We Are Modern Opticians

We keep in constant touch with the latest discoveries and inventions in optics, and immediately anything new is placed on the market which will increase our knowledge or facilities, we have it.

Our optical office is of the most approved style and is equipped with the very latest instruments and sight testing appliances.

Glasses fitted by us do not detract from the appearance. We make a special study of the cosmetic effect to be obtained, and can assure you that our glasses add a certain note of neatness and refinement that meets with favorable comment.

Children's eyes receive our special attention, and we pride ourselves on our ability to fit a child with child's glasses, not with cumbersome glasses that were intended for adults. Shadow Retinoscopy test used. Succeeds where others fail.

CREAM FOR CATARRH OPENS UP NOSTRILS

Tells How To Get Quick Relief from Head-Colds. It's Splendid!

In one minute your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more hawking, snuffing, blowing headache, dryness. No struggling for breath at night, your cold or catarrh will be gone.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh—Relief comes quickly.

SERIOUS FEED SITUATION.

Shipment of Feed from North to South Presents Serious Problem.

The Saskatoon Star reports that farmers about North Gully, Sask., are faced with a very serious situation in consequence of the severe frost of July 23. A special meeting of the local branch of Saskatchewan Grain Growers was called to deal with the matter, and a resolution was passed calling upon the Government to take the situation in hand. There is no doubt, it is added, that the feed question is a serious one in many parts of Saskatchewan, though the recent rains have relieved the situation considerably. At the same time the question is largely one of distribution—the getting of feed to the stock or the stock to the feed. An investigation has been conducted by the Provincial Department of Agriculture, and everything possible will be done to relieve the situation. Practically all the obtainable hay of the country north of Edmonton has been taken up, according to Mr. A. E. Meyers of the Alberta Department of Agriculture. Mr. Meyers states that there are some small lots owned by private individuals which are still to be had, but in most cases these are being held at exorbitant prices. It has been rather difficult getting the buyers and sellers together on the matter of price. About 1,000 head of cattle from Gleichen have recently been located in the Killam district and more are going into Merna. A lot of sheep have been located near Millet and north and east of Ranfurly.

Mr. W. F. Stevens, Live Stock Commissioner for the Province of Alberta, reports having seen more of the frozen grain left standing than he had seen in the past. Left standing until this stage, the value of the crop for green feed was largely gone. He found a great deal of hesitation on the part of farmers as to whether to either cutting the wheat, not knowing whether there would be any sale for it or not, and not wishing to go to the expense of harvesting if it was not of any value. The rancher, on the other hand, is being filled up with stories that the frozen wheat will not be satisfactory feed for his cattle, so he is making no arrangements, and, in the meantime, the wheat is past the proper moment for cutting.

Mr. Stevens is further quoting by the Edmonton Bulletin as saying that unless there are generous rainfalls very soon throughout the greater portion of the drought-stricken area of Alberta, there will be required a quarter of a million tons of feed to carry the southern farmers' and stockmen's animals through until another crop of grass is grown in the south country.

"To move a quarter of a million tons of hay," Mr. Stevens says, "will require one trainload every two hours for one hundred days; it will mean a similar number of empties going back. As fully one-half of this hay will have to come over a line of railway but recently opened for traffic, it is physically impossible for such a road to handle the number of trains in addition to its ordinary traffic, and to encourage stockmen to rely upon it would be nothing short of criminal."

GIRLS! HAVE WAVY, THICK, GLOSSY HAIR FREE FROM DANDRUFF

Save your hair! Double its beauty in a few moments—try this!

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, besides it immediately dissolves every particle of dandruff; you cannot have nice, heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life, and if not overcome it produces a feverishness and itching of the scalp; the hair roots famish and die; then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggy or too oily, get a small bottle of Knowlton's Danderine at any drug store or toilet counter for a few cents; apply a little as directed and ten minutes after you will say this was the best investment you ever made.

I sincerely believe, regardless of anything else advertised, that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair—you must use Knowlton's Danderine. If eventually—why not now?

Influenza!

should be carefully guarded against. A mild spray and gargle mixture of water and

for the nose and throat with an occasional dose taken internally may safeguard you from serious results and halt the evil in its first stage. This famous old physician's prescription is

ENEMY TO GERMS

Wholesale Destruction of Orchards.

One of the most disheartening sights in Kent is in the number of apple orchards that have been destroyed by San Jose scale. Feasible orchards seem to have been fairly well cared for, but there have been wholesale losses in apples.

That many of these orchards might have been saved, and with profit to the owners, is proved by a small plantation made up wholly of Baldwins belonging to Mr. William Grant, near Cedar Springs.

"When I obtained possession of that orchard a few years ago," said Mr. Grant, "it was so badly infested with scale that neighbors said I was a fool to waste time in trying to save it."

Mr. Grant, however, disregarded the gratuitous advice given. He began systematic spraying, and to-day the orchard is a picture of health, and the 4 1/2-acre plantation is giving any acreage gross return of \$1,000 a year.

Mr. Grant's total holding, by the way, is only 25 acres. "And I wish," he added, "it was only half the size." He has proved that a small holding, a very small one, can be made profitable.

Useful Corn Husking Rack.

A device that is very convenient in husking corn is the one shown in this cut. The fodder can be placed on this rack to save kneeling and stooping. The two wheels should be on a 2 1/2-

Handy Husking Rack.

foot axle to which are attached the eight-foot handles properly braced to prevent spreading. Such a rack can be easily wheeled from shock to shock and the twine can be carried in a box on the frame.—Farm and Home.
