**NOVA SCOTIA
SEAWEED FINDS
BRITISH MARKET**

**Variety Proves Useful
as Sound Insulator
For Buildings — Eel-
Grass Also Found to
be Fireproof.**

LONDON, April 13—(C.P.)—Nova Scotian seaweed—eel-grass—is being supplied to Great Britain for insulating buildings against noises and echoes. It is disclosed by a writer in Overseas, the monthly journal of the Overseas League.

The discovery that seaweed will exclude noise to a large extent from buildings and stop echoes by the use of a particular kind of packing on walls and ceilings, was made by Capt. A. G. Huntley, an officer of the Royal Engineers. This packing is made from the variety of seaweed known as eel-grass.

The eel-grass, asserts the writer is fireproof, nonverminous and sound absorbent, and it grows to perfection where it is washed by fresh and salt water. If it is gathered from a sandy shore it is full of impurities, but off the coasts of Nova Scotia it grows under ideal conditions on a rocky shore. The eel-grass is gathered in Nova Scotia and shipped to Great Britain in the form of mats. These mats are fixed to the flat surfaces of ceilings and walls. Over the mats thin wood battens are nailed and upon these canvas can be stretched and treated to suit any decorative scheme that may be designed.

A number of London buildings, says the writer in Overseas, have been improved in this manner. In the new headquarters of the Midland Bank, in Cheapside, the great hall has been insulated in this way against noises. From it the sounds of traffic on the street are excluded and in it the buzz of conversation and the sounds of mechanical apparatus are deadened.

The new Bank of England, Lloyd's Bank, in Cornhill, and the Commercial Union building next door, are also being protected in the same way against noise. In the Royal Ear Hospital a room has been made sound-proof to such an extent that the ticking of a watch can be heard from one end of it to the other.

A hundred houses to be erected in Scotland under a housing scheme are to have seaweed mats under their floors. To dwellers in flats in which the performances of neighbors' pianos and gramophones formerly penetrated walls, floors and ceilings, says the article in Overseas, "Nova Scotia's seaweed will come as a boon and a blessing."

LONG CREEK AND VICINITY

On March 20th a very enjoyable reception was held in the hall, when Mr. Bruce MacLean and bride also Mr. Howard MacNeill and bride were waited upon by their many friends from Long Creek and nearby districts. These two amiable young women received a hearty welcome to Long Creek also a very beautiful presentation of cut glass and dishes. An excellent time was enjoyed by all present.

On Wednesday night the monthly meeting of the Women's Institute was held in the Hall. The "losing" side in the previous programme contest carried out during the winter months treated the winners to a very delicious lunch of ice cream and cake.

On Tuesday evening the many friends of Mr. Jack MacPhee assembled at his home to express their pleasure at having him amongst us again. Jack was presented with a well filled purse and responded with heartfelt appreciation.

Miss Jean MacArthur is receiving a very cordial welcome back to Long Creek having spent a very enjoyable vacation with her parents and brother in Detroit, U. S. A.

Mr. Wm. MacKay left recently for New York. All join in wishing him a very enjoyable trip.

Miss Violet MacCannell, teacher of New Dominion, spent the week end visiting relatives in Long Creek.

Her many friends are pleased to see Miss Grace MacNeill fully recovered after her recent sickness.

Regretful farewells were given to Mr. Hammond MacCannell who returned to Boston, Mass. having spent the past few months at his old home in Long Creek.

Paraffin or turpentine will clean porcelain baths and enamel ware. If two tumblers become fixed, gently tap with another, and they will at once loosen.

**British Boys
Unlimited**

(British United Press)
LONDON, April 13.—British boys unlimited is a financial flotation to save the street-corner boy from himself. Behind the venture are many public-spirited men.

A distinguished soldier, whose name was known throughout the entire British Expeditionary Force, is one of the directors. In those war days he was the high apostle of bayonet fighting. Then he broke off his Army career to devote himself to boys' welfare work.

"Gallant little fellows, these English boys," said the soldier discussing the flotation of British boys Unlimited. "They remind me of the Rolls-Royce engine in a jerry-built class; they have wonderful spirit, these little chaps, but no physique."

"Not long ago I went to a Borstal institution and stayed there for some time. What I found was that 70 per cent of the lads were there because of pure mischief."

"If I had been born where you were 16 years ago," I told them, "I should be here with you."

Partly because of this, British Boys Unlimited is offered as an investment by the National Association of Boys' Clubs. What the Company is out to do is help the good sort of boy become the good sort of man."

These boys' clubs have no uniform—the lads would not look at one—and the membership is made up of boys on the lowest rung of the ladder of life. The clubs have existed, doing magnificent but quiet work, for 40 years.

"Misdirected energy too often means Borstal or prison," continued the soldier. "In the great schools the energy is diverted to character building; to the team spirit. But in the poor districts it bubbles over, the boy starts 'nicking' things, and the damage is done."

"Our clubs get the boys just at that critical time of life, between 14 and 18, and they fill in the gap between working hours and bedtime."

"We have four great aims. The first is recreational and the second educational. Then there is character forming, when we teach the first principles of citizenship. The fourth aim is the spiritual side—the teaching of the spirit of service."

There is no clashing with the Boy Scout and the Boys' Brigade or like movements. "We are all shooting into the same goal, but we have every kind of temperament, and our clubs, which have no uniforms and no bands, are very necessary to one type of temperament."

It is estimated that today there are 2,500,000 boys in the country between 14 and 18, of whom 2,000,000 are wage-earners. Of this number 100,000 are members of Boys' Clubs.

ALMA. The February meeting of Alma W. I. met at the home of Mrs. Currie. Eleven members and ten visitors were present. It was decided

**With the Cockshutt Broadcast Lime and
Fertilizer Distributor**

The Cockshutt Broadcast Lime and Fertilizer Distributor spreads lime and all varieties of commercial fertilizer uniformly and economically. The Hopper is of large capacity and frequent stops for refilling are unnecessary. The machine has a wide spread and is built low down so that any tendency of the lime or fertilizer to blow in the wind is largely overcome. The driving and feeding mechanisms are simple and effective. Handles ground limestone and all kinds of commercial fertilizer such as Phosphate, Chile Nitre, Gypsum, Potash, etc. A thoroughly reliable, light draft machine.

Quantities from 90 to 5900 pounds per acre can be distributed, and spread uniformly in varying amounts, as desired.

**"IMPERIALS" are Ideal Winter
Fox Food**

At this season all ranchers are interested in obtaining of large litters of young foxes. Proper feeding of the vixens at this crucial time is most essential. Our outstanding successful feeders have found IMPERIALS to supply the necessary food requirements of the breeding season. They also correct irregularities, keeping the animals healthy and vigorous and in addition, ensure vixens a plentiful flow of milk for the young pups.

Winter feeding of IMPERIALS has practically eliminated destruction of young by females.

RESULTS JUSTIFY CLAIMS FOR IMPERIALS

The largest litters born last season and also the highest average of pups raised to maturity were in ranches where IMPERIALS comprised a most important part of the daily winter diet.

Keep a liberal supply of IMPERIALS on hand at all seasons.

Sold by leading distributors or direct from factory.
