Jersey Regains Pre-war Charm

By Norman Cribbens
Canadian Press Staff Writer
ST. HELIER, Jersey, Sept. 23.—(CP)—The Channel Islands have regained their pre-war charm and the time removing all traces of the German invader and preparing for the happier invasion of tourists.

In 15 months the islands have recovered both their "pre-war" and their "post-war" charm and there is little to distinguish Jersey today from the holiday playground it was before the war. Crowds are here despite the still limited sea and air transport. Hotels and boarding houses have been reconditioned and repaired.

British austerity is forgotten. Goods in short supply in England are plentiful and since there is no purchase tax, prices seem absurdly low to visitors.

Tidying up Jersey took all of 12 months. Hundreds of notices in German had to be removed from the roads and wires and mines from the beaches. German tanks were shipped out and the last German prisoners left in June.

There are still a few Germans along the wide sweep of St. Brelades Bay remains but it has been pierced to give access to the sea.

In the adjoining Channel Islands a permanent memorial to the German occupation—long rows of black crosses, more numerous than might be expected—there was no lighting on the island.

The agricultural industry has suffered temporary loss of the British market for its potato crops, but alternative markets have been found in France and in the British Army of the Rhine. Tomato exports have not been affected and the dairy herd suffered less than farmers expected.

Reports on life under German rule are conflicting. Some call it "unendurable" and others declare life was not much disturbed and a few give the Germans credit for fair administration.

"When they had the food, they said to it that everyone on the island got his fair share," said one gnarled old fisherman gazing out over the sunny harbor.

"If you played the game and didn't try monkey business with wireless sets and what-not, why the German was a pretty good fellow to get along with. You have quick-acting powder carbon dioxide is given off before the batter is put in the oven."

An English woman who keeps a small cafe along the seafront spoke differently. "Those who like them should go and live with them," she said angrily. "They are devils. They raided every home on the island and took the best of everything. Fair play—bah!"

At HOLMAN'S

Winter can be an invigorating pleasure... if you're prepared to meet its elements! You'll find the weather stimulating when you're wearing one of our high quality wool overcoats! The finely tailored fits have emphasis on broad shoulders and freedom for action. Wide variety of styles, colors and fabrics.

Guinea Alpaca Overcoats. Warmth without weight. Moth-proof and showerproof, correctly styled in the new shades **39.50**

Men's Tweed Overcoats in popular sizes and shades. **22.50 to 32.50**

Men's Fleece Overcoats in Fawn, Brown, Grey and Blue, in Bal-macann and slip-on models. **25.00 to 39.00**

Melton Overcoats in Brown or Navy Blue slip-on model **21.50**

HOLMAN'S

GUARANTEED SATISFACTION SINCE 1857

WHEATLEY RIVER W. I.

The Wheatley River Women's Institute met at the home of Mrs. Leonard Ling on Friday evening, Sept. 6th. In the absence of the president, the vice-president, Mrs. William Ling presided. The meeting opened by singing the Inland Ode and repeating the Creed in unison. The roll call was answered by 13 members and one visitor. The minutes of the meeting were read, approved and signed.

The correspondence consisted of a letter from the Robin Hood Flour Mills stating that they could not send their speaker on account of the epidemic on the island. Letters from the Protestant Orphanage and Salvation Army asking for funds. It was decided to send \$10.00 to the Orphanage and a committee was appointed to canvass for the Salvation Army. Plans were made for the X-ray unit coming to the hall. It was decided to buy a gift for a bride also 5 yards of cotton for a quilt to send to Labrador.

Mrs. Gordon Andrews and Mrs. Melvin Ling were appointed to attend the annual meeting of the Tuberculosis League. Mrs. Herbert Smith invited the members for the next meeting when the roll call will be answered with a pickle recipe. The offering amounted to \$5 cents. The meeting closed by singing the King after which lunch was served.

QUANTITY COOKING MATTER OF SCIENCE

REGINA, Sept. 24.—(CP)—Cook books are the biggest headache to Mrs. W. H. Horner, instructor in cooking at the Canadian Vocational Training scheme's chef school here.

Measurements in most cook books on the market today follow United States' customs and that is where the trouble comes in. Americans put 128 ounces into a gallon while Canadians generously make it 160 ounces.

"Small quantity cooking does not reveal the same problem," Mrs. Horner said, and she knows. She is a bachelor of household science and holds a certificate of education for Saskatchewan. Previously she did dietetic work in Montreal.

"One is the day when cooking was done haphazardly," she said. "Cooking for institutional purposes is coming into its own as a recognized science."

As proof she cites the case of baking powders. In old-fashioned baking powders carbon dioxide is given off before the batter is put in the oven.

Today there are both double and slow powders which allow the batter to set for several hours without loss of action. Cooking's becoming as tricky as the atomic bomb.

SPRINGFIELD W. I.

Mrs. William Haslam entertained at her home the Springfield W. I. at their September meeting. The president presided, opening the meeting with the Creed.

Thirteen members and two visitors answered the Roll Call with a "Way of Preparing Potatoes for a Supper Dish."

Owing to the polio epidemic in this province, Miss Murdoch of the Robin Hood Flour Mills was not present.

Drama Festival bills were paid and a vote of thanks to the cast of "Appearances" was moved and seconded.

One card of sympathy was sent by the Sick Committee. As the school was closed there was no report from that committee and the same one is set to act for the next month.

Mrs. J. Ernest Haslam invited the members to her home for October, Roll Call to be answered with a pickle to be made for the Lunch Committee. Mrs. Andrew Hughes, Mrs. R. E. Howard and Mrs. H. Haslam were present.

Programme: Mrs. Arthur Haslam and Mrs. R. E. Howard.

Mrs. Norris Sinclair offered to buy if possible a move for the school. It was moved and seconded that last year's Salvation Army Home Front Appeal collectors be re-appointed. They are Mrs. Norris Sinclair, Mrs. Arthur Haslam and Miss Emily Howard.

The annual donation of \$10.00 was voted to be sent to the Sanatorium. 30 boxes of Christmas cards were ordered by the members.

The treasurer reported \$84.78 on hand. The meeting adjourned and closed with the National Anthem. "Observance" prepared by Miss Muriel Haslam was won by Mrs. Crawford Sinclair and Miss Emily Howard.

Eire Reorganizes Its Industries

While Northern Ireland is moving toward the restoration of its pig industry, the re-organization of the pig and bacon industry in Eire in the south should prove of much interest to Canadian farmers, because, if present Eire legislative sanction, Eire is endowed with far-reaching powers. A White Paper recently published by the Eire Department of Agriculture, states that the Eire government's plans in this respect and legislation is to be introduced at an early date to give effect to the decisions.

The proposed Board will be composed of the representatives of pig producers and bacon curers and it will have power to acquire and operate or manage a bacon-curing factory that may be offered for sale. At the present time, there are 30 bacon factories in Eire, six of them owned by co-operative societies. If necessary, the Board can compel the amalgamation in any town or district of existing bacon-curing factories. The Board can close factories that become redundant through amalgamation and it can build new factories where the Board thinks they are necessary.

The Board will regulate the marketing and export of pigmeat, con, pork and other pig products, and can purchase and allocate all pigs offered for slaughter. It can require bacon-curing firms to improve layout, equipment, and management of their factories, and control the sale and transfer of bacon factories. It can recover from the bacon-curing industry the cost of acquisition of redundant factories. Factories not purchased by the Board will be owned and controlled by that body, and other factories will continue under their present ownership.

In view of the highly competitive conditions which are expected to prevail in the export market when the world supply of pigs increases, the Advisory Committee suggested that the objectives of the plan for the future of the industry should include the establishment of pig production by price control.

SAKES ALIVE, LADY! Take ABBEY'S!

When "Abbey's" she's tried, She will quickly decide And agree with the many who say — That a dash now and then is a right helpful thing When the system's upset or astray.

You can't feel brisk or bright, cheer or chipper, if your system is upset or irregular. The cleansing, regulating action of Abbey's Effervescent Salt helps to neutralize the acid condition which often causes sour stomach, headache, indigestion. Whenever you don't feel right try a sparkling dash of Abbey's. It's a grand regulator! When needed you'll find Abbey's...

Pleasant and Easy to Take Before Breakfast

ABBHEY'S
EFFERVESCENT SALT

HOW MUCH WATER DOES A COW NEED?

Veterinary authorities state that for the highest production of milk the importance of a continuous supply of drinking water for the cows cannot be over-estimated. Experiments in Canada, United States, Britain and other countries have shown that milk production was higher from cattle with water available to them throughout the day than from cattle which had access to water only once or twice a day.

It is estimated that the average cow needs from 10 to 15 gallons of water per day. High producing cows, such as those producing 35, may consume up to 30 gallons of water per day. Where dry feed, such as hay or chaff and concentrates, is being fed the cows would take 15 to 15 gallons of water as such. However, where the cows are on pasture and quantities up to 120 pounds are known to be eaten, water would be taken in smaller amounts. One hundred and thirty pounds of pasture would probably contain about nine or ten gallons of water. If all were fed 50 pounds of that material would probably contain about 3 1/2 gallons of water.

Announces New Appointee

LONDON, Sept. 24.—(CP Cable)—The Society of Jesus said here today that the Vatican radio had announced that Father John James Hanlon of Dublin is the new appointee of the Order's English Assistance. The Assistance includes the two Jesuit provinces in Canada (British and French-speaking).

The word turnpike originated from the early American custom of blocking toll roads with piles of poles—when the toll was paid, the piles were turned aside.

KISS YOUR TIRED FEELING GOODBYE!

Popless Many Suffer Low Blood Count—And Don't Know It.

The baffling thing about low blood count is that you can weigh about as much as you ever did—your hair looks healthy and you see—yet you feel as if you had lead in your veins.

Low blood count means you haven't got enough red blood corpuscles. It is their vital job to carry life-giving oxygen from your lungs throughout your body. And just as it is and make the power to turn the wheels, so you must have plenty of oxygen to provide the energy in your body and give you going power.

Dr. Dr. Williams' Pink Pills today, they are world-wide for the help they give in restoring the number and strength of red corpuscles. They will give you back your vitality and make you feel like bounding up the stairs as if you were feeling on top. Ask your druggist for Dr. Williams' Pink Pills today.

RAPID ADVANCE IN POULTRY MARKETING

During the past few years, the domestic consumption of poultry in Canada has increased. This has been due mainly to two factors: the rationing of meats and increased earnings, state the latest issue of Current Review of Agricultural Conditions in Canada. The demand for poultry has also been augmented by the development of poultry barbecues and other specialized meals in restaurants in several cities, and by the development in the sale of cut-up poultry which has made possible the wider distribution of poultry through the availability of smaller units.

A notable development during the year 1945, says the Review, was the extension of sale of poultry by grade at retail. Under existing Dominion-Provincial legislation, it is possible to introduce this type of sale by grade, rather than by whole provinces or the Dominion as a whole at one time. Sale of poultry by grade at retail is now required in the following cities in Canada: Winnipeg, Toronto, Ottawa, Montreal, Quebec, Charlottetown and Summerside—and is being extended in accordance with public demand.

Another significant development in connection with market poultry has been the expansion and the improvement in poultry killing, cooling, and freezing facilities which permit more efficient plants made over. The majority of the plants, excepting the smaller ones, have been equipped

SPINACH A TROUBLE

Children who do not like spinach will find a grim satisfaction in the knowledge that spinach is also a considerable nuisance to plant breeding scientists. As explained by the scientific plant breeder, the Horticultural Division, Experimental Farms Service, spinach plants fall into four classes, according to sex, namely: extreme male plants, vegetative plants, females, and hermaphrodites. Chiefly due to the large percentage of extreme males, which are undesirable plants, seeds of the Bloomsdale variety produced at some of the Experimental Farms have been refused foundation status.

A few years ago, this problem was taken up by the Horticultural Division and individual plant sections were grown and isolated in the greenhouses. This year (1946) a number of these lines was set out in the field. The fact that they gave a great deal of satisfaction. Seed from these lines will be used to grow foundation seed.

WIGAN, England.—(CP)—This ancient borough is celebrating the seventh centenary of its charter.

BUSHMILLS Northern Ireland—(CP)—The Presbyterian congregation of Bushmills is celebrating its third centenary.

LONDON.—(CP)—Twenty-five persons queued all night for tickets to the Old Vic's Shakespeare season.
