Charged with forgery and with obtaining goods under false pretenses, Bruce A. Howland, 22, alias B. R. Roberts' North Devon, York County, N. B., was arrested yesterday by Constable Watson Higgins in Moncton, and brought to Charlottetown last evening. The arrest followed Howland's release from imprisonment at Dorchester where he has been serving a sentence since January 23 last on a charge of forgery for which he had been arrested in Moncton on January 4.

Howland, it is alleged, forged cheques on certain local merchants, and obtained certain articles under false pretenses, among them a ladies fur trimmed coat, an overcoat, a suit of clothes and a fountain pen, all of which have been recovered, and which were found in his possession at the time of his arrest last winter. On receiving complaints on January 3 last, from local merchants who had been victims of the operations of Howland, and who gave his name as B. R. Roberts' the police forwarded the description to mainland points as the man had absconded from the province. As he stepped from the train at Moncton on January 14 he was apprehended by the police of that city, and was later sentenced by His Honor J. W. Bennett to one year in Dorchester Penitentiary. Premier Lea returned to the Province last evening after an absence of more than a week during which he attended the Royal Winter Fair at Toronto, and a conference of provincial Ministers of Agriculture with Hon. Robert Weir, Federal Minister of Agriculture.

Premier Lea expressed the opinion that the show was without doubt the greatest held in the history of the Royal Winter Fair. In the live stock classes in particular there was a larger number of entries, and a higher quality of exhibits than on any previous occasion. The only Island exhibitors were Mr. J. Walter Jones of Bunbury and Mr. R. A. Profit, of Freetown. Both took a considerable number of prizes. Competition was unusually keen especially in the Holstein classes and local breeders pitted their animals against millionaires' herds. The quality of the potato and grain exhibits was such as to discourage the showing of any mediocre exhibits. In the former classes there was tremendous competition. Island exhibitors took a large number of prizes. Mr. Peter Brodie taking first in one class, New Brunswick, however, won premier honors in the Green Mountains. Premier Lea also reported a very successful conference with Hon. Robert Weir, Dominion Minister of Agriculture.

During the signing of the register, a duet was sung by Misses Eileen Rodd and Alta Prowse, nieces of the groom. The bride looked charming in a gown of white silk and white chrysanthemums, asters and maidenhair fern. The groom's gift to the bride was a Pearl-on-amber set. Commenting upon the recent announcement of the Federal Minister of Agriculture with respect to steps to be taken in aid of the live stock industry, Premier Lea in an interview yesterday expressed his thorough approval and appreciation. The definite steps so far announced are four in number, namely, the supplying to farmers free of cost by the Federal Government of thoroughbred sire bulls; the supplying of thoroughbred sows at cost and the payment of the freight upon these animals to the individual farm; the importing of thoroughbred stallions to be hauled by the various breed associations; and the establishment of laboratories to test adult chickens for disease, free of charge to the farmers or chicken-raisers.

There are nineteen four inch wells, which are sunk to an average depth of twenty-two to twenty-three feet, and one six inch well. These wells were driven by Mr. T. R. Kent, well driver, of St. George, N. B., who brought his equipment here for the purpose. There is a very extensive watershed in the locality where the wells have been driven, as well as a splendid spring of water. The reservoir lies about four miles north west of the new source of supply. The twenty wells are connected to a suction main. From this main the water will be pumped by means of an electric motor to the reservoir through a fourteen inch force main. It will thus be possible to deliver two million gallons of water to the reservoir in 24 hours. The work of laying the main was begun on September 6 by the firm of Phillips and Clarke, and has been recently completed. The main is five feet below the surface of the ground.

—IN SERIOUS CONDITION—The many friends of Mr. Harry Spears of Summerside will regret to hear that his condition is causing some anxiety. Mr. Spears has been undergoing treatment in the Prince County Hospital for some time.—S.

Almost one thousand tons of pipe were used in the line. This piping was manufactured in Canada by the Canadian Iron Foundries, Montreal. The pump motor was furnished by the Canadian Allis-Chalmers, Toronto. The valves were manufactured by T. MacVity & Sons, St. John.

Power for the electric motor will be supplied by the Maritime Electric Co. who have laid a line from the plant to the works. Air vents are now being installed at high points in the line. The pumping station is almost completed. The concrete floor and the pump foundation were poured last week. The work of erecting the machinery is progressing favourably. It is thought that it may be necessary to flush the new line several times before permitting the water to enter the reservoir.

Analysts who have analyzed the water at the source have pronounced it excellent both from the bacteriological and chemical standpoints. Analyses were made by Dr. McKenzie, analyst for the Department of Health of Nova Scotia, and by Dr. Abramson of the Department of Health of New Brunswick.

FINE NEW WAREHOUSE—Scouris has reason to be proud of her latest acquisition, the new frost-proof warehouse just completed. The building, an immense structure, is a masterpiece of workmanship in every detail and from the time that the first pile was driven until the installation of light, heat and water, its growth was watched with keen interest by the citizens of the town as well as by the farmers of the precincts. The contractor, Mr. Bernard Creamer, a builder of note, is to be congratulated on the excellence of his work as well as on the rapidity with which the work was carried on so as to enable shippers to have the use of the building this Fall. The District Engineer, Mr. Hyndman and his assistant, Mr. Millar are deserving of much credit for their untiring interest and assistance in seeing the work through. It will surely be a boon to the farmers of Eastern Kings to have a building of such immense capacity at their command, and no doubt potato growers will not be slow in taking advantage of their great opportunity.—B.
