McNeill of Winsloe for the past three months left last Monday on return to MacGregor, Man., to join her husband who is manager of the Imperial Bank of that town. She was accompanied by her niece Miss Florence Weeks of Highfield who has gone to spend the winter.

The Quick Way to Stop a Cough

This home-made syrup does the work in a hurry. Easily prepared, and saves about $2.

You might be surprised to know that the best thing you can use for a severe cough, is a remedy which is easily prepared at home in just a few moments. It's cheap, but for prompt results it beats anything else you ever tried. Usually stops the ordinary cough or chest cold in 24 hours. Tastes pleasant, too—children like it—and it is pure and good.

Pour 2½ ounces of Pinex (50 cents worth) in a 16-oz. bottle; then fill it up with plain granulated sugar syrup. Or use clarified molasses, honey, or corn syrup, instead of sugar syrup, if desired. Thus you make 16 ounces—a family supply—but costing no more than a small bottle of ready-made cough syrup.

And as a cough medicine, there is really nothing better to be had at any price. It goes right to the spot and gives quick, lasting relief. It promptly heals the inflamed membranes that line the throat and air passages, stops the annoying throat tickle, loosens the phlegm, and soon your cough stops entirely. Splendid for bronchitis, croup, hoarseness and bronchial asthma.

Pinex is a highly concentrated compound of Norway pine extract, famous for healing the membranes.

To avoid disappointment ask your druggist for "2½ ounces of Pinex" with directions and don't accept anything else. Guaranteed to give absolute satisfaction or money refunded. The Pinex Co., Toronto, Ont.

::No one need endure the agony of corns with Holloway's Corn Cure at hand to remove them.

Silence is anything but golden to the poor girl who is dumb to the enteaties of a weathy suitor.

REDDIN BROS

AFTER SUFFERING A WHOLE YEAR

MRS. KING WAS MADE WELL BY LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Iola, Kansas.—"I was a constant sufferer from female trouble for about a year. I had pains in back and stomach, in fact all over me, and was run down. A friend of mine was cured of the same trouble by Lydia E. Pinkham's Vegetable Compound. I took it and it gave me health and strength and made a new woman of me. I cannot praise your Vegetable Compound too highly, and you may publish my testimonials as it may be the means of helping some other suffering woman."—Mrs. IRENE KING, 105 West Campbell Street, Iola, Kansas.

The great number of unsolicited testimonials on file at the Pinkham Laboratory, many of which are from time to time published by permission, are proof of the value of Lydia E. Pinkham's Vegetable Compound in the treatment of female ills.

Every ailing woman in the United States is cordially invited to write to the Lydia E. Pinkham Medicine Co., (confidential), Lynn, Mass., for special advice. It is free, ready to bring you health and may save your life.

MARKETING SUNSHINE

PLEA FOR GREATER BUTTER PRODUCTION

BY HON. W. M. LEA

At the price now being paid for creamery butter, it is to be regretted that we are not in a position in this province to produce a greater quantity of this valuable article. High as prices for raw products of the farm may be, the sale of these lessens our soil fertility to such an extent that we must either purchase expensive commercial fertilizers or be so situated as to be able to use natural occurring fertilizer, otherwise we reduce the earning capacity of our farms by such sale; but the more butter we produce the more fertility we add to our soil, when we sell butter fat off our farms we are marketing "Sunshine" alone, and for this reason the money received for this product is better money than from the sale of any class of raw products. However, even at present prices we can feed our crops at a profit to the right class of dairy cows. We must bear in mind the fact that the butter and other live stock products of the world are not manufactured at a loss by the countries specializing in their products. Not only do they feed practically all their home grown crops, but import largely of foreign mill feeds as well, but our dairy cows can produce butter from grass alone and from the heaviest producing forage crops grown on the farms, crops which yield the greatest quantity or tonnage per acre, such as the different varieties of roots grown and the green feeds that may be sown over longer period and give us more time in which to plant a large acreage and a guarantee against crop failures possible to our grain and hay crops, and while it is possible to feed our grain or other crops for butter with profit at present prices of each, we must have the right kind of dairy cows, suitable housing, and have a knowledge of a proper balanced ration to secure the best returns as it is easily possible for us to waste feed if any of the above conditions are lacking, but we may easily learn by experience to be economical and efficient feeders and by proper selection and breeding secure a paying herd of grade cows, which will average from six to ten thousand lbs. milk per year. We have quite a number of herds in the best dairy districts giving that quantity and earning upwards of $200.00 per cow at our creameries and cheese factories. They are patrons of the creameries that manufacture the year around and hold their best customers by continuous yearly supply of the highest quality of butter, which usually commands 10 cents per lb. over the home made product. Not only do home makers lose at least this sum of money, but besides the work entailed in home manufacture, there is a loss in overrun as we know that the best quality of butter may contain 10 per cent moisture when this is worth 70 cents a lb. the skilled creamery makers see that they incorporate the full amount allowed them by law, and qualified as all home dairy makers believe themselves to be, the inspectors rarely find dairy butter containing over 5 per cent or at least 10 per cent moisture, and much of this in a loose state leeching from the butter; there is a lot of unnecessary labor and loss in home dairying and no country can hope to develop the industry by any such disorganization. The time is long past for individual effort in manufacture or sale of any farm product capable of being handled on a co-operative basis, and we must all endeavor to cultivate that unselfish spirit that aims for the most good to the greatest number, continually keeping in mind the truth, the withdrawal of our support may weaken the effort for the betterment of any form of co-operative effort, and it is only the most selfish and unpatriotic that will withhold their support from a creamery until they see if it will prove a failure or success. [We should all support it to the best of our ability and guarantee its success.

The men who are the most successful farmers are those who add the greatest amount of fertility to their farms during their tenancy and pass them on to those who may follow producing more each year. The amount of wealth produced in our province depends principally on the fertility of our farms. The amount of fertility applied depends on the quantity and quality of feeds consumed on our farms, and the man who produces wealth from the production and sale of animals and their products at the same time creates wealth of soil and a more productive province from year to year is a producer and a builder. The man who sells raw products without returning fertility of some nature to make up the deficiency caused by their growth is a destroyer of soil fertility and of provincial wealth. All things are possible with fertile land, we can hardly pay too much for a rich fertile farm, nor too little for a poor run out one. Our success as farmers and our development as a prosperous progressive province will largely depend on the system of farming we follow whether we are adding to or reducing the earning capacity of our farms. No ambitious farmer should be satisfied to even hold the farm after cultivating at any given state of fertility when it is easily possible to increase its earning power from year to year by a judicious system of live stock farming.

IT WAS JUST RIGHT

The city editor of one of the Toronto papers received a bottle of whiskey from a friend for the holidays. He could not use the liquor, as he detected a strong odor of ether in the bottle. He gave the liquor to the janitor. The next morning he asked the man how he liked the liquor. "Just right," was the answer. "It was just exactly right. If it had been any better you wouldn't have give it to me and if it had been any worse I could not have drunk it."

Why does nearly all the milk of human kindness taste of the can?

AFRAID TO EAT MEALS

"Pape's Diapepsin" is the best Antacid and Stomach Regulator known.

When your meals don't fit and you feel uncomfortable when you belch gases, acids or raise sour, undigested food. When you feel lumps of indigestion pain, heartburn or headache from acidity, just eat a tablet of harmless and reliable Pape's diapepsin and the stomach distress is gone.

Millions of people know the magic of Pape's Diapepsin as an antacid. They know that most indigestion and disordered stomach are from acidity. The relief comes quickly, no disappointment! Pape's Diapepsin helps regulate your stomach so you can eat favorite foods without fear and a box of these world famous stomach tablets cost so little at drug stores.

Presentation to Miss Katie Stanley

On the eve of Miss Katie Stanley's resignation as organist and choir conductor in the Methodist Church, the choir last Sunday morning, presented her with an address and gift, in token of their esteem and appreciation of her services.

Miss Stanley had been organist and choir leader of Grace Methodist choir for a period of five years, prior to the Union, and since that time, has most capably performed the arduous duties of the same position in the united churches. The address from the choir expressed the sincere regret felt by all at the severance of the pleasant and harmonious relations which have always existed between choir and organist, and appreciation of her spendid ability as a musician, concluded by extending best wishes for continual success in the years to come.

Miss Stanley replied, thanking the choir for their kindness and expressing her regret at severing her pleasant relations with them.

HOLSTEIN NEWS

The pure bred cow Johanna Toilitta of Pownal, owned by Mr. H. J. Kennedy of Clearview Farm, Southport, has just finished a seven day R. O. M. official test having to her credit 513½ lbs of milk making 24.38 lbs of butter. This we believe is the highest seven day record for an Island bred cow of any breed and we congratulate Mr. Kennedy her owner and Mr. J. L. Jones, Pownal her breeder on this high distinction. Messrs W. E. Callum, Southport, and J. Walter Jones, Bunbury Farm are each proud owners of calves from this famous cow.

Mr. C. E. MacKenzie, Milton, has made two additions to his herd of pure breed Holsteins recently, one Birchlea Belle a nice straight heifer sired by Sir Mercena Van Voran, whose dam Whellemina Van Vorm has a R. O. M. record of 440.5 and 17.63 of butter purchased from Mr. W. L. MacEachern, Mermaid.

The other is Maria Rooker Komdyke a promising daughter of Sir Fairview Komdyke and Molly Rooker, this heifer is a large well shaped animal and if we mistake not will be heard from in the showring she was bred by H. J. Kennedy, Southport. We congratulate Mr. MacKenzie on his purchases.

CLOVER PAYS ITS WAY

Even with seed selling at $25 a bushel, clover is a profitable crop to grow. At the ordinary rate of seeding less than $4 will buy enough seed for an acre. In case a stnd of clover is obtained the crop and the increase which clover growing makes in succeding grain crops will more than pay for the seed.

Neglecting to properly aduit the books has landed many a promising co-operative concern on the rocks.

The point where comfort is reached is the end of the road to many a promising young man and woman.

Co-operation not founded upon honesty falls into ruin through mutual talevery.

Laugh a little less at your neighbor's troubles and a little more at your own.

ALBERRY PLAINS SCHOOL

The semi-annual examination of Alberry Plains School took place in the afternoon of December 24th. The school room was most artistically decorated and a large number of visitors were present.

The pupils were carefully examined by three of the visiting ladies assisted by the teachers Laura Brothers, and by their ready answers and keen attention showed that they had been carefully instructed.

A much appreciated programme was then carried out during which the teachers treated the children and visitors with candy. A pleasing part of the programme was the reading of an address to the teacher and presenting her with a very beautiful gift. Miss Brothers then thanked her pupils in a few well chosen words for their thoughtfulness and generosity. Another interesting feature was the distribution of prizes for efficiency in each grade by the teacher. [Winner of prize in Grade VII Gordon McMillan. Winner of prize in Grade VI Wilfred Hynes. Winner of prize in Grade V Norman McMillan.

The following is the programme: Opening Chorus, Merry Xmas Bells Recitation by May McEachern; Recitation by Charles Richards; Dialogue, (Too Greedy by Half) by 3 boys; Recitation by Annie Richards; Recitation by Mary Coady; Recitation by Elizabeth McMillan; Chorus, (Happy New Year) by the school; Closing recitation by Norman McMillan; Distribution of prizes. After remarks from the gentlemen present in which they expressed themselves as being well pleased with the work done, a very pleasant afternoon was brought to a close by the singing of the National Anthem.

At The STRAND

Night 7 and 8.45

ADOLPH ZUKOR PRESENTS

The Famous Beauty and Operatic Star

LINA CAVALIERI

—IN—

A Woman of Impulse

It Wasn't That She Didn't Love Her Husband!

LINA CAVALIERI in "A Woman of Impulse" A Paramount Picture

Lina Cavalieri plays the part in this great picture of a daughter of Eve whose beauty was far too great for the safety of her own heart or the men she encountered.

It wasn't that she did not love her husband, but simply that she drew other men to her almost unconsciously as the candle-flame does the poor doomed moth. And some of the moths were mighty dangerous.

"A Woman's Impulse" will stir you deeply by its likeness to the problems of love as you know them.

THE RELIEF OF POLAND | Bairnsfather's CARTOONS
