OTTAWA, July 30—Tenders are being called by Hon. E. N. Rhodes Minister of Finance for 250,000 fine ounces of silver. This silver must be from ore mined in Canada and refined in a Canadian refinery during the present calendar year.

This will be the first purchase of silver by Canada under the international agreement whereby this country agreed to purchase 1,671,302 fine ounces a year for four years beginning this year, to strengthen the price of silver the four leading producers of the white metal agreed to take off the market 35,000,000 ounces a year. The other countries to the agreement are United States, Mexico and Peru.

The silver to be purchased by Canada will be in the form of bars weighing 1,000 ounces each and will be held by the Department of Finance as an additional security to the note issue. Eventually it will be turned over to the Central Bank.

Grasshopper Control

Reports from the Prairie Provinces generally indicate that the campaigns for the control of grasshoppers are proving very effective. In Manitoba the progress of these pests has been retarded and is well controlled except in the south-west where 25 per cent now have wings and there is much vacent land that has not been poisoned. Crops have not been damaged to any appreciable extent during the past week (June 26). In Saskatchewan poison bait has been spread with good effect in all sections where infestations occur and summer-fallow crops have suffered no material injury. The grasshoppers have not been active for the past two weeks, but damage is considerable in the stubble crops in south-eastern, south-central, and south-western Saskatchewan, and to a lesser extent in the central and west-central portions of the province. The difficulties of control are being offset by the impetus given to recovery from previous injury. In Alberta grasshoppers are being controlled at the present time, and winged grasshoppers are now appearing, but the poisoning campaign is keeping losses at a minimum.
