Hon. C. H. Cox On
Visit To Halifax

HALIFAX, Aug. 14.—Hon. Charles H. Cox, former Governor of
Massachusetts, arrived in Halifax
yesterday afternoon on the "Blue-
nose" from Yarmouth and will
spend a day or two in the City.
Mr. Cox retired from politics upon
the completion of his term as Govern-
or of the Commonwealth at the
close of the year 1923 and has since
been engaged in private business in Bos-
ton. He is Vice President of the
First National Bank, Boston, one
of the most important financial insti-
tutions in the State.
This is Governor Cox's third visit
to Nova Scotia. He came first in
the summer of 1923 to convey a note-
able and eloquent message at the
historic Hector Celebration in
Halifax when he was accompanied
by Mrs. Cox, his brother, Judge
Cox and other friends and received
memorable receptions at Pictou,
Halifax and other places visited.
He was here again last summer
on a yachting cruise with a
party of friends along the coast.
Governor Cox has shown a very
friendly interest in Nova Scotia, in
his official capacity, and although
he is here now on a business visit,
he will be none the less cordially
welcomed.

Lightning Kills Child

ST. RAPHAEL, Que., Aug. 14.—
Eugene Roy, aged 7, was instantly
killed and his younger sister was
probably fatally struck yesterday
when lightning struck a tree under
which they had taken shelter dur-

Youthful Plumber
Smuggled Aliens

DETROIT August 12.—Eugene
Moynour, 17-year-old plumber, of
Ottawa, and father of a two year
old child is held in the county jail
today in default of \$2,000 bail after
pleading guilty to a charge of
smuggling six aliens into the United
States from Canada. He de-
clared, however, that he was inno-
cent of any wrong intent.

Telling his story to J. Stanley
Hurd, United States Commissioner
Moynour said that the plumbing
business in Ottawa was dull and,
with the added responsibility of the
child a fortnight ago, he came
to Windsor to seek work. He found
there that plumbers were plentiful
and was about to return to Otta-
wa when he chanced to meet a man
who said he could solve all his
troubles.

The man, Moynour said, con-
duced him to a boat well on the river
front and there he found a rowboat
with men in it.
"If you will row these men to the
foot of Dubois street in Det-
roit," said the man "you will find
a taxicab which will take you to a
rooming house and next morning
can go out and find work. There are
lots of good jobs for plumbers in
Detroit."

Moynour took the six men to the
foot of Dubois street, as instructed
but instead of a taxicab he found a
patrol wagon.

His Parents in Ottawa

OTTAWA, Aug. 14.—Eugene
Moynour arrested in Detroit on an
alien-smuggling charge, is the son of
Mr. and Mrs. Eugene Moynour, of
this city. He was married last
year. His parents, stated this morn-
ing that their son found it dif-
ficult to get enough work in Otta-
wa to support his family, and
when the baby was born he left for
Detroit to see if he could obtain
work there.

When Mrs. Moynour was apprais-
ed of her son's arrest, she was hor-
rified. She exclaimed that her boy
had always been well-behaved and
law-abiding and he could not possi-
bly be guilty of any wrong in-
tent.
"He has been victimized," she
said, "by persons older than him-
self."

Mrs. Moynour is getting in touch
with a lawyer to represent Moynour
at his coming trial.

Large Apple Crop

OTTAWA, Aug. 14.—Canada's
commercial apple crop for this
year is now estimated at 2,596,852
barrels or approximately 95 per
cent of 1924. A report issued by
the fruit branch of the Agriculture
Department governing the situa-
tion throughout the Dominion as
on August 1, gives the following
estimated figures for commercial
apple production in the various
Provinces of Canada:
New Brunswick, 51,969 barrels.
Nova Scotia, 1,018,661 barrels.
Quebec, 44,000 barrels.
Ontario, 821,772 barrels.
British Columbia, 1,981,350 boxes.

The estimates for each Province,
with the exception of Ontario,
show a decrease from the 1924
yield.
The change in crop conditions
from indications for an increased
yield to a forecast showing a de-
crease, is caused it is explained, by
the heavy drop experienced in
Nova Scotia and New Brunswick
and a further slight reduction re-
ported from Quebec and British
Columbia. The total commercial ap-
ple crop for British Columbia is
now estimated at 85 per cent, or
1,981,350 boxes compared with the
1924 yield of 2,311,000 boxes. The
Nova Scotia crop is estimated at
1,018,661 barrels which is but 89
per cent of the 1924 crop.

Around The World
In A Life Boat

LONDON, August 14.—To test
the quantity and type of food which
should be placed on a ship's life-
boats, Captain George Hitchens,
two sailors and a wireless operator
are starting from Newlyn, Corn-
wall, today on a trip round the
world in a lifeboat. Hitchens be-
longed to the same company as
Captain Poster, who suffered dire
deprivations in a lifeboat after the
loss of his ship, the Trevesa,
Hitchens and his crew expect to
live three years on hard tack,
chocolate, condensed milk, various
types of canned foods and veg-
etable extracts. The course mapped
out includes 50 ports, among them
the isolated Pitcairn Island and
Tristan Da Cunha, and one long
stretch of 4,600 miles from Tas-
mania to Durban. The lifeboat,
measuring 16 by 10, and is equip-
ped with a 15-horse power internal
combustion engine.

India Refuses Geneva
Peace Protocol

GENEVA, Aug. 14.—In a com-
munication sent to the League of
Nations today the Indian Govern-
ment declared the Geneva peace
protocol will be inimical to India's
interests.
The communication asserts that
India's geographical position would
mark her as a nation upon which
the League under the protocol or-
dinarily would call to apply im-
mediate sanctions against reacler-
rant States in the East. This
would place upon India a burden,
military and financial which the
country would not be able to bear,
the communication adds, and also
would subject the various Indian
religious communities to an un-
warranted strain.

Yukon Prospector
Was Swept
To His Death

SIMPSON, N. W. T., Aug. 14.—
Thomas Simpson, an old Yukon
prospector went to his death a few
days ago in the Hell's Gate Rapids
of the Upper Laird River, which
he had "shot" may times before.
His fifteen year old daughter, who
was travelling with him in their
skin boat, clung to the craft and
was carried thirty miles in the boating
current before she was cast
with the boat into a shore eddy and
crawled to land.
Then, with an old handsaw
which was stuck in the boat, she
improvised a pair of oars and nav-
igated another thirty perilous miles
to Sutherland's Camp. There she
told the story of the boat's capsi-
ng, of struggling to reach her fa-
ther in the angry rapids, of twice
going down before she found to
her horror that by a miracle the
painter of the boat, and then watch-
ing her father sink for the last
time after vainly groping for the
oar she tried to push towards, him
while he slanted to her over and
over again that she must cling to
the boat and let him go.
The Simpsons came from Laird,
in British Columbia, and were on
their way to Sutherland's Camp
just above the fork of the Nelson
and Laird Rivers.

Meighen Declares
Victory Assured

WINNIPEG, August 14.—The
Government is merely grasping at
straws to keep itself going day
by day, Hon. Arthur Meighen, Con-
servative leader declared last night
in an address to a gathering on
the lawn of the residence of Hon.
Robert Ross.
The Conservative leader ex-
pressed confidence in the ability of
the Conservative party to carry a
general election in the fall. He
stated that the east had at least
come to the conclusion that a Con-
servative government was needed,
and that the west, while yet in the
dark, was slowly approaching the
realization.
Premier King, Mr. Meighen de-
clared, had no program to advance
for another session, and a black
situation faced the government.
Mr. Ross expressed the opinion
that the Conservatives were
ready for a concerted attack and
that nothing would please them
better than a general election.

New Class System In
France

PARIS, Aug. 14.—"Psychic
bath" the term applied to a prac-
tice now being adopted in some
French schools for the develop-
ment of powers of self-control in
children. The psychic bath is the
invention of Dr. Philippe Teie, a
noted writer on pedagogical sub-
jects, who for several years has
emphasized the necessity of teach-
ing children control of mind over
matter.
The psychic bath is a classroom
exercise. It consists of giving
children at a given moment the
liberty to run, jump scream
and create as wild a scene as
they please, the teacher urging
them on and participating in the
pandemonium, if necessary. Sudden-
ly, however, the teacher shouts
"Order" or "Halt" and the children
instantly drop into their seats.
Then follows a period of utter im-
mobility and silence. According
to the theory tranquility descends
upon the nerves and spirits like a
cool soothing "shower", when
the exercise receives its name,
"psychic bath."
French pedagogical reviews are
discussing the subject with great
interest, several teachers testify-
ing that the psychic bath has had
extremely beneficial results in
tranquillizing the spirits of unruly
and restive children.

CARELESS GIRLDES
"Oh just throw them around."
That must have been the directions
given by at least one of the Paris
designers when it came to girdles.
She not only has two or three of
them slung loosely on the hips,
but poses one below each elbow on
the peasant sleeves of her crepe
afternoon dresses.

Says Science Cannot
Prove Evolution

LOS ANGELES, Aug. 14.—Scien-
tific dogmatism, as well as the
religious bias, was denounced by
Dr. R. A. Millikan of Chicago, Nobel
prize winner and international-
ly famous physicist in an address
before the American Chemical So-
ciety.
Dr. Millikan who opened a new
era in scientific investigation with
his explanation of the atom, declar-
ed the development of all the phys-
ical sciences should teach men of
learning to be "more modest and
thoughtful."
"We must learn to get away from
over assertiveness and dogmatism,
whether scientific or theological. I
see over-assertiveness from scien-
tists in connection with such things
as the late evolution trial, and I see
on the other side assertiveness on
subtle points about which I know
nobody knows anything.
"In the last quarter of a century
we have accumulated a remarkable
collection of facts and the data of
a group of new phenomena which
are henceforth the permanent heri-
tage of the race.
"It looks, at first, as though we
now could see it all; as though we
could begin to interpret the uni-
verse in terms of those simple re-
lations, but there are many things
we do not know.
"However, for instance, does the
Beta ray shoot itself out of an at-
om with terrific velocity? Whence
comes this amazing energy? We
don't know, we are completely un-
in the air in our understandings of
what it's all about.
"The pathetic thing is that we
have scientists who are trying to
prove evolution, which no scientist
can ever prove. Now I do not want
you to think that I am on the other
side; I am not. I am only asking
for more caution."

Mustapha Kemal
Pasha Divorces Wife

LONDON Aug. 14.—Surprise was
caused by the European capitals
today by the news from Constantin-
ople that Mustapha Kemal Pasha,
President of the Turkish Republic,
had divorced by decree his wife,
Laticia Hanoum, a young heiress
with a western European educa-
tion and a modern outlook in mat-
ters regarding feminism. Mustapha
Kemal met her in Smyrna under
romantic circumstances during the
way of enthusiasm in Turkey for
modernism and the emancipation
of women.
In the recent changes in the
regime in Turkey, the power of the
Sheik-ul-Islam, the head of Mo-
hammedan religion in Turkey, to
grant divorces became vested in
the president, who thus was able
to decree his own divorce.
No reason for the divorcement
is given in the official statement is-
sued in Turkey today, nor has
there been any indication what-
ever Mustapha Kemal's ideals for
the advancement of women have
undergone any change during the past
two years.

The export trade in Canadian
grain on the Montreal market to-
day was moderately active and con-
siderable business was transacted
with United Kingdom and United
States buyers. The market for spot
supplies of oats was active and
steady. The feature of the flour
situation was the heavy buying
by American buyers of winter
wheat grades. The heavy purchas-
ing is attributed to the keen de-
mand from abroad and as fast as
the United States interests are
