ST. THOMAS CHURCH (Anglican), Long Creek, Sunday, May 15th. Everybody is welcome to our services of Evensong at 2.30 p. m. and 7 p. m. prompt. Capt. A. E. Wittig, C. A., in charge—No service in Christ Church, Cherry Valley this Sunday.

ALUMNI BANQUET—Former students of Mount Allison are looking forward with pleasure to the Alumni Banquet on Thursday when a pleasant evening is anticipated renewing old friendships. Professor A. W. Trueman, well known here, and who possesses a wonderful fine voice, will be present.

Monthly Meeting S' Side Council

(Special to the Guardian)

The regular monthly meeting of the Summerside Town Council was held last night in the council chamber, Mayor Manson presiding. All the Councillors were present with the exception of Coun. Grady. At this meeting the estimates for the year were brought down by the chairman of finance committee, Coun. Strong, and adopted and will be published in full in Wednesday's Guardian. After reading of the minutes the town bills were passed as follows:—Paid bills, \$1,636.45; unpaid bills, \$352.30. Electric light, paid bills, \$719.62; unpaid bills, \$1,022.03. Bye-laws were passed to impose poll tax and assessment tax on real and personal property the same as last year. The different committees brought in their reports for the year. Several communications were received and filed. A letter was received from the school board asking for sufficient funds to build an addition to present school as they have had a satisfactory agreement with the Government in regard to paying the salaries for additional grades. Council adjourned until next Monday, May 15, to deal with this question and other matters before the Council. S.

O'Leary And Vicinity

A plentiful supply of herring are being secured by the fishermen at West Point and all along the west side, the nets having been set on May 2.

The weather on the opening days of the lobster season, April 30, and May 2, having been very fine, a large amount of gear was put out from the western coast.

Master Atwood Dumville, the eleven year old son of Mr. B. B. Dumville, West Cape, had the misfortune to have one of his legs severely crushed during the launching of a boat there on April 30. A physician being called the injured member was attended to, and the little fellow is doing as well as can be expected.

Her many friends were sorry to learn of the serious illness of Mrs. John R. McPherson of Milburn with pneumonia, and wish her a speedy recovery.

The Sunday School in connection with Bethel United Church, which has been dormant for some time, was re-organized by the pastor, Rev. John Stirling, on Sunday, May 1.

Many friends regret the indisposition of Mrs. William McDonald, Dunblane, and hope to see her around soon again.

Miss Sophie Clements, R. N., of Hebron, is in attendance at the home of Mrs. John R. McPherson, Milburn.

Her many friends in this Province will be pleased to know that Mrs. John Work of Hamilton, Ontario, who has been ill with pneumonia, is out of the hospital and around as usual. Mrs. Work had recently visited her mother, Mrs. James Dunbar, of Alma, who had been stricken with paralysis, and although past the four score years and ten mark, is much improved.

Mrs. B. B. Dunville, Green Hill, was a visitor recently at the home of her sister, Mrs. Andrew Stewart, West Point, who is seriously ill.

Mr. and Mrs. R. L. England, Springfield West, were recent visitors in Dunblane.

Police Break Up Meeting

TORONTO, May 9.—(By The Canadian Press)—Three uniformed Toronto policemen tonight broke up an open air meeting of the Toronto labor party in the downtown district and cut short the address of James M. Connor, President of the organization, was making from a chair on the pavement. The meeting was called primarily to test the "right of workers to meet in the streets."

Still Loves Him

(Canadian Press)
RENO, Nev., May 9.—Ann Harding, film star, was granted a divorce here Saturday from Henry Bannister at a private hearing.

The ordeal of divorcing the husband she has professed she still loves, appeared to have been a trying one for Miss Harding. She came from the courtroom with a tear-stained face. She seemed faint as she was helped into an automobile.

Meeting of Cooperative Council

The program committee of the Maritime Co-operative Council held a meeting at Truro on May 6th at the call of Mr. A. B. MacDonald, secretary, to arrange for the third annual Maritime Co-operative Institute to be held at Mt. Allison University, Sackville. Dates were set for June 23rd and 24th. Those present were Wm. Kerr, Moncton, representative for the Maritime Egg Exchange; R. M. Elliott, Moncton, representative for the Canadian Live Stock Co-operative, Maritime Section; H. K. MacCharles, Sheep and Swine Promoter for Nova Scotia; W. V. Longley, Director of Extension for Nova Scotia; and A. B. MacDonald, Extension Department, St. Francis Xavier University. The annual meetings of the Maritime Egg Exchange and the C.L.C. Maritime Section will be held in connection with the Institute. Their meetings will be held on the afternoon of June 23rd and the morning of the 24th. Directors meetings will be held previous to the time set for the annual meetings.

A general session will be held the evening of the 23rd, at which those sections of committee reports which need to be taken up by the co-operative meetings the next morning will be discussed. There will also be one speaker on the program. Entertainment features for this program will be in charge of Wm. Kerr, who came through on such an acceptable program last year. The afternoon of the 24th, will open with one speaker. He will be followed by a report of the committee which were appointed at the meeting of the Maritime Co-operative Council held at Amherst early in April. The committees to report with the chairman are as follows: Constitution: A. B. MacDonald, Antigonish; Co-operative Financing: Jas. E. Leightizer, Charlottetown; Education and Publicity: A. B. MacDonald; Co-operative Wholesale: C. Stewart, Sydney Mines; Development of Local Markets, R. M. Elliott, Moncton; Preparation of Material for the Empire Economic Conference, A. B. MacDonald. Arrangements will be made for the entertainment of the ladies present. This will include a tour on Thursday and a luncheon.

NOTRE DAME CONVENT

The following pupils secured an average over 75% for the month of April:—

- Grade X.—Marion Stewart, Marie Arsenault, Enid Cantwell, Cecilia Shelton, Winnifred Moran, Eleanor Stewart, Imelda McLellan, Eleanor O'Connor, Frances Gaudet, Gertrude McCarron.
- Grade IX.—Lillian Peters, Muriel McDonald.
- Grade VIII.—Irene Peters, Bonny Taylor, Elwin Ayers, Alma Sheehan, Josephine Dolron.
- Grade VII.—Blanche Griffith, Genevieve Monaghan.
- Grade VI.—Marjorie Dwyer, Isabel Goodwin, Rita Doucette, Constance Leightizer, Mary Mooney, Mary Hogan.
- Grade V.—Norma Peppin, Margaret McKinnon.
- Grade IV.—Betty Leightizer and Philippa Bradley, equal, Mary McCloskey, Winnifred Doyle, Laur Jeanne Arsenault, Eileen Reid, Priscilla Chandler, Evelyn Arsenault, Blanche Harper.
- Grade III.—Mary Doyle and Marion Quinn, equal, Rosalie Kiggins, Isabel MacDonald, Helen Coyle, Wanda Deroche, Dorothy Conway, Phyllis Arsenault, Josephine Brown, Nora Mooney, Thelma Doyle.
- Grade II.—Marion Mitchell and Imelda MacGulgan, equal, Mary Duncan, Frances Peters.
- Grade II (B).—Paula Arsenault, Florence Lee.
- Commercial.—Mary Larkin, Gertrude McAulay, Marie Paquet, Molly Foley, Winnifred MacDonald and Lillian Hogan, equal.
- Special Students Commercial.—Hilda Bradley, Mary Bell, Frances White.

DEATHS

YEO—At Haverhill, Mass., May, 8, 1932, Mrs. Robert Yeo, formerly of Alberton, aged 73. Funeral from Alberton United Church on Thursday, May 12, at 2 P. M. Internment United Church Cemetery.

IN MEMORIAM

In Loving Memory of John B. Jay, who departed this life on May 10th, 1931.

Just a year ago tonight dear Father We stood beside thy bed, And in a faint and feeble voice Unto us children you said,

Oh now my dearest children Do not weep so much for me, But try your best to follow God's command, And I shall hope to meet you all In that Bright and Happy Land.

Inserted by the Family.
2957-5-10-11.

THIS WEEK IN PARLIAMENT

OTTAWA, May 9.—(By The Canadian Press)—Highlights of this week in Parliament will probably be the presentation of reports on radio, the Civil Service Commission, garnet wheat and tabling of the supplementary estimates for the fiscal year 1932-33.

After prolonged sittings and the hearing of leading authorities on radio broadcasting, the Commons enquiry committee on this subject has completed its report. The document will be tabled in the House tomorrow afternoon by Hon. Raymond Morand, (Cons., Essex, East). While there is a likelihood that legislation based on the report may be introduced before prorogation—which may not take place until after May 24—no decision will be made by the government before the findings of the committee are received and perused.

IN MEMORIAM

MRS. EMILY RUSHTON

The death occurred at Hyde Park, Mass., on April 15, 1932, of Mrs. Emily Rushton, widow of the late James Rushton, who passed away on April 2, 1932.

Mrs. Rushton was born at Bonshaw, Prince Edward Island, seventy-six years ago, and was the daughter of the late Nelson and Rebecca Farrow. Being of a large family, she leaves to mourn her loss two sisters, namely Mrs. Elizabeth Boyce, Bonshaw, Prince Edward Island, and Mrs. Ada Oakes, Washington, United States, and one brother, James H. Farrow, in New Hampshire. Several brothers and sisters predeceased her.

The funeral took place on April 17, 1932, from her late residence, 1 Dana Avenue, Hyde Park, Mass. Interment was in the cemetery at Hyde Park, Mass.

JESSIE REBECCA CUDMORE

The angel of death's office more visited Appin Road on April 18, 1932, this time claiming as its victim Jessie Rebecca, eldest daughter of Mr. and Mrs. George Cudmore, at the tender age of three years and seven weeks.

Jessie was a bright, lovable child, well-liked by all who knew her, and her death came as a great shock to her many relatives and friends.

About two weeks previous to her passing she was stricken with spinal meningitis from which she never recovered. All that tender nursing and loving kindness could do was done but all to no avail, and on the above mentioned date her gentle spirit winged its heavenly flight to God who gave it.

Death at all times seems hard but when one so young is called away it makes it still harder to understand but one must remember that God moves in a mysterious way His wonders to perform.

She leaves to mourn her loss besides her heart-broken parents one sister Carrie and one brother Jessie.

Her funeral, which was held from her parents' residence on April 10th, was very largely attended. Rev. Mr. Ayers spoke very comforting words to those who are left to mourn. The pall-bearers were Lewis Gordon, Jack MacEachern, John Matheson and Malcolm Ashley. Interment was made in Appin Road Cemetery.

Mr. and Mrs. Cudmore have the sympathy of their many friends in this their hour of sorrow.

Along The Waterfront

PICKARDS WHARF

The S. S. Sydfoeld which was stranded on Indian Rock for nearly a week sailed yesterday morning after discharging her cargo of coal. The unloading was done through the Longshoremen's Union and was completed in five days. The ship was in good condition despite being stranded on the rocks.

POWNAL WHARF

The S. S. Silvia, Captain Kane, docked about 12.30 yesterday afternoon with a general cargo, including cement and flour from Montreal. She is loading a general cargo including 7,000 bags of potatoes shipped by the Potato Growers' Association and expects to leave this afternoon for St. John's, Newfoundland.

Principal Fruit Tree Insects and Their Control

Fruit tree insects are becoming increasingly troublesome throughout the province. Insects attacking the apple are the most abundant, although pears, plums and cherries are also attacked. The following is a list of the more common insects found, with a brief description of the insects, types of injury and suggested means of control.

Eye-spotted Budmoth.—This insect is increasing rapidly in some sections of the province and causes considerable injury to both the trees and fruit. The larvae are tiny, reddish brown worms with glossy, black heads. These over-winter in crotches and crevices of the trees and begin to feed about the time the buds show green at the tips. When the leaves open, each larva ties together several leaves, and does most of its feeding within this cluster. In late summer, worms of the new brood feed on the underside of the foliage.

Control.—In early spring, about the time the first buds are showing green at the tips, spray with nicotine sulphate (Black Leaf Forty) 1-2 pints to 100 gallons of water. In late July spray with arsenate of lead, 2 pounds to 40 gallons of water.

Codling Moth.—The larvae attack chiefly apples and pears. The winter is spent in the larval stage in little cocoons or nests in crevices on the tree, around houses or barns or in any suitable hiding place. Moths from these larvae appear about the time the blossoms are falling and lay eggs on both trees and fruit. On hatching, the new larvae work their way into the apple through the calyx end, to the core. Most of the apples attacked fall prematurely.

Control.—Just after most of the blossoms have fallen, spray with arsenate of lead, 2 pounds in 40 gallons of water. A second application should be made about two weeks after the first.

Apple Maggot.—This attacks apples chiefly. In badly infested orchards all varieties are attacked, although some varieties, as Wealthy, Alexander and Lowland Raspberry seem particularly susceptible. The winter is passed in the pupa (resting) stage in the soil and the flies appear early in July and continue feeding for some time. At the Experimental Station at Charlottetown, adults were found feeding as late as August 17. The injury to the fruit consists chiefly of brown, thread-like tunnels made in every direction by the maggots.

Control.—About four weeks after the blossoms have fallen spray with arsenate of lead, 2 pounds to 40 gallons of water. Spray every tree in the orchard thoroughly. About two weeks later repeat the application. Pick up all drop apples soon after they fall, and feed to stock. The latter is a very important means of control.

Canker Worm.—It is only once in a long time that we have severe outbreaks of canker worms. They feed on most orchard trees and on many shade and forest trees. The slender worms (larvae) are greenish, blackish or brownish in colour with lighter stripes down the back and sides. They move from place to place with alooping gait. Epidemics usually appear over a period of two or three years, if unchecked, and often whole orchards may be almost defoliated.

Control.—If it is known that canker worms are likely to be abundant, spray with arsenate of lead 2 pounds to 40 gallons of water about the time the blossoms show pink at the tips, and again just before the blossoms open. The above sprays will usually keep this insect in check. If an infestation should occur, spray immediately with arsenate of lead 4 pounds to 40 gallons of water.

Fall Webworm.—This insect attacks many kinds of trees and shrubs but cannot be considered a serious pest. The webs appear late in the summer after the wood has ripened fairly well. The simplest control is to cut off the portion attacked when only a few leaves are affected.

Green Apple Bug.—Apples and pears are attacked chiefly. They are tiny green insects and might sometimes be mistaken for aphids. Fruit, leaves and tender growth are attacked, but the fruit suffers most, every fruit in some instances being punctured. The punctured areas fail to grow rapidly, causing misshapen fruit. The insect is now very common in the province.

Control.—Spray the apple trees with nicotine sulphate, 1-2 pints to 100 gallons of water about the time the buds are showing pink. If serious repeat just after most of the blossoms have fallen.

Aphids.—These are small soft-bodied insects of various colours and varying life histories. They attack many kinds of plants.

Control.—For Rosy Aphids spray

B-H Chi-Namel

(FAST DRYING)

FENNELL & CHANDLER, Charlottetown

with nicotine sulphate, 1-2 pints to 100 gallons of water when the tips of the more advanced buds have opened. If Green Aphids are troublesome late in the season, spray with the above mixture at the strength of 1 pint to every 100 gallons of water.

Scale.—Oyster shell scale is the most common and attacks nearly all fruit and many shade and forest trees. This insect winters in the egg stage. The eggs hatch about the time the blossoms are falling. The young larvae move about for a while, but soon settle down and cover themselves with a web that forms a protective scale.

Control.—Prune the trees well and scrape the loose bark off the main branches and trunks of old trees, and spray, about the time the buds are showing green at the tips, with commercial lime sulphur, 1 gallon to 9 gallons of water.

Pear and Cherry Slug.—The larvae of this insect are easily identified, being dark brown, almost black, slug-like creatures, swollen in front like a tadpole. They are found feeding on the upper side of the leaves where they devour the green tissue.

Control.—Spray with arsenate of lead, 1-2 pounds to 40 gallons of water as soon as they appear. If the fruit is reaching maturity, dust several times with hydrated lime. A measure of control may also be had by spraying with a strong jet of water.

For further information on any of the above insects, or any troublesome insect not mentioned in this article, write to the Superintendent, Experimental Station, Charlottetown, Prince Edward Island.

Arsenate of lime may be substituted for arsenate of lead in any of the above sprays, using 1 pound to 40 gallons of water. When using arsenate of lime always add 3 pounds of hydrated lime to every 40 gallons of the mixture.

FIFTY YEAR HISTORIC OLD FLAG GIVEN AO MUSEUM

MONTREAL, May 9.—(By The Canadian Press)—A flag made fifty years ago for the Societe des Artisans Canadiens-Francais was recently presented to the Antiquarian and Numismatic Society of Montreal and placed in the Chateau de Ramezay. It is of cream silk now browned with age, and centred by a coat of arms with the motto: Justice, Economie, Bien Etre. The full style of the society is worked above and below the crest.

In making the presentation Col. Bedard, president of the Societe des Artisans Canadiens-Francais, told how the flag came into existence six years after the founding of the society in 1876. At an assembly of members called to discuss participation in the St. Jean Baptiste parade to be held on June 26, 1882, it was felt that greater dignity would be added to the society if those taking part could march behind a flag. Articles of the constitution did not provide for such expenditures so the money was raised by public subscription. Of the \$38.10 collected \$35 paid for the making of the flag, 30 cents covered the cost of two pairs of white gloves for its bearers and the remainder \$2.80 was used to supply a bandolier for the president. It was a proud contingent of members that kept step behind the standard bearer of the society that June day.

Her sudden death was a great shock to her husband and family. She was of a quiet, unassuming disposition, and deeply attached to her home and family and was seldom absent from their midst.

The death of her eldest daughter, Patricia, during the epidemic of influenza in 1918, was a great blow to her mother, and she never fully recovered from the shock. There are left to mourn beside her bereaved husband, three sons and one daughter, viz.: Philip, Albert and Augustine and Myrtle, and one brother and a sister, Joseph Mulligan and Rose A., all of Kinkora. A brother, Felix, predeceased her about three years ago.

The numerous Mass Cards, Spiritual Boquets, and Messages of Sympathy tendered to the bereaved family were much appreciated, and showed the esteem in which the deceased was held. The funeral was held on Monday, March 21st, at St. Malachi's Church, where a Requiem Mass was celebrated by Rev. M. J. Smith, and notwithstanding the inclemency of the weather, a very large concourse of people followed the remains to their last resting place, where they were consigned to Mother Earth, there to await the Resurrection Morn. May her soul rest in peace.

MRS. JAMES T. DUFFY
(By The Canadian Press)—The installation over the week end of new and powerful pumps to aid the dredge General Montcalm and other fire fighting apparatus, has at last brought the fire which has been blazing in a huge pile of pulp-wood here under what is hoped to be final control. The wood, consisting of 250,000 cords valued at \$3,000,000 has been burning since Friday, April 29.

The quantity of wood which can be saved will be very small, however, even should the fire be completely extinguished within the next few days. The loss to the Consolidated Paper Company is covered by insurance.

All danger to the nearby mill of the Port Alfred Paper Company, a subsidiary of Consolidated Paper, was believed over tonight. A small part of the pile situated at the end nearest the mill may be saved, it was estimated. Well over three-quarters of the wood has been destroyed.

Cuticura Soap

Soothers and Heals as Well as Cleanses the Skin

FORM the habit of using Cuticura Soap for the regular daily toilet. It contains medicinal properties which soothe and heal and are a protection against skin troubles.
