Moncton Hawks Future Uncertain

Sponsors Of Team Cannot Carry On Unless City Council Comes To Their Aid.

(Canadian Press)
MONCTON, N. B., May 3—The future of the Moncton Hawks, All-Canada Cup champions, is hanging in the balance. The Moncton Exhibition Association Limited, sponsors of the team and lessees of the Stadium which is owned by the City of Moncton, have informed the City Council they "simply cannot carry the burden involved in fostering a hockey team," any further unless the city grants them a reasonable measure of relief. The Association has the Stadium under a three year lease which expires December 1, 1934, and are asking the city to modify the terms of the lease to the extent of taking over the property for the months from May to October, inclusive, and that the

building be leased to the Association from November to April, inclusive on the basis of the present rental.
At a meeting of the City Council last night, the request was turned down and a counter proposal submitted to the Exhibition Association today, by the Council, was also turned down. Negotiations have reached a deadlock and no new developments had taken place today.
It is learned that the Association will meet with the City Council tomorrow with a view to arriving at a solution of the problem which would enable Moncton to remain in Senior Group A competition. The Association have announced that they cannot carry on under the present terms of the lease.

BASEBALL RESULTS

AMERICAN LEAGUE

Boston 6 8 1
St. Louis 2 6 1
Andrews and Shea; Hadley, Hertz and Ferrell.
New York at Detroit, cold.
Philadelphia at Chicago, cold.
Washington at Cleveland, rain.

NATIONAL LEAGUE

Cincinnati 4 8 2
Boston 6 9 2
Lucas and Lombardi; Cantwell, Betts and Hogan.
Chicago at New York, rain.
St. Louis at Brooklyn, rain.
Pittsburgh at Philadelphia, rain.

AMERICAN ASSOCIATION

Columbus 8; Minneapolis 7.
First Game:—
Louisville 7; Kansas City 0.
Second Game:—
Louisville 7; Kansas City 1.
Indianapolis at Milwaukee, cold.

INTERNATIONAL LEAGUE

Newark at Montreal, rain.
Baltimore at Toronto, rain.
Albany at Rochester, rain.
Jersey City at Buffalo, rain.

PLENTY OF VETCH

Vetch growers in Laprairie, P. Q. have a carryover of 125,000 pounds, in addition to the 1932 crop of about 165,000 pounds.

Keep going with PEP!

Look at men and women who are things. Active, Energetic, full of health. That's the type who enjoy Kellogg's PEP Bran Flakes.
There's the famous flavor of PEP. Packed with the energy of wheat. Plus enough bran to be mildly laxative.
Buy PEP Bran Flakes from your grocer. Delicious with milk or cream. Made by Kellogg in London, Ontario.

Sales Tax Maintained At Present Level

(Canadian Press)
OTTAWA, May 3—The House of Commons took another bite at the Rhodes Budget today, passing the Sales Tax provisions after a comparatively mild discussion. The Budget maintained the Sales Tax at the six per cent level and removed from the exemption list a score or more commodities.
Most of the criticism today was directed against the Finance Minister for removing from the exemption list a long line of foodstuffs, including flour, molasses, oatmeal, sago and tapioca. Liberals also complained of the new provision which taxes pies, cakes and other delicatessen products.
It was all a question of the Dominion forced to raise revenue, replied Finance Minister Rhodes. There were obvious reasons why certain foods should not be taxed but always in the immediate background was the hardpressed treasury which must be replenished. The six per cent tax would yield \$13,000,000 alone on the goods removed from the exemption list.

More Equitable Distribution Is Claim

HALIFAX, May 3—(C.P.)—Declaring it was the opinion of the best modern authorities that there should be a "more equitable" distribution of the burden of furnishing public service to citizens, Premier Gordon S. Harrington in the Legislature today outlined the application of this view to Nova Scotia. He went on to say that in general, and under the modern view of sociology, possessors of wealth must be prepared to bear a larger comparative burden.
The Premier was answering a charge made by C. W. Anderson, (Opposition, Guysboro) that Provincial taxation had reached a point where it was burdensome and expenditure should be curtailed.
If Provincial taxation had reached this point, it was burdensome on the wealthy and on corporations and not on the poor, the Premier said. It was right, he continued, that the load should be so placed. Viewing the social trend of the modern age, the wealthy must be prepared to contribute more to provide for the poor. "Modern authorities are unanimous that the trend is for the masses to desire a more equitable distribution of wealth. These authorities point out that either this must be done by Governments through the levying of taxation for the provision of more extensive social services, or the people will take things in their own hands as they have done in so many places throughout the world, notably South American, Russia and other European countries.

WATERVALE WOMEN'S INSTITUTE

Watervale Women's Institute held their regular monthly meeting at the home of Mrs. E. Boylan, Tuesday evening, April 18. The president, presided and the meeting was opened by a Victoria selection, followed by the roll call, which was responded to by six members with "House-cleaning Hints." The correspondence was next dealt with, the questionnaires being distributed for filling in. The secretary then read a letter of appreciation received from William O'Brien and family in reply to a letter of condolence from the Institute members and for the many acts of kindness received during their recent sad bereavement. Reports from the different committees were given and the school committee was re-appointed. After the business of the meeting was transacted the program, consisting of a reading by one of the members and victrola selections was enjoyed by all. The next meeting will be held at the home of Miss Annie Byrne, roll call to be answered by "Jokes". The singing of the National Anthem brought the meeting to a close. A delicious lunch was then served and a pleasant social hour spent.

LIME PRODUCTION

Canadian producers reported in January shipments of lime amounting to 18,224 tons as compared with 18,295 tons in the preceding month and 23,665 tons in January, 1932.

Horse Notes

On April 26th Mr. Gordon Dawson was presented with a handsome filly by Bud Axworthy, from his richly bred mare, Bessie Jackson, by Capt. Aubrey, her dam is Bessie Todd and 2nd dam, Bessie Barnes, by Zombra.
Mr. Dawson is a great advocate of colt racing and has entered a full brother to the above mentioned filly in the P. E. I. futurity race next year. He has faith in the buds and it is to be hoped that other owners of well bred colts will miss this opportunity and nominate their colts before May 15th and find out the value of breeding.—S.

ROOSEVELT

(Continued from Page 1)
ed unimportant by comparison with the rise in the prices of commodities—wheat and metals— which followed passage of the inflation measure.
It has been pointed out that should Mr. Roosevelt deem it advisable to decrease the gold content of the dollar, reaction on Canadian gold mining interests, now leading the United States in production, would be favorable.
The Royal Bank of Canada said today rise in prices and improvement in conditions in the United States as the results of a policy of controlled inflation "cannot fail to have a favorable effect particularly in Canada."

FIGURING GARDEN COMBINATIONS OF VEGETABLES

The average amateur gardener finds it rather a puzzling and difficult task, in planning his garden on paper, to figure out practical combinations of vegetables, which it is necessary to do to obtain full use of the producing capabilities of the soil. As an aid in planning a number of combinations which have been tried out successfully are set down:
Cauliflower, lettuce, radishes—Early cauliflower in rows 3 feet apart. Between the rows plant a row of lettuce. Between the lettuce and the cauliflower sow a row of radishes. This would give you the following distances: Cauliflower 9 inches; radishes, 9 inches; lettuce 9 inches; radishes 9 inches, then the second row of cauliflower.
Cucumbers, peas, radishes—Dwarf peas in double or single rows 6 to 9 inches apart between rows of peas and later hills of cucumbers in rows midway between the rows of peas.
Carrots, parsnips, spinach, lettuce or radishes—Plant carrots or parsnips in rows 2 feet apart in alternating rows 2 feet apart. Midway between the first two rows plant radishes, lettuce in the second two rows and spinach in the third two rows.
Beans, spinach and radishes—Spinach in rows 2 feet apart. Midway between rows of spinach plant radishes. When radishes are harvested let their row be planted to string beans.
Tomatoes, cauliflower or broccoli, spinach, radishes—Set cauliflower or Italian broccoli early in rows 4 feet apart, 1 foot apart in the rows. One foot each side of cauliflower or broccoli plant rows of spinach, plant radishes between spinach and cauliflower or broccoli. Midway between rows of cauliflower or broccoli set tomato plants when weather is warm and ra-

CENTRAL GUARDIAN

—
OPENING OF NEW HOSPITAL—It has been decided that the new Prince Edward Island Hospital at Brighton will be formally opened in the first week of July. This will give the trustees and staff sufficient time to make the necessary arrangements and transfer with the least possible inconvenience to everyone concerned.

OVERHAUL CAR FERRY

The new car ferry, Charlottetown, will leave this week for the Davis shipyards, at Lauzon, Que., to be overhauled. The old ferry, Prince Edward Island, will be placed on the route during the former's absence of about a month. This will necessitate the handling of motor traffic across the Strait by means of loading all autos on flat cars.

SHOT AT THIEVES

Three shots fired at fleeing thieves yesterday morning by Mr. Wallace Walker, watchman on one of the city wharves, failed to strike their mark. The thieves had stolen a case of beer from a refrigerator in a house on Water Street, but had been detected by the occupants of the house who phoned the police. The officers were in pursuit of the offenders when the latter encountered Mr. Walker, who opened fire on them.

Wins 3 Trophies

BRIDGETOWN, Barbados, May 3—Spartan created a record in Barbados football today by defeating St. Ambrose 1-0 in Russel Cup competition, thus finishing the season with all three competitive trophies. Spartan won the Dalton and Football Association cups earlier in the season.

EVAPORATED MILK EXPORT RECORDS LARGE GAIN

Canadian evaporated milk found its way into thirty countries in March and the export advanced to 2,284,300 pounds valued at \$152,848 from \$100,200 at \$62,247 in March, 1932. British Empire countries took most of the product, the United Kingdom's share being 1,660,000 or more than half. The export of condensed milk and milk powder also increased.

COMMERCIAL FAILURES IN FEBRUARY

Commercial failures numbered 216 in February as compared with 214 in January and 221 in February, 1932. Trading establishments accounted for 117 of the February assignments. The liabilities of the assignors in February amounted to \$3,947,202, in January to \$4,049,929 and in February, 1932, to \$3,650,728.

CORN

(Experimental Farms Note)
Corn for ensilage is still of considerable importance on a great many farms in Eastern Canada.
During the season of 1932, the Division of Forage Plants, Central Experimental Farm, Ottawa, conducted a test in which careful comparison was made of a number of corn varieties commonly grown for ensilage in Eastern Canada, in addition to several that are not so commonly grown or so well known.
Judged from the standpoint of yield, the varieties ranked in the following order:
Dents—Wisconsin No. 7, Golden Glow, Leaming and Bailey.
Flints—Compton, Early, Longfellow, and Salzer's North Dakota.
All varieties were cut at the same stage of maturity, the "late dough" stage, and were presumably equal in quality. Wisconsin No. 7 yielded better than any other variety. Compton's Early yielded equally as well as Golden Glow, Leaming and Bailey and since the flints were harvested one week earlier than the dents this variety should be given the preference in districts where the season is somewhat short for using the dent varieties.
The main difference between dent and flint varieties for ensilage purposes (apparent from yield) is in the production of suckers; the flints sucker very freely while the dent sucker very little, if at all.
Corn for grain is not of very great importance in Eastern Canada, except in southwestern Ontario, where the standard varieties for grain are those already discussed for ensilage purposes.
In addition to the ensilage test mentioned above, a test was also conducted at Ottawa to determine the best varieties of corn for grain production in districts in Eastern Canada with conditions similar to those prevailing at Ottawa.
The varieties, Quebec No. 28 (a 12-rowed flint) and Twitchell's Pride (an 8-rowed flint) gave the best results in this test, both of them being quite outstanding in both yield and maturity.
Further details of these tests can be had by writing to the Division of Forage Plants, Central Experimental Farm, Ottawa, Ontario.

Prospects Good For Banner Racing Season

There is every indication that this year will be a banner year in horse racing. Not for years has there been so much interest taken in this sport.
Mack Steele, the well known trainer, has a string of horses in training at the Summerside Trotting Park, among whom are Lucky Lindy (2.11½), the war horse who is in the pink of condition; and Mr. Squires (2.16) judged by Mack as a real trotter. Those two horses are owned by Wellington McNeill of Charlottetown.
Another favorite, Because (2.12) is being cared for by Mack and has fully recovered from his accident of two years ago and is in splendid form. Mr. J. P. Smith, Kinkora, is the lucky owner.
Mack also has the famous Helen D., which was purchased by him and arrived from Boston a few days ago. This mare is by Atlantic Express, and is four years old. She won the Senior Yankee Stake, worth \$947.04 at South Weymouth, Mass., for three year olds last September in 2.19, 2.22 and was second in the three year old trot at Marshfield, Mass., 2.14½. This filly has raced seven times against aged horses and has never been out of the money.
Another good two year old filly, sired by La Copla, dam Miss Bell Rico, is in Mack's string and is owned by Mr. A. J. A. Barter, of St. John, N. B. This horse shows great promise.
Mr. Arthur Allen, of Summerside has a good three year old colt under Mack's care and will race him this summer. This colt was sired by Clay Walls, his dam is sister to Marjorie M.
Mack expects to add two more to his stables within a week.
With this fine array of racing material the public may expect some good sport at the opening race on July 1st.
Milligan and Morrison's race course at Northam is being prepared for the racing season and Mr. Edgar Milligan, the proprietor, is getting things in shape. He is installing an electric lighting plant so that he can have night racing on his oval this year.
Everything points to a successful sporting season.—S.

The great "TOOTH" mystery

Why do teeth start to go when you're young? Why do some people keep them longer than others? Why does the dentist talk about "pyorrhea" when you are worrying about "teeth"?

The loss of teeth has no connection with wrinkles and gray hair. Today you may flash a carefree smile that shows white teeth without a flaw. Tomorrow your dentist may be forced to remove one of them, or two, or three.
The shock is cruel in these cases, not so much from pain as from hurt pride. It seems very mysterious to the victim, particularly if he has always thought he was giving his teeth the proper care. Brushing teeth night and morning, keeping them beautifully clean—this he has done but it was not enough. The average person is likely to think only of the surface. The dentist's thoughts go deeper. For pyorrhea is a gum disease. Don't neglect seeing your dentist periodically. And when you brush your teeth, use Forhan's, the toothpaste for both gums and teeth. It is the life-work of a specialist in pyorrhea, Dr. R. J.
