Squeeze Plays
 As a rule, a well-executed squeeze play leaves the defenders quite helpless, but sometimes the squeeze needs their unwitting assistance. Observe today's goal:

TENSE THRILLER OPENING HERE

Columbia's "Johnny O'Clock," suspenseful modern melodrama of a gambler and his ladies, co-starring Dick Powell and Evelyn Keyes, will open today at the Prince Edward Theatre. This story of a fabulous character and his absorbing exploits gives Powell his most engaging role as a two-fisted gambler who plays rough with women who play cute. Miss Keyes is to be seen as a hard-boiled show-girl who loses her heart to Powell.

Director Robert Rossen, working from his own screenplay, has concocted a screen drama crammed with action, suspense, gunplay and the feverish excitement of the chase. Many romantic interludes have been woven into the film's fabric, which stresses purposeful movement.

Producer Edward G. Neals has assembled a large cast of capable supporting players including Lee J. Cobb in the meaty role of a methodical detective; Ellen Drew as the wife of S. Thomas Gomez, who portrays a big-shot gambler; Nina Foch, naive checkroom girl in a gambling casino; and John Kellogg, underworld character.

CURLEY — MacFARLANE

On June 7th, a quiet wedding was held at Trinity United Manse, Summerside, when Betty Frances, eldest daughter of Mrs. Sadie and the late Wilbur MacFarlane, became the bride of Ivan Francis, son of Mr. and Mrs. Alfred Curley of Freetown.

The young couple were attended by Miss Helen Stewart and Mr. Lloyd Reeves.

The bride wore a lovely blue suit with black accessories and a corsage of red roses. Her only jewelry was a single strand of pearls a gift of the groom.

After the ceremony a buffet luncheon was held at the bride's home. The happy couple will reside in Freetown.—S.

NAIL PRICES UP

Recent bulletins of the W.P.T.B., along with items in the daily press, have served to inform public and dealer alike that the price of wire nails has been advanced. One reason for this advance, among others given by the W. P. T. B., is that it will tend to divert a greater quantity of steel to nail manufacture and thus bring about an increase in production. It is to be hoped that this result will be achieved, as this item, so essential to the building trade, has been in very short supply for some time. There has also been a corresponding increase in the price of fence staples.
