Racing Boats On Mississippi

Racing Steamboats Endanger Presidents Life Roosevelt Was on the Mississippi, Going to Memphis, When He Had Narrow Escape

EVANSVILLE, IND., October 9.—Inspector Williams issued telegraphic orders last night ordering the suspension of the license of the captain of the steamer or Fred Hartweg for ninety days in accordance with a request of President Roosevelt. The offense charged against the captain of the Fred Hartweg was racing with the steamer Alton, thereby endangering the Mississippi on which President Roosevelt was travelling.

The Fred Hartweg and the Alton accompanied the Mississippi on its trip down the river to Memphis.

Memphis, Tenn., October 9.—According to a despatch from Cairo, Ills., the incident which resulted in President Roosevelt requesting the suspension of officers in charge of steamer Fred Hartweg occurred a short distance below the city on Thursday.

When the boats composing the flotilla escorting the President left Cairo, the despatch states, the steamer Alton, carrying the St. Louis delegation had the position immediately following the Mississippi, with President Roosevelt aboard. The Fred Hartweg while endeavoring to wrest this position from the Alton bumped into President's boat with great force, causing it to jar those aboard, the President himself being thrown against the wall of his stateroom with considerable force. But for the act of the pilot on board the Mississippi, the despatch adds, in endeavoring to get out of the path of the Hartweg, a serious accident might have occurred.

50,000,000 FOR ADVERTISING

"James B. Duke, the tobacco king of Long Branch, New Jersey, recently claimed in an interview that he had spent more money in advertising than any other living man. He said that the figures would reach fifty million dollars.—Newspaperdom."

Yet James B. Duke is to-day one of the wealthiest men in the world. When you see a liberal advertiser you see a rich man. The business man who in this age of advertising is afraid to invest his money in publicity will never accumulate a fortune.

STEEL COMPANY'S

LOSS THOUSANDS

Break in the Water Main Has Not Yet Been Repaired

SYDNEY, Oct. 9.—Repairs to the twisted water main of the Steel Company had not up to a late hour tonight been effected. At 3 o'clock this afternoon the break had not been joined, and it will take five hours, it is said, after being heated to repair the damage.

The accident is now assuming more serious proportions, and unless it can be remedied within a very few hours the loss occasioned the Steel Company will be difficult to recover. Two hundred men have been employed since the occurrence of the break at five o'clock yesterday afternoon. The mains are laid 16 feet below the surface and necessarily require considerable labor to be exposed.

A WRINKLE FOR CAKE MAKERS.

If you are your own cake baker—and surely you are—you perhaps have noted the difference there is in flour. There are two principal constituents in flour—starch and gluten. All wheats contain both, but in varying quantities. Ontario fall wheat is rich in starch, while Manitoba spring wheat contains a large percentage of gluten. By combining the two kinds of wheat scientifically a flour is made that gives delightful results, whether for cake, pastry or bread.

Millers are now blending these two kinds of wheat in such a way that the rich delicacy of the first is combined with the strength of the second—making an ideal flour.

Expert cooks have given Blended Flours exhaustive tests, and they are in the opinion that no other flour can make such white, light, wholesome cake, pastry and bread.

Housekeepers will find Blended Flours without equal, both for making dainty foods and substantial baking, and they will find Blended Flours most economical, too.
