**Sylvia Sidney And George Raft At The Capitol**

Love on parole is the dramatic theme of the new film that opened last night at the Capitol Theatre. The picture, "You and Me," starring Sylvia Sidney and George Raft, is a powerful treatment of the much discussed question: should paroled convicts be allowed to marry? Raft is seen as an ex-convict, determined to keep on the "straight and narrow," while Miss Sidney plays the part of a department store girl who hangs for the right kind of love. Working together in a large metropolitan department store brings the pair together many times a day, and their casual acquaintanceship blossoms into real love. Raft confesses his shady past to Miss Sidney and is humbly grateful when she overlooks this and marries him. In spite of their poverty, the marriage is ideally happy, until the day that Raft discovers that his wife has hidden from him the fact that she is a paroled convict, and by the regulations of the probation authorities, she is not allowed to marry. Raft is bitterly disillusioned by this treachery on her part, and despite all her efforts to hold him drifts back to his old life of crime. With his former gangster pals, he plans a hold-up of the department store where he is employed. In the meanwhile, Miss Sidney, who has done all in her power to rectify the wrong she has done him, gets wind of his plans, and throwing everything else overboard, goes to the owner of the store, Harry Carey, and pleads for her husband's release. Carey, a philanthropic heart, agrees to let him off easily, providing she guarantees to stop the hold-up. She agrees to this, and when the night of the robbery comes, is there on the scene, and catches the gang red handed. Giving excellent support to Miss Sidney and Raft are Warren Hymer, Roscoe Karnis, Barton MacLane and George E. Stone.

**Acclaim "Suez" As Memorable Film At Prince Edward**

Produced with the magnitude possible only on the screen, one of the most memorable pictures ever to come out of Hollywood, "Suez" opened yesterday at the Prince Edward Theatre.

"Suez" is truly a great picture. In spectacle, emotional experience and sheer entertainment it is unsurpassed. It is said that into its production Darryl F. Zanuck has poured all his skill and "chutzpah" looks it.

The story is of heroic proportions. It tells of the amazing Ferdinand de Lesseps, who dreamed of creating the short route to the East, sought vainly by Columbus and Magellan, by tearing continents apart and joining the Mediterranean with the Red Sea. The great canal he built has become the jugular vein of the world.

Out of choking sand, from the clutch of the aiding, in the face of the terrifying Sahara, silted with blood, tears and passion—de Lesseps built his canal, driven by the love for two women to realize the dream men scoffed at.

Tyrone Power gives thrilling realism to the central character, with Lorettta Young and Annabella strikingly appealing in the feminine leads.

**A Man's Fancy**

will be taken by these stout, good looking dress shoes. The inbuilt quality is amazing for such a low price. That makes the surprise even bigger. Come round to see these style-buys. Several pair will be an investment never regretted.

**Members Debate Scheme Of Farm Rehabilitation**

In moving the resolution with regard to Farmers' Rehabilitation in the Legislature on March 29, Hon. W. Dennis, Minister of Agriculture, gave some of the reasons which, in his opinion, were responsible for the "deplorable conditions into which the agricultural industry of the province has deteriorated."

"Possibly one of the prime reasons," he said, is that owing to the tariffs which have existed in Canada since the inauguration of Confederation we have always been a consuming province having no white coal, no forests, no inland waters, consequently no fish and game, and no manufacturing industries, thereby not deriving any remuneration from the sportsmen within our province.

"Manufacturing provinces or nations under high tariffs have a wonderful advantage on account of the fact that their goods receive an enhanced or fictitious value brought about by said tariff; but a consuming province which does not manufacture is penalized to the same extent as the former mentioned benefits.

"It might also be permissible to give some facts and figures which lead us to believe that the case has become desperate that it requires original and far-reaching remedies to accomplish anything worthwhile.

**Cites N.S. Commission Report**

"First, there is the question of the effect tariffs have had on this province, and I have this from a report on Dominion-Provincial relations and the fiscal disabilities of Nova Scotia within the Canadian Federation, and prepared by Norman McL. Rogers on behalf of the Nova Scotia Government; said report being submitted to the Hon. Angus L. Macdonald, Premier of Nova Scotia, and I understand that this report is an authentic tabulation of conditions affecting the Maritime Provinces. The report deals with the different Maritime Provinces as well as the province of Nova Scotia.

"It is an accepted fact that any province or nation which is a manufacturing country tariffs are a vast benefit as they increase for their goods manufactured an enhanced or fictitious price. In like manner a province which is not a manufacturing province but a consuming province is penalized to the same extent as the former benefits. Consequently, Prince Edward Island, which is not a manufacturing province, has been penalized as a consumer of the manufactured goods of the two central provinces."

Mr. Dennis cited the report of the Nova Scotia Commission to show that the loss to Prince Edward Island on account of tariff was \$17.88 per capita, Nova Scotia \$12.28 and New Brunswick \$11.67. The net gain per capita of Quebec was \$118, Ontario \$15.15.

"So that since Confederation and through those seventy-five years who did everything possible to save our Darling Baby and for many expressions of letters and cards received by them.  
L-57-4-4-11.

**Live Stock Decrease**

"Our live stock has decreased considerably. In 1937 in horses, cattle, sheep and hogs, our stock population was 21,000. In 1930 the stock population was 285,994; so that in seven years we sustained a loss of 84,004.

"During the five-year period from 1921-25 our agricultural products were measured in dollars and cents was \$98,000,000 as per (P. 204 Canadian Year Book 1926).

"Our five-year average from 1932-1936 was \$94,542,000 as per (Canada Year Book, 1938, page 202) so that in this five-year period our province has dropped \$31,458,000 in our agricultural revenue.

"This gives you an idea why our farmers are becoming discouraged and are leaving the land."

Mr. Hughes

The basis of the difficulty our farmers are faced with the next speaker, Mr. William Hughes, Fifth Kings, was stated in the first paragraph of the preamble of the resolution, which referred to the recent world-wide economic depression and unsatisfactory state of home and foreign markets as being seriously reflected in the depression of agricultural prosperity in this Province, particularly during the years from 1931 to 1935.

"We haven't got the markets," said Mr. Hughes. "We are not able to sell our products at a price that will enable our farmers to live economically. This means that those who are not producing as well as the best of our farmers cannot produce at all."

This resolution, he continued,

can do practically nothing so far as improving interprovincial trade is concerned. The world depression was foreseen back in 1921, when the International Labour Conference met in Brussels and appointed a committee to study the matter. It was not until 1927, however, at a general meeting held in Geneva and attended by more than 150 leading economists of the world, that an authoritative finding was brought down, listing three causes for world unemployment and depression. The first of these was the establishment and maintenance of industries which, while necessary in war, were not compatible with peacetime requirements. The second cause was excessive customs protection among the nations, and the third the unstable monetary system of many countries.

"What can this Legislature do to remedy these conditions?" asked Mr. Hughes. "Absolutely nothing." Even the Dominion Government was limited to action in lowering tariff barriers. The Provincial Governments can only come in after the Dominion Government has moved in this direction; they cannot themselves initiate remedial measures. Canada, he believed, had gone a long way towards removing the causes of depression. In 1900 it made an attempt through countervailing duties, in 1905 there was an achievement in the way of reciprocity with the United States, and in 1938 there was a fulfillment in the three-way trade treaties between Canada, United States and Great Britain.

Mr. Hughes did not believe that under present conditions it was possible to put men on vacant farms and expect them to make a living when men better trained had failed to do so. "Think well before proceeding with this scheme," he urged, "and don't spend any worth-while sum of money until we see the pendulum swing, until we see the men now on the farms are making more money than they are today. My suggestion to the Government with regard to this measure is: Be careful."

**F.C.A. Act**

"As a further proof of the conditions of our farming people I will draw your attention to the statement made by Mr. Dunlop on the 4th of February on the floor of the House. In regard to the administration of the Farmers' Creditors Arrangement Act he stated that there were

Submitted	Concluded
P. E. I. ----- 1,116	1,076
N. B. ----- 103	148
N. S. ----- 1,090	999

appropriate debt in the cases disposed of in the province was \$2,995,036 and the value of the farms of the parties participating in administration was \$2,844,000. That the indebtedness of those farms was \$32,942 more than the value of their land.

**Mr. Stewart**

While to a certain extent low farm prices are caused by lack of money to keep men in business, I am of the opinion that the measure that would put all these men to work. It would not cost any more than the sum we pay for direct relief, and the farmers would be benefited by their labor.

Mr. Stewart

debating this resolution today," said the next speaker, Mr. John Mustard, Third District of Kings. "I ain't getting us anywhere. I make good, who are continually going behind, and to whom assistance would be of little use so far as farm rehabilitation is concerned. Their farms are heavily mortgaged, and the only solution was for the mortgage holders to sell them out and re-sell to those who want to buy at easy rates. He did not think the Government should undertake to buy farms and run them. That policy would result, he feared, in endless trouble.

**Mr. Mustard**

"I do not know the purpose of

debating this resolution today," said the next speaker, Mr. John Mustard, Third District of Kings. "I ain't getting us anywhere. I make good, who are continually going behind, and to whom assistance would be of little use so far as farm rehabilitation is concerned. He did not think the Government should undertake to buy farms and run them. That policy would result, he feared, in endless trouble.

Mr. Mustard

debating this resolution today," said the next speaker, Mr. John Mustard, Third District of Kings. "I ain't getting us anywhere. I make good, who are continually going behind, and to whom assistance would be of little use so far as farm rehabilitation is concerned. Their farms are heavily mortgaged, and the only solution was for the mortgage holders to sell them out and re-sell to those who want to buy at easy rates. He did not think the Government should undertake to buy farms and run them. That policy would result, he feared, in endless trouble.
