## The Best Butter Tub Is Steel Wire Hooped WHY? BECAUSE

This hoop being undulated or corrugated acts as a spring on the tub, so that the staves will not fall down when they become dried, neither will the top burst when the staves swell and become damp from the butter packed in it, as the spring of the hoop allows for expansion. This tub tapers 2 inches and no trouble is experienced in dumping out the butter. The hoops are electrically welded and galvanized so cannot rust. No S. W. H. tub has ever yet burst in transportation.
