Dealers: Order From R. T. HOLMAN LTD. Provincial Distributors

Western Locals

This column is reserved for news of local interest but advertising of a purely nature may be inserted if it is a word strictly payable in advance.

SPRING will be here in a few days. Book your orders for supplies now. At Brace's. L-5373-4-1-21.

MALT WITH COD LIVER OIL. Jar for \$1.25. Taylor Drug Co., Kensington. 3-21-17.

FEED R-M. STANDARD FEEDS for at least three months to give the 1933 pups a right start. Obtainable from your local dealer or from Brace's. L-5566-3-30-21.

"DOC" MacPHERSON SAYS—When asked how he sold so many suits. The satisfied customers sell them for me. They are a man's booster. L-5581-3-30-31

Mr. George Callbeck of the Canadian National Silver Fox Breeders Association left this morning for Ottawa on business. Mr. George MacCallum leaves on Tuesday morning for the capital. L-5581-3-30-31

FINED \$10 AND COSTS—Two offenders against the Prohibition Act came before Mr. G. M. Matthews on Friday for the illegal consumption of liquor. They were fined ten dollars and costs each. One was from Carleton and the other was arrested on the train at Emerald. L-5581-3-30-31

AUCTION FORTY-FIVES—Two games were run off last week by Summerside competitors in the Prince County auction. Forty-five tournaments which is now in progress in different parts of the County. Prizes were won by H. T. Holman, W. Arthur Allen, Preston Noonan and E. P. Foley. S.

BREAKS WRIST—Mrs. T. H. Inman, who was assisting in the entertainment in Epworth Hall on Friday evening, fell as she was moving the stage and the misfortune to break her wrist. Mrs. Inman was taken to the Prince County Hospital where the fracture was set. She is now resting comfortably. L-5581-3-30-31

WORK COMMENCED ON QUEEN'S WHARF—About one hundred men have been given work when the repairs to Queen's Wharf were resumed last week. This work was made possible by the grant obtained from the government last fall for unemployment, but had to be discontinued when winter set in. S.

Mr. David Schurman of Reading, Mass., Saturday celebrated his 89th year. Mr. Schurman is a native of Bedouque, Prince Edward Island, but for some years past has been living in Reading with his son, Mr. Vernon Schurman. It is pleasing to know that he is enjoying the very best of health and continues to take a deep interest in the affairs of his native province. L-5581-3-30-31

FARM PRODUCE MOVING—Considerable activity was in evidence at Summerside on Saturday as a large number of farmers hauling in potatoes. Stealing was reported fairly good, but travelling across the harbour rather heavy. R. T. Holman's Ltd. are paying ten cents per bushel for potatoes and have been taking in large quantities for some days. They are paying 12 cents, 14 cents and 16 cents for eggs. Other produce is fetching a better price. Wheat 75 cents a bushel, barley for seed 65 cents and feed barley 55 cents. Seed oats are 40 cents and feed oats 40 cents. Buckwheat is 40 cents per bushel. Hay is \$14.00 a ton and straw \$6.00 a ton. There is no market for pork at the present time. S.

SCOUT CAMPAIGN VERY SUCCESSFUL—A largely attended meeting of the Summerside Scout Council held on Friday evening, Mayor Lidstone expressed his grateful appreciation of the generous response which had been made by the citizens of Summerside to the Campaign for funds for the Boy Scout movement in Canada. \$749.50 had been collected to date and there were

Entertainment Proves Huge Success

Miss Sue Meadows and her assistants, Mrs. George Sheen and Mr. Kirk Coburn are to be congratulated on the success of their entertainment on Friday evening in Epworth Hall.

The three act play, "Marrying Anne," performed before a capacity house was full of thrills and delightful comedy. Calvin Bowness playing a leading role as "Mr. Oldays," Miss Vi Richardson as "Anne," a very modern young lady, and Miss Sue Meadows, as "Aunt Rosie," a mid-Victorian old maid, all played their parts to perfection. The plot consisted of Mr. Oldays trying to marry his step-granddaughter, Anne to the first young man who happened to come along, but Anne was determined to do her own choosing and married Bob Oldays, who had been sent away in disgrace. Anne succeeded in rejuvenating Aunt Rosie who became the bride of her old flame, Jim.

The play was well staged and each performer received congratulations on the presentation of their parts.

An opening chorus number and specialties between the acts made the entertainment more enjoyable.

Miss Blanche Yeo, R. N., who has been on a visit to her parents, Mr. and Mrs. Westley Yeo of North St. Eleanors, has returned to her work in Boston, Mass.—S

Mr. Adolph O. Gallant of Abrams Village has entered the Prince County Hospital for treatment.—S

Mr. H. G. Muttart left on Saturday morning on a business trip to Montreal.—S

Mr. and Mrs. Thomas Noonan of Richmond left last week for Montreal where Mrs. Noonan will enter the Montreal General Hospital for treatment.—S

Her many friends will regret to learn of the illness of Mrs. Carl Delaney at her home in Summerside.—S

Friends will be pleased to learn that Mrs. Ella Haacker is making good progress from her recent operation in the Prince County Hospital.—S

Legion Holds Business Meeting

An adjourned meeting of the Summerside Branch of the Canadian Legion was held last week in the Armories with the president, Major Travers in the chair. Twenty members were present.

A report was submitted showing that there was a deficit of \$24.00 from the Remembrance Day dinner. This was made up by members of the executive without touching the regular funds of the Branch.

Members were asked to pay their dues and a subscription list was opened to make a further contribution to headquarters activities.

The request of the Women's Auxiliary to hold a bridge under the auspices of the Legion to assist with the King's Jubilee Cancer Fund met with the hearty support of all present.

The unemployment of ex-service men was under discussion.

Mr. B. W. Robinson submitted details of the Vimy excursion which are available to date. Some of the conditions and the cost of fare it was stated were not entirely to the satisfaction of the Dominion president. The price of \$100 for the round trip was not considered low enough to be of benefit, only to a very few, and that it would have to be considerably reduced if it is to be of use to ex-service men.

A motion was passed to entertain the newly organized Ladies Auxiliary at an early date.—S

Baby Weighs 22 Pounds

(C. P. By Guardian's Special Wire) NEW YORK, March 31.—A baby boy weighing 22 pounds has been born to Mrs. Charles Steinmann of the Bronx.

The infant is one-sixth the weight of his mother and tips the scales at twice the weight of all Dionne quintuplets at birth.

2 lessons monthly—1, Doris Noonan; 2, Erna Gaudet.

CHANGE YOUR HAIR STYLE AND ENJOY THE RESULT

Right now is a splendid time to change your coiffure. A new one will help to brighten up your outlook these late winter days and, if you decide on it, immediately, you'll have a change to get used to it before the Easter holidays.

Dread the feeling of strangeness probably is the main reason that woman go on wearing their hair the same way, year after year. The old style is comfortable and they hate to wear something so different that they feel self-conscious themselves. Obviously, then, the gradual change is best.

Instead of trying something startling right away, make up your mind what kind of hair dress you eventually want to wear and then begin to create it bit by bit. One who wants a Grecian type with curls piled high on the head, might have the hairdresser put her hair behind her ears the first week, sweep it back from the forehead the second, place the curls fairly high on the back of the head on the third visit and finally, during the fourth appointment, arrange a perfect Grecian coiffure.

A girl who always has worn curls and ringlets generally faces the idea of a straight hair dress with a good deal of fear. She'd have less to worry about if she would substitute wide, loose waves for the tight ones for several weeks. Afterwards, she can omit waves entirely without feeling half-dressed.

For evening, these rules don't apply. When you are in formal clothes, you usually feel pretty different anyway and a new and exotic coiffure certainly won't make you wonder why on earth you changed. On the contrary, the fact that you look quite unlike your everyday self will give you added confidence.

radiator or in the sun. Excessive temperature, whether of heat or cold, are very, bad for woollens.

9. When dry, pin marks may be removed by pressing with a damp cloth and a moderate iron.

This is really all you should know about washing woollens and other woollens. If you follow these directions, and use a pure, soft soap, even baby's finest things—or the most colorful sweater, will remain in the required manner and emerge as good as new!

1. Always test new colored woollens in lukewarm water before washing for the first time. If you're washing a hand-made sweater, test the wool you made it from if not, test an inconspicuous bit of the garment such as the end of the belt.

2. Before washing lay sweater, or any other knitted garment on a piece of fairly stiff paper—and draw a pencil outline. This is unquestionably the best guide for reshaping sweater while drying. If this is not practicable, measure the garment carefully—nothing sleeve lengths, width and depth.

3. Use lukewarm water.

4. Woollens use up a lot of suds. Don't hesitate to make more if needed.

5. Woollens must never be rubbed—they will tend to mat. Just turn the garment inside out and squeeze suds gently through and through.

6. Rinse thoroughly in three lukewarm or even cool waters.

7. After rinsing roll woollens in a dry Turkish towel. Remove excess moisture by gentle kneading.

8. Place your outline on a firm surface (a rug or carpet serves very well) and carefully ease your garment back to its original measurements, pinning it firmly to the outline.

Never hang knitted woollens on a line, they quickly pull out of shape. And never allow them to dry on a

LITTLE CHANGE IN STOCKS ON MT'L. MARKET

(C. P. By Guardian's Special Wire) MONTREAL, March 31.—Interest was at its lowest point in weeks during Saturday's short weekend session of the Montreal Stock Exchange and only a few price changes were recorded with no definite trend established.

Power stocks continued weak as traders awaited the expected announcement by Premier Mitchell Hepburn of the policy he will pursue with regard to the contracts of Quebec Utility companies with the Ontario Hydro Commission. Premier Hepburn's statement he would not make known his policy Saturday as expected further added to the uncertainty.

Among the leaders, Brazilian lost 1-4 at 9 and Hollinger 10 cents at 16.55 while International Nickel was up 1-8 at 24-1/4. Canadian Foreign Investments preferred rose 2 points at 105, Bruck Silk 1-4 at 16 and

EYE BEAUTY

Fine lines and wrinkles around them and small puffs underneath mar the beauty of any woman's eyes. They need special attention—these features that poets call the mirrors of the soul—and they ought to have it regularly, beginning with a girl's twenty-fifth birthday.

With gentle circular motions, smooth rich tissue cream or a preparation made especially for the purpose around your eyes each night before you go to bed. Leave it on all night. In addition, use an eye-cup to wash your eyes at least twice a day.

Lotions will remove dust and dirt and leave your eyes bright and sparkling. Or if you prefer, mix your own weak solution of boracic acid and warm water.

Puffs are large, dark circles may be due to lack of sleep or to some physical ailment. If you have them occasionally, try to get a few more hours rest each night. If they are chronic, better see a doctor at once. In the meantime, here's a simple treatment that will tend to reduce the puffs:

First of all, wash both eyes thoroughly. Incidentally, be careful not to press the rim of the eye-cup too hard against your eyes. Now, using clean cotton, make two crescent shaped pads, dip them in cold water, wring dry and saturate with skin tonic. Place the pads directly on the puffy spots, lie down for half an hour and relax, keeping eyes closed. When you get up, pat nourishing cream around the eyes, leave on for five minutes and then remove with soft cleansing tissues.

Canadian Fruit And Vegetable Products

Representing a corresponding increase in the demand for Canadian canned fruits and vegetables, the volume of fruit and vegetable preparations produced in the Dominion increased about 100 per cent during the period 1923-33. The industry, engaged in the production of preparations from fruits and vegetables includes establishments specializing not only in canning, evaporating, and preserving these products but also in manufacturing vinegar, cider, pickles, catsup, sauces and other commodities of that kind. The most important branch of the industry is the canning of fruits and vegetables which is carried on most extensively in Ontario, British Columbia, and Quebec where the climatic conditions for the growing of fruits and vegetables are favourable.

The principal fruits canned in Ontario are apples, pears, plums, peaches, cherries, currants, gooseberries, blueberries, raspberries and strawberries. In addition, British Columbia has the apricot and the loganberry. The vegetables canned include tomatoes, peas, corn, beans, beets, carrots, pumpkins, squash, spinach, and asparagus. The canning season begins in June and continues until October and is at its height in July, August, and Sept-

147,142 View Playdowns To Date

(C. P. By Guardian's Special Wire) TORONTO, March 31.—Ten Stanley Cup playdown and National League title games have attracted approximately 147,142 hockey fans at Boston, New York, Toronto and Montreal in eight days.

Montreal Maroons and Chicago Black Hawks played to the largest crowd, 17,680 who saw their contest last Tuesday. Here are the unofficial figures:

Boston-Toronto (four games) 63,462.
Montreal-Chicago (two games) 27,680.
Canadian-Rangers (two games) 29,900.
Maroons-Rangers (two games) 27,000.

Notes on Some New Vegetable Varieties

Each year a large number of new vegetable varieties are offered for sale. A few of these are distinct improvements over older varieties in their class and, as such, are worthy of extensive trial. Many of the newer introductions are tested at the Charlottetown Experimental Station within a short time after they appear. Among these is the new tomato "Abel." While only of medium size it is equally as early as Alacrité or Herald and produces a much higher percentage of marketable fruit. Pritchard and Break Day tested for the first time in 1934, while of large size and excellent quality, were decidedly slow ripening.

Those who have difficulty in ripening melons outside should try the new early variety, Golden Champlain. This is a remarkably early variety of good quality and ripens each year at Charlottetown, if sown reasonably early.

Golden Ace cabbage is decidedly the earliest variety tested at this Station and is very desirable for that reason.

Banting and Pickaninny are still the two earliest corn varieties under test. Spanish Gold, Sixty Day Golden and Dorinny are very desirable second early varieties and well worthy of trial. Dorinny in particular, while of medium size is of very choice quality.

Gardeners who are looking for a medium sized cucumber of good quality and one that will hold its color and firmness over a long period, should try the variety Early Fortune.

The outstanding varieties of garden peas in the test plots have been Kootenay and Bruce. The latter is particularly valuable as a late variety of 1 1/2 quarts. Alaska, while not by any means a new variety, is still outstanding as an extra early variety. It is not of high quality.

MOSQUITO SUPPRESSION

At the 22nd annual meeting of the New Jersey Extermination Association held at Atlantic City on March 6th, 7th, and 8th, Mr. Arthur Gibson, Dominion Entomologist, delivered an address on the mosquito suppression work in Canada during 1934. The address dealt with the various campaigns in the Dominion in which officers of the Entomological Branch, Dominion Department of Agriculture, was engaged in the extermination of the mosquito.

The development of this industry has affected great changes in the relation of foods to seasons. Canned fruits and vegetables are to be obtained all the year round.

NEW SOLAR SYSTEM FORMED IS BELIEF

(A. P. By Guardian's Special Wire) WASHINGTON, March 31.—A new solar system, with a new "Earth" on which life may sometime develop, may have been formed three months ago when the star Nova Herculis flared into great brilliance.

This earth and solar system may have been formed in the same way, when the sun suddenly perhaps also "flared" to great brilliance millions of years ago. Dr. Gustaf Stromberg of Mount Wilson Observatory, Calif., added in an article published by the Carnegie institution.

Such flare-ups of "stars" are known as "novae" or "new stars." They are not really new stars, but a sudden explosion and tremendous increase in the brightness of an ordinary star that has existed for a long time. Usually such a star eventually dies down again. Nova Herculis is fading after flaring to 100,000 times its normal brightness.

Crossbreeding Of Poultry

(Experimental Farms Note) Breeders have long known that the crossing of two pure breeds gives offspring which are superior to either parent breeds in vigor and economy of growth.

At the Central Experimental Farm, Ottawa, cross was made between Barred Plymouth Rocks and S. C. White Leghorns to see what difference there might be between the crossbreds and purebreds in both meat and egg production.

At eight weeks of age, the crossbred males were a little heavier than the Rocks, and the Rocks a little heavier than the Leghorns. In addition to more rapid growth, the crossbreds were slightly more economical in their use of feed. At sixteen weeks of age, the crossbreds and Rocks averaged around four pounds each, and the Leghorns three pounds and a half. After this age, the Rocks made greater and more economical gains than the crossbreds and considerably more than the Leghorns.

GRASSHOPPERS AND CUTWORMS

An edition of 5,000 map-posters in regard to the grasshopper situation in the province of Saskatchewan has just been issued and distributed by the Entomological Branch of the Dominion Department of Agriculture as part of the co-operation with the province of Saskatchewan in the grasshopper control campaign for 1935. The poster presents a map in colours forecasting the distribution of the probable grasshopper outbreak in three categories and also indicates the areas likely to be involved in an outbreak of pale western cutworm. The map is supplemented by text outlining the general grasshopper control practices to be followed throughout the province. The combined map and poster should be of the utmost value in dealing with the impending outbreak. The poster will be distributed chiefly through the office of the Field Crops Commissioner of the Department of Agriculture, of Saskatchewan, and in addition to being on view at all municipal offices and centres of agricultural assembly will be displayed in railway stations and post offices throughout the infested part of the province.

Pope To Deliver Allocation Today

(A. P. By Guardian's Special Wire) VATICAN CITY, March 31.—At a secret consistory, or meeting of the College of Cardinals, Pope Pius tomorrow is expected to deliver an allocation, or address, on the world situation.

The consistory will approve two canonicals and confirm appointments of the camerlengo and of archbishops and bishops.

The canonicals are of Blessed Thomas More, Chancellor of England under King Henry VIII, and Bishop John Fisher, of Rochester, England, who lost their heads because they opposed Henry's divorce of Catherine Howard and marriage with Anne Boleyn.

Notes on Some New Vegetable Varieties

Each year a large number of new vegetable varieties are offered for sale. A few of these are distinct improvements over older varieties in their class and, as such, are worthy of extensive trial. Many of the newer introductions are tested at the Charlottetown Experimental Station within a short time after they appear. Among these is the new tomato "Abel."
