THERMOGENE

CURATIVE WADDING

(Vandenbroeck's Process)

Is potential heat in dry, convenient form. The moment it is applied, chemical action turns this into active energy—a soothing, comforting warmth that goes straight to the source of the pain—gives instant relief—and continues its good work till a cure is complete.

It's a wonderful advance over the old-fashioned, messy, uncomfortable poultice or plaster. Ready as it comes from the box—full directions enclosed. Used by British Red Cross, Royal Navy, Army and Hospitals.

At All Druggists—50 Cents per Box

Invented by Vandenbroeck, the famous Belgian Chemist, British-made by the Thermogene Co., Ltd., Hayward's Heath, England.
