AFTER OPERATION SHE GREW FAT

And Became Short-Winded

A letter just received from a woman states that she is writing in thanks for the benefit she has received. Her letter goes on:—

"About 12 months ago everybody remarked how fat I was getting. I turned the scale at 196 lbs. I was fed up at getting so fat, and it made me short-winded. Why they noticed it more was because I was getting fat slowly since I had had an operation for appendix. I went back to the hospital, and the doctor said most women get fat after that operation. I had tried everything I knew of to try and get slim, so I thought I would give Kruschen Salts a trial. I started at first to take half the dose prescribed, in my first cup of tea. Nine months ago, I turned the scale at 196 lbs., and at the time of writing I go 178 lbs. I feel better than I have felt for a long time."—(Mrs.) H.

The formula of Kruschen represents the ingredient salts of the mineral waters of those European Spas which have been used by generations of overstout people to reduce weight. Gently, but surely, Kruschen rids the system of all fat-forming food refuse, of all poisons and harmful acids which give rise to rheumatism, headaches, and many other ills.

Halifax Tot Is Horribly Burned

(C. P. By Guardian's Special Wire)

HALIFAX, Dec. 11.—Her face and little body horribly burned, five-year old Shirley Hector lay between life and death in the Children's Hospital tonight, and in her moments of consciousness pleaded with doctors to tell her if she would live.

Sparks ignited her dress when she was sitting before the fireplace in her bedroom with her younger playmate, Ronald Desjardins. Screaming with fear, she ran into the hallway where a rush of air fed the flames until they shot above her head.

Her sister, Mrs. J. D. Desjardins rushed from the kitchen and attempted to beat out the flames with her bare hands, suffering severe burns in the attempt.

Screams of the child attracted William Clements, who lives on the first floor of the house. He smothered the blazing clothing by rolling the tot in a blanket.

Shirley was rushed to hospital with painful injuries and attending physicians said her condition was very serious.

quota of 280,000,000 pounds on the British market. In the monthly letter issued by the Industrial and Development Council of Canadian Meat Packers, our bacon exports for the past three years are as follows:

1931	5,000,000 pounds
1932	20,000,000 pounds
1933	53,000,000 pounds

During the first eight months of this year we exported nearly 80,000,000 pounds, or a possible 125,000,000 for the year. These figures show that we have a long way to go before we fill our quota. I have already stated that when this quota is re-considered it may be set back to our maximum annual exports up to date of revision. Our Canadian Packers realize this possibility and are making an effort to put as much bacon as possible on the British market. When our bacon exports were at a low figure there was no difficulty in keeping up our quality on the British market, but as our exports increase, it becomes necessary to export poorer bacon. This is due to the indifference of many Canadian farmers. Mr. McLean of Canada Packers recently stated that Canadian farmers lost $12,000,000 due to producing low grade hogs.

Faulty Practise

Even in this province our farmers are throwing away money by marketing inferior hogs. Some persist in breeding to non bacon type boars. Some ship hogs at light weights. No hog should leave the farm under 200 lbs. live weight. Some market their hogs in an unfinished condition. Some are completely indifferent to the quality of the brood sows kept. All these things taken together result in the loss of thousands of dollars to our swine producers.

We have been too localized in our outlook of our Agricultural industries. The farmer's interest in his products should not cease at his own gate. All parties connected with the swine industry should not limit their interest to their own immediate personal gain. We should look beyond ourselves, beyond our province, beyond our Dominion. Our interest should follow our products until they reach the consumer. In addition to this we should have a deep interest in the future of our industries. We should look ahead to the time when Canada will be the greatest bacon exporting country in the world. We should not let small personal, temporary advantages blind us to the fact that our first consideration must be given to fostering our export bacon trade. This means quality. Any factor which has the tendency to decrease quality in pork products must be discouraged. We must encourage our farmers to produce the quality hogs and we must give the consumer the highest quality in the finished product. By no other policy can we build up an industry equal to our possibilities. In conclusion I trust that you as city business men will give your support, and your sympathy, to the efforts which are being made to improve the status of our swine industry. The progress made along the line of co-operative marketing of live stock has resulted in bettering the condition of our farmers. This should indirectly benefit all lines of business. The more money the farmer receives for his products, the more he has to spend.

FOX PUPS STOLEN AT HAMILTON

Mr. Fred J. Lockerbee, of Hamilton had six valuable silver fox pups taken from his ranch some time during Tuesday night. Mr. Lockerbee first missed the pups when he went to feed them on Wednesday morning. The foxes were not in the main ranch but in a shed where he had placed them in preparatory to pelting them. The door was not locked.

Mr. Lockerbee noticed sleigh tracks leading to the door of the shed. There was also evidence that the pups had been killed before they were removed. Mr. Lockerbee notified the R. C. M. P. at Summerside and Corp. Engles and Constable Keyes went down and investigated the matter and are now following up some clues which may lead to the recovery of the foxes. —S

LARGE RUM SEIZURE AT SUMMERSIDE

The R. C. M. P. at Summerside seized fourteen gallons of rum in a dwelling house on Cedar Street Tuesday evening. The place had been under observation for some time. The owner pleaded guilty before Magistrate E. H. Strong yesterday and was convicted and fined $200 and costs under the Prohibition Act, and $50 and costs under the Customs Act.

The barber had used his electric clippers in cutting small Betty's hair.

"I guess my neck wasn't clean," she told her mother on coming home, "cause that man used his vacuum cleaner on it."

The efforts made to improve the quality of our bacon through the hog grading policy have done much to aid us in regaining previously lost ground on the British market. We need more and better bacon to fill our quota before this quota is revised. In a word, we need the co-operation and the determined efforts of all those interested in the swine industry to make this industry the most profitable and stable line of agriculture.
