

The Right drugs combined in the right way.

To properly compound prescriptions these days an adequate stock of drugs is required and knowledge of how to use them is also necessary.

Now remedies are multiplying and all advance in this direction creates new problems for the pharmacist.

We have all the drugs and medicines for which there is any demand in this locality. Any prescriptions brought here are compounded by a graduate pharmacist in a most scientific manner and at the most reasonable prices.

RECIPROCITY FOR PRODUCERS AND CONSUMERS.

Canada has long enjoyed a free market for all her products in the British Isles. By a consensus of opinion in both parties this is a good thing for Canada. All would feel that it would be a bad thing for us if Britain were to suddenly change her trade policy and impose duties upon what we have to sell.

France, Germany and other European countries impose heavy duties on our products when sent to their markets. Would it not be regarded with satisfaction if one or all of the countries of Europe would decide to admit our products free of duty?

And according to this view of the case it ought to be a doubly good thing to have free access for our natural products to the market of the United States. In the first place it is a market close at hand.

So far there is a pretty general agreement. We would gladly have the markets of the United States and of all the world open to us for the sale of our products there free of duty.

It is urged that American farmers produce grain, potatoes and vegetables, dairy products, horses, cattle, sheep and swine, just as our farmers do, and will send their products into Canada to the disadvantage of our farmers in our home market.

gard, speaking generally? Both the Canadian farmer and the American farmer have been all along selling their surplus products side by side in the English market and the Canadian farmer has held his own there against America and the world.

Times change, have changed. The time was when Canadian farmers went to the States to farm there. Now American farmers are coming to Canada in thousands and tens of thousands to farm on this side of the line.

But the consumer has some rights as well as the producer. Something like one-fourth of the people of Canada live in cities and towns and have all their food-stuffs to buy. Mostly they are supplied from Canadian farms.

Reciprocity by establishing an approximate level of prices in the two countries ought to benefit both the producer and the consumer. The farmer will benefit by having a larger market, a steadier market, and a greater choice of markets in which to dispose of his surplus.

Think of all the resolutions of our Board of Trade, of the Legislature, of the Maritime Board of Trade on the subject of transportation to and from the mainland. Think of the delegates sent to Ottawa on this subject.

The Ideal Policy

enables Policy holders to reap the benefits of their investments during their own life time, and in event of premature death to leave their legal representative in possession of a comfortable home, free from Mortgage, Debt or Encumbrance.

ter his attention. Between the ninety million market and Prince Edward Island all the year round stands the three short haul rate and our winter isolation for five months of the year.

Sir Wilfrid Laurier told the people at St. Eustache, Quebec, the other day that his Government is comparable to the Kingdom of Heaven, and invited them to "ask and they should receive."

All honor to the Government for giving us the Earl Grey for a winter boat, although Pictou claims to own and man it. It's a good winter steamer, cost a half million, or say a quarter million more than the Stanley which was taken away.

DEAFNESS CANNOT BE CURED by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by restoring the inflamed mucous lining of the Eustachian Tube.

CUT THIS OUT AND PASTE IT UP. It is surprising the large number of people in this city who, when they want to inquire about their Morning Daily Guardian, or subscription, ask Central for the News Phone No. 133.

The necessary information about either the advertising or subscriptions, nor the advertising staff about subscriptions or news, nor the subscription staff about advertising or news. In other words the clerks know and can do but their work in their own departments, and if it were otherwise they would be continually running from one department to another, upstairs and down, mixing work, wearing themselves out and causing the greatest possible confusion.

The Union Commercial College

re-opens on Monday Aug 28th in the new Royal Bank Building ask for prospectus.

Wm. Moran Principal.

Improved transportation elsewhere in the Dominion. If we don't ask we will not receive. Prince Edward Island must wake up and fight for her hand.

Department of the Navy

A COMPETITIVE examination will be held in 1912, subject to the exact conditions for the entry of Naval Cadets for the Naval Service of Canada; there will be 50 vacancies.

As The Examiner says: "The farmers themselves know better than anybody else about the changes there have been in prices since that time."

Duty Swept Away Where the Prince Edward Island Farmer Gains

Farmers, market gardeners and horticulturists in particular, will do well to keep in mind the figures of the following tables. They exhibit the changes made in the United States tariff on a large number of natural products:

Table with 3 columns: Articles, Present Tariff, Under Reciprocity. Rows include Horses valued at \$150 or less per head, Horses valued at over \$150, Lambs under one year, Sheep over one year, Poultry, alive, Poultry, dead, Oats, per bushel, Barley, per bushel, Potatoes, per bushel, Turnips, Cabbage, each, All other vegetables in their natural state, Blackberries, raspberries, gooseberries and strawberries 1c per quart, Butter, Cheese, Fresh Milk, Fresh cream, Eggs, Honey, Garden and field seeds, Grass seed, including timothy and clover seed, Hay, per ton, Straw, per ton.

This great sweeping away of duties by the United States, if accepted by the people of Canada, as it surely will be, will mean hundreds of thousands of dollars to the producers of Prince Edward Island.
