Ancient Remains In Swiss Waters
Extraordinary Drought Has Laid Bare Stone-Age Dwelling at Bottom of Lake

GENEVA, March 2.—The extraordinary drought in Switzerland, which has continued since last September, has lowered the lake waters so much that archaeologists are busily engaged examining some of the interesting old lacustrine or pile dwellings which date back to the Stone Age, and for which the Swiss lakes are noted.

Old pottery is being discovered in two lake dwellings revealed on the shores of Lake Neuchâtel, and hundreds of piles in perfect preservation, and on which these dwellings originally rested, are now clearly visible. Many persons have volunteered help for excavating the remains of these ancient dwellings, which, according to Dr. Kellerchief, the Swiss authority on the subject, ceased to be inhabited about the first century of the Christian era. Numerous boats, which apparently were wrecked and sunk in past times, are now visible.

So low are the waters of all the Swiss lakes that along Lake Geneva, where formerly steamers and boats used to anchor, children are playing on the sands. Some lakes on which large steamers and cargo boats once piled without difficulty, are now dotted with small sandy islands to another. Steamship services have ceased, and even small cargo boats do not reach port to unload.

THE MARKETS

Montreal, Feb. 28
The receipts of eggs today were 564 cases, as against 1,343 cases for the same day last week, and 900 cases for the corresponding day a year ago. The receipts for the week ending February 26th, 1921 were 5,970 cases, as compared with 8,866 cases for the previous week, and 6,683 cases for the same week last year. The total receipts since May 1st, 1920 to date were 554, 831 cases, as against 718,996 cases for the same period last year.

A steady feeling prevailed in the market and prices were unchanged at 48c per dozen up to Friday when the market took a turn upwards, and an advance in prices of 2c per dozen was recorded with sales at 50c per dozen. This was attributed to the falling off in receipts as compared with the previous week the increased consumption and the higher prices demanded in the country. The market throughout the week was active and a large volume of business was done.

The undertone to the market for potatoes has been firm throughout the week and prices show no important change, which is due to the fact that shipments from the interior have been comparatively light and only about sufficient to meet the requirements of the trade. A fair trade has been done with sales of car lots of Green Mountains and Quebec stock at 95c to \$1 per bag, 1 1/2 lbs. extra-truck, and in a whole sale jobbing way at \$1.20 to \$1.25 per bag; of 89 lbs. extra-truck.

Curlers Enjoy Another Banquet

An enjoyable time was spent Tuesday night at the Curling Club rooms by local players and their Amherst guests. On account of the slushy ice it was impossible to play off the scheduled games, and the evening was passed in card playing, followed by a splendid banquet put up by Mr. H. C. Brown of the Victoria Hotel, which was interspersed with brief addresses, toasts, songs etc. The affair which was entirely informal was ably presided over by Mr. D. A. McKinnon, President of the Club. After "The King" a hearty toast was drunk to Mr. Brown, preceded by a few remarks from President McKinnon, who neatly expressed the opinion of all present that Charlottetown was to be congratulated upon the acquisition of so capable a citizen. Though a newcomer to the city, comparatively speaking, Mr. Brown has entered wholeheartedly into our social and business life. As the progressive and genial manager of Charlottetown's biggest hotels he has won for himself a host of friends and well-wishers. A feature of the evening's entertainment was the inimicable singing of Mr. Charles Barie, who excelled even himself in his responses to enthusiastic encores. The remainder of the evening was taken up in brief addresses of a humorous and reminiscence character. The Amherst players left for home this morning, firmly resolved to make their visit here an annual affair.

—EASTERN NOTES.—The only activity in the produce market, just now, in the Soudis district, is the movement of hay. During the fine days, and good roads, of the latter part of the week, the activity in the hay market was the largest ever. There is no other kind of produce moving. Farmers are the buyers. The scarcity of cattle feed, particularly along the North Shore, is a very serious one. Hay was selling in Soudis and vicinity, Friday and Saturday, at \$28 to \$30 a ton, for both pressed and loose, many preferring to pay as much for loose hay as for pressed—in fact more so—as they know what they are getting. This hay, at \$28 and \$30, is all local, for hay from the car would cost at least \$3 to \$5 more, and as all the local supplies is about bought up and consumed. What hay is needed later will be several dollars dearer, as it will have to be imported. One farmer in Soudis Line road, sold large quantities loose, Friday and Saturday for \$28. This is pretty
