BABY SUBMERSIBLE AS SUBMARINE'S LIFEBOAT.

For a long time attempts have been made to evolve some sensible scheme for permitting a crew to escape when a submarine sinks, gets ensnared in a net, or for some reason becomes unmanageable while under water. An invention that has lately been protected by patents is interestingly described and illustrated in Popular Mechanics Magazine for November. It is a lifeboat and, in reality, a small auxiliary submarine that normally is held in a concave seat constructed in the top part of the large craft. Water-tight hatchways are provided in each of the vessels so that access from one to the other of them is possible. It is intended to offer a safe retreat for some 30 persons. Electric and gasoline motors would propel it and give it a radius of action estimated at about 500 miles. In the event of accident, members of the crew would enter the lifeboat, close the hatchways, free the small craft by unscrewing two large bolts that anchor it to the larger one, and rise to the surface.

STEAM ENGINE PULLS TRAIN OF LOG SLEDS OVER SNOW

Those who are familiar with the history of the steam engine will recall that the first locomotive was operated on an ordinary highway. In this connection it is interesting to note that an engine is being used in a Wisconsin lumber camp during the winter months to haul a train of logging sleds over snow and ice. Popular Mechanics Magazine for November shows the engine at work in a full color illustration on its cover. An account of the accomplishments of this clever makeshift is given in the magazine. The scarcity of timber in the district is continually increasing the length of hauls and lessening the practicability of constructing tracks for logging trains. Reduction of transportation costs is therefore necessary for the profitable exploitation of the remaining timber. The "steam sled" outfit is doing this satisfactorily during the three or four months the snow-covered roads permit heavy traffic.

CASTORIA For Infants and Children In Use For Over 30 Years Always bears the Signature of Dr. J. C. Watson

"ST. PETERS BAY BAPTIST Church will hold service next Sunday, November 4th, in the afternoon at 3.00 o'clock, Rev. R. N. Rand will preach: Subject: "The Bondage of the Race."

"ON COMMISSION.— Mr. Fred Clark of California son of Station Master A. E. Clarke of Souris and who has risen to the position of Superintendent has been appointed with 12 others as a Commissioner of railway experts by the American Government to go to Russia in connection with railway matters. Fred has made good.—C.

"AN INCIDENT.— In a certain town not a 100 miles from Charlottetown the following incident occurred. Fine for doing and fined for not doing. P. partakes of too much of the ardent and gets arrested— he is fined for doing.— H. A. bystander refuses to assist in the arrest when P. calls on him to help. H. is also fined. For the full text of the story you must ask the Chief of Police. You cannot hoodwink P. No doubt he says something highly, and assurance is given that "so far as knitting garments for our soldiers on Sunday is concerned, even the strictest Sabbatarian might safely include it among permissible works of mercy and necessity." The Sun argues the point with seriousness, even if it does permit itself a stroke of humor at the end of its homily, says the Literary Digest.

"With all the numberless knitting needles that are enlisted in the cause there will not be enough woolen articles to keep every soldier warm this Winter. Even with spare hours on Sunday utilized, there is no time to be lost if the individual knitting factories are to come anywhere near meeting the demand upon them. "The question of knitting in church is, we concede, more debatable. If it is right to fight battles on Sunday, why should it not be right to do helpful and comforting things during church services? It is not inconceivable that a warm stocking would be regarded as a more religious up above than a cold prayer, and that a woolen vest for a soldier of the Lord might be considered in the heavenly court of last resort as more eloquent than many sermons. Nor do we think it could be urged that knitting in church would divert the minds of the congregation from exhortations to piety. Knitting, when properly mastered, becomes largely mechanical and even beginners could still sing the hymns and listen devoutly to the minister. "We acknowledge that knitting is not per se a pious exercise, and that it does not necessarily involve a peaceful frame of mind. The French girls who surrounded the guillotine during the Reign of Terror evidently carried their knitting with them, and rarely missed a stitch even during the most exciting scenes. It would unquestionably be better to knit in church than like Madame Lafarg at such a revolutionary shrine as that at which she and others of her kind were executed during those memorable days of blood. "However this may be decided, we enter a protest right here against one thing; no young woman should be permitted to take her young man along and make him hold the yarn for her in church while she winds it up in a ball. That would certainly be demoralizing to the preacher, and it would inspire in the minds of girls who had no young men to hold their yarn. We make this point now both in the interest of religious decorum and of feminine friendship and good feeling."

MAY WE KNIT ON SUNDAY?

The problem of Sabbath observance as come up in various forms in England, where it was decided by certain shops that no harm could come from working in the fields on the Lord's day. With us the extreme stage of the question has not been reached, if it is right for women to knit on Sunday for the soldiers, and also whether knitting during church service is proper. An answer is attempted by the Baltimore Sun, speaking highly, and assurance is given that "so far as knitting garments for our soldiers on Sunday is concerned, even the strictest Sabbatarian might safely include it among permissible works of mercy and necessity." The Sun argues the point with seriousness, even if it does permit itself a stroke of humor at the end of its homily, says the Literary Digest.

"The question of knitting in church is, we concede, more debatable. If it is right to fight battles on Sunday, why should it not be right to do helpful and comforting things during church services? It is not inconceivable that a warm stocking would be regarded as a more religious up above than a cold prayer, and that a woolen vest for a soldier of the Lord might be considered in the heavenly court of last resort as more eloquent than many sermons. Nor do we think it could be urged that knitting in church would divert the minds of the congregation from exhortations to piety. Knitting, when properly mastered, becomes largely mechanical and even beginners could still sing the hymns and listen devoutly to the minister. "We acknowledge that knitting is not per se a pious exercise, and that it does not necessarily involve a peaceful frame of mind. The French girls who surrounded the guillotine during the Reign of Terror evidently carried their knitting with them, and rarely missed a stitch even during the most exciting scenes. It would unquestionably be better to knit in church than like Madame Lafarg at such a revolutionary shrine as that at which she and others of her kind were executed during those memorable days of blood. "However this may be decided, we enter a protest right here against one thing; no young woman should be permitted to take her young man along and make him hold the yarn for her in church while she winds it up in a ball. That would certainly be demoralizing to the preacher, and it would inspire in the minds of girls who had no young men to hold their yarn. We make this point now both in the interest of religious decorum and of feminine friendship and good feeling."

TALKING ELECTRIC SIGN OF SIMPLE CONSTRUCTION.

There is a noticeable absence of complicated wiring and expensive mechanism in a "talking" electric sign of considerable flexibility and is described in Popular Mechanics Magazine for November. Outstanding among its features, therefore, is its comparatively low cost of installation and maintenance. Particular advantages are that the style of type can be changed at will, without expense, and that the characters of any language can be reproduced, without making changes in the wiring or mechanism. Designs of various patterns, and even animated cartoons, can likewise be executed with equal facility. As frequent changes of copy as desired are possible, and an office boy is as competent to make them as anyone. When the sign is in use, it does not require the attention of an operator. Details of the mechanism of the sign are given in the article, which is accompanied by excellent illustrations.

SUBMARINE PAINTINGS

Illustrations of exceptional interest are those which accompany the account by R. H. Moulton in the November Popular Mechanics Magazine of the activities of a distinguished American artist who devotes his life to painting pictures under water. The artist holds that it is impossible to catch the colors and what may be called the atmosphere of submarine scenery by any method of observation from the surface. He goes down to the bottom of the ocean wearing water-tight goggles, similar to those worn by the famous pearl divers of the South Seas. These goggles are merely bits of cowhorn cut and shaped to fit the eyes. They allow a small space of air between the eyes and the water, so that one can see perfectly. He uses a weight to carry him to the bottom, where he makes sketches on a specially prepared waterproof paper with waterproof crayons. The paper is first rubbed with coconut oil and stretched on a piece of glass with surgeon's tape. After several days, each for about a minute or so, he gets his pictures outlined and then completes them in his studio.

The Employer's Course

The Proclamation issued under the Military Service Act calls Class One men—bachelors and widowers without children (not otherwise excepted) who were 20 years old on the 13th Oct., 1917, and whose 34th birthday did not occur before Jan. 1st, 1917.

The claim for exemption may be made by the man himself, by his employer or by a near relative. So far as practicable, not more than one claim should be made in respect of any man. For reasons stated in the next paragraph, the claim is often best made by the employer.

When Employer Should Make Claim for Exemption Where claim for exemption is based on the assumption that it is in the national interest that the man should instead of being employed in Military Service, be engaged in other work in which he is habitually engaged, it is usually preferable that the claim be made by the EMPLOYER, inasmuch as the decision of the claim will involve, amongst other things, a consideration of the nature of the business, the number of men employed, etc.

Medical Examination It will simplify the employer's problem if all Class One men in his employ present themselves for Medical Examination at the nearest Medical Board Centre. Upon examination they will be placed in Medical Categories—A, B, C, or E. Class One men placed in Categories B, C, or E satisfy immediate requirements if they attach the medical report they will receive to their claim for exemption.

The Employer's Statement Total number of employees, grouping them according to their respective occupations and qualifications, and stating the number in each group. Indicate the possibility or otherwise of replacing the labor of Class One men with the labor of those not in the statutory class called up, or of women; also the extent to which the withdrawal of men in the statutory class would affect the business, the reason for considering that the carrying on of the business is in the national interest, and such other facts and circumstances as may appear to be relevant.

The Employer's Schedule This should state the names, ages and occupations of all Class One men employed, noting against each name whether or not claim for exemption is being made, and whether in the employer's opinion, understood by people of all languages, it is being used to carry a message of inspiration and reassurance from this country to Russia's millions, many of whom are illiterate. A scenario has been prepared and produced and 50 copies of the picture, with all captions in Russian, have been dispatched to Russia. The film aims to show the Muscovites that they have been misled in so far as they feel that the United States is not in earnest in this war. The scenes depict the experience of a typical Russian peasant who comes to this country to see for himself its resources and to ascertain its purposes. Motion picture theatres are scattered all through Russia, many of them in small villages and at the front. It is proposed to show these pictures in every amusement center within the next few months.

Forms for Exemption These forms may be obtained on request from any Postmaster who will transmit the forms, when filled in, to the Registrar.

Issued by the Military Service Council.

MOVIES SENT TO RUSSIA TO HELP WIN THE WAR

Motion pictures are to be used on a vast scale in Russia in a campaign which the writer in the November issue of Popular Mechanics Magazine believes will greatly aid the Allies' cause. Because filmed drama can be understood by people of all languages it is being used to carry a message of inspiration and reassurance from this country to Russia's millions, many of whom are illiterate. A scenario has been prepared and produced and 50 copies of the picture, with all captions in Russian, have been dispatched to Russia. The film aims to show the Muscovites that they have been misled in so far as they feel that the United States is not in earnest in this war. The scenes depict the experience of a typical Russian peasant who comes to this country to see for himself its resources and to ascertain its purposes. Motion picture theatres are scattered all through Russia, many of them in small villages and at the front. It is proposed to show these pictures in every amusement center within the next few months.

DIAMONDS OF LUSITANIA FOUND.

When the Lusitania was torpedoed by a German submarine of the coast of Ireland, with the loss of 1,100 lives, it carried with it among other rich freight, a consignment of diamonds in transit from New York to London, upon which the Union Insurance Company, of Bangor, Maine, carried a risk of \$13,000. The company promptly paid the claim and entered the \$13,000 in its loss account. But, it now appears, long after the great disaster, the insurance company received a London draft for the full amount of its risk, with the information that the diamonds had been recovered. An Irish fisherman, upon hauling his trawls, found that he had hooked the most valuable fish of his career—a small package which bore plainly enough the address of a firm of London jewellers, and which upon examination, was found to contain diamonds—the gems upon which the Bangor Insurance Company, among others, carried risks. The fisherman got his due amount of salvage and returned the insurance money. The puzzle is: Having presumably been locked in the purser's safe, how did the diamond package get loose so that it came up on the fisherman's trawl?

ASKING TOO MUCH.

Mrs. Finneky (entering the kitchen with newspaper)—Norah, a celebrated doctor says that brooms are full of microbes, so hereafter you'll have to give your broom an antiseptic bath every day. Norah—Shure, O'ill not! Next thing ye'll be askin' me to give it massage treatments and hippydermic injections, an O'ill no trained nurse.

The Royal Mails Will Carry Your Multigraph Message

It is such a simple matter to extend your clientele of customers and your acquaintances, by letter. A personal message will sink deep and bear fruit.

A letter printed the Multigraph Way has all the ear-marks of a personal letter. It rings true and clear. It strikes straight at the target. It grips—it holds—it sells.

You can talk to your customer as you would if he were right in your office or store. You can present facts and figures in logical order.

When you stop to consider the hundreds and thousands at your service in the various branches of the Post Office Department, you will just begin to realize the golden opportunities that unfold to you through our Modern Multigraph Service.

The style of Circular, Letter, Form or other piece of printed matter you require makes little difference. We can offer you a wide choice of color and you will be agreeably surprised at our consistently low prices.

Call or write, and let us tell you more about our Multigraph Services, prices, etc.

Guardian Pub., Co Charlottetown

YOU CAN'T FIND ANY DANDRUFF, AND HAIR STOP COMING OUT

Save your hair! Make it thick, wavy, glossy and beautiful at once

Try as you will, after an application of Danderine, you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of the hair health.

Get a small bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment. A small trial bottle will double the beauty of your hair.
