FIRST in the field—first in proven performance—first in value", is only true of one electric radio—the Rogers-Batteryless. Over three years ago (and that is a long time in the radio industry) Rogers blazed the trail for all the electric sets that are on the market now. Even the word "batteryless" was coined by Rogers to describe this Canadian invention—the first radio in the world to operate successfully without batteries! Today there are more Rogers-Batteryless Radios sold than all other electric sets combined.

That is why you can't go wrong in choosing either of the wonderful Rogers-Batteryless Radios illustrated and described in this announcement.

"Four Hundred" Highboy. Developed this year as the result of definite demand for a Rogers-Highboy Model. Automatic Volume Control, Rogers Output Filter, Phonograph "Plug-in" Jack, Rogers Symphony Speaker in a genuine Walnut Cabinet. Price complete \$250.00

"Four Hundred" Lowboy

A development of the famous Rogers 200A Model. Single Tuning Knob operates Illuminated Drum Dial, Automatic Volume Control, Rogers Output Filter, Phonograph "Plug-in" Jack, Rogers Symphony Speaker in a genuine Walnut cabinet by Mail. Price complete \$260.00

Highboy or Lowboy—it is just a question of taste. Both models have all the distinctive new 1929 features. The only difference (apart from the Cabinets) is that the Highboy has a newly-developed type of Cone Speaker—whereas the Lowboy is equipped with the Rogers Symphony Speaker. We invite you to come in and inspect both of these new Rogers-Batteryless Models. They are priced many dollars under any other electric sets of equal quality and we offer liberal terms to any responsible family.

EVEREADY Radio Batteries - they last longer. Your Money's Worth! A Longer Lived Layerbilt at New Low Price! Don't be mistaken. You cannot improve on battery current for smooth reception, and the new Eveready Layerbilt positively gives you more current per dollar than you have ever bought before. Figure this out for yourself! Inside the Eveready Layerbilt the current-producing elements are arranged in flat layers instead of the round cells used in all other "B" batteries. The big flat surfaces give maximum efficiency, and actually double the amount of live, active material to the square inch. There's no mystery about it. After you have used a Layerbilt, you'll be convinced that its tremendously increased life gives the most economical "B" power you can buy. Eveready Layerbilts are now selling at new low prices in three types, covering every radio need. Ask your dealer. Canadian National Carbon Co., Limited. Montreal, Winnipeg, Toronto. Opening Eveready Battery Station CKNC, Toronto.

A BALLAD OF EVOLUTION. In the mud of the Cambrian main Did our earliest ancestor dive; From a shapeless albuminous grain We mortals our being derive. We could split himself up into five, Or roll himself round like a ball; For the fittest will always survive, While the weakest go to the wall. As an active ascidian again Fresh forms he began to contrive, Till he grew to a fish with a brain, And he brought forth a mammal alive. With his rivals he next had to strive, To woo him a mate and a thrall, So the handsomest managed to thrive, While the ugliest went to the wall. At length as an ape he was fain The nuts of the forest to rive; Till he took to the low-lying plain, And proceeded his fellow to knife. Thus did cannibal men first arrive, One another to swallow and maul; And the strongest continued to thrive, While the weakest went to the wall. Prince, in our civilized hive, Now money's the measure of all; And the wealthy in coaches can drive, While the needier go to the wall. Grant Allen

McDONALD H. F. MCPHEE B.A. BARRISTERS, ATTORNEYS, ETC. MONEY TO LOAN. Riley Building, Charlottetown. Insidious Eye Strain. We use this adjective advisedly. Sufferers from Eye Strain may have perfect vision and therefore do not suspect the presence of any eye defect. The motive power of the entire human organism is Nerve Energy. Normal eyes, it is computed utilize about 20% of this Nerve Energy, but when Eye Strain is present, a much larger proportion is required. Hence defective eyes, through excessive consumption of an excessive amount of Nerve Energy may seriously affect the functioning of other organs of the body and produce ill health. HAVE YOUR EYES EXAMINED. G.F. Hatcheson OPTOMETRIST.
