

PRINCE EDWARD TODAY 3.15. NIGHT 7 AND 8.45

A Picturesque Thriller

Every blessed foot of this film reveals new wonders! The background of Tartar and gypsy life is virgin field for the screen.

Dorothy Dalton in 'THE LAW OF THE LAWLESS'

From the Pictorial Review Story by Konrad Bercovici—Directed by Victor Fleming—Adapted by E. Lloyd Sheldon and Edfrid Bingham.

BUSY HOUSEWIVES may have orders for lemon pies, cakes and salads filled and delivered by phoning Methodist Girls, 664-L between 1 and 2 o'clock, Tuesday, 21

DIED IN SHEDIAC.—Many in Charlottetown will be sorry to learn of the death of Mr. A. J. Webster, who passed away on Saturday at his home in Shediac, N. B. Mr. Webster was a well known commercial traveller and was a regular visitor to Charlottetown.

ST. PETER'S MISSION OPENS TONIGHT.—The ship in which Rev. Cyril Bickersteth crossed the ocean did not arrive in Halifax early enough on Saturday to enable the eminent preacher to reach Charlottetown for Sunday. The opening service of the Mission which he is to preach at St. Peter's Cathedral will be held this (Monday) evening at 8 o'clock. Announcement of the succeeding services will be made as soon as possible after Father Bickersteth arrives.

PRESIDENT OF MT. ALLISON UNIVERSITY IN THE CITY.—Yesterday was Educational Sunday in the Methodist Church and the services were conducted by the Rev. Geo. J. Trueman, President of Mt. Allison University. The Rev. Doctor delivered two very able discourses dealing with the necessity for a greater interest being taken in the welfare of the rising generation and providing opportunities for those who have the call to leadership to obtain an education suitable for their calling. At the evening service he referred particularly to many leaders in education and other paths of life who were born and obtained their early education in Prince Edward Island. He hoped that those who were responsible for providing the educational facilities for the young would not grudge the cost. The music by the choir under the leadership of Prof. Fletcher was of high class order and was commended by Dr. Trueman.

Trying To Drown A Mother (By Dominion News Service) PARIS, May 2.—A sombre drama such as Edgar Allan Poe or the author of "Therese Raquin" might have pictured was enacted lately on the banks of the Seine just outside Paris.

M. Lucien Negrou, who occupies a villa in the district of Asnières, heard the cry of "Save me, save me." He saw two women in the middle of the current. He and his wife went out in a boat and first reached and rescued a white haired woman.

Still, a few yards away, cries of "Save me" were heard, and soon a young woman was likewise rescued.

"When half way across," continued the young woman, "the stranger seized me first and lifted me out of the boat and dropped me into the river. He did the same with my poor mother."

Sharply the inspector told the girl she was a bare-faced liar.

"What about this bag?" he asked, producing one found on the boat.

"These letters," he said, "found in your baggage tell of your being charged by your employers at Rheims with the misappropriation of funds. Indeed you are instructed to appear before a magistrate."

At that the girl confessed that rather than face the magistrate she had decided to drown her mother and herself.

WATER IN THE DESERT The cactus is the camel of the American deserts insofar as its water-storage powers are concerned.

The plant is prolific in growth and shares the intense heat and aridity of our American deserts with the tortoise, the lizard and rattlesnake.

The plant itself is constructed for life on the desert, although it grows rapidly elsewhere. The cactus in reality is all stem and no leaves, the different shades of off the main stem have the appearance of thick rounded or elongated leaves. These apparent leaves are really a part of the trunk or branches and the prickly spines on them are in reality the leaves.

The cactus is a great manufacturer and hoarder of water. In some varieties the pithy interior of the main stem contains water sufficient for the relief of a thirsty man.

In many sections of South America where the plant thrives, the cactus is utilized in the making of a sort of whitewash that gives to buildings an other things in which it is placed an intense whiteness.

WISE TRAVELLERS CARRY DOLLARS INTO GERMANY. HAMBURG, April 30.—Americans coming to Germany this summer will do well to provide themselves with a long wallet and have it well filled with real American banknotes.

Travellers' checks and letters of credit still cause endless trouble. Banks will not pay out actual American money on dollar checks and letters of credit without charging an excessive premium, as well as a heavy exchange fee. If travellers accept rentenmarks and have more than they require for use in Germany, they are not supposed to carry them out of the country.

Furthermore, rentenmarks are at a heavy discount in surrounding countries in spite of the high point at which they are held in Germany. Foreigners living in Germany virtually have abandoned the use of checks and have actual English or American money mailed to them because of the great advantage there is in possessing stable currency.

A skull of a prehistoric man, found in New Mexico, shows evidence of an attempt at surgery, a section of frontal bone having been removed.

A formula has been recently discovered by which a history in Bohemian whistles said to be perfectly waterproof.

White Prestige In China Lowered by Foreign Education

(United Press.)

PEKING, May 3.—Two recent incidents, one involving an assault upon a foreigner and the other an alleged invasion of ceded rights, following as they do upon a long succession of more serious events growing out of the prevalence of banditry, have served to accentuate a widespread consciousness among foreigners leading in north China that the special consideration formerly enjoyed by them at the hands of Chinese, both officials and civilians, is definitely waning.

Various reasons for such "loss of prestige," as it usually is called, have been advanced by old residents in the country. The favorite one is the loss by several nations of previously enjoyed rights of extraterritoriality. By some it is said to be due to growing enlightenment on western methods as a result of an increasing number of foreign educated Chinese engaged in governmental, military and economic affairs. Others attribute it to belief on the part of the Chinese that foreign nations under prevailing disturbed conditions are in no mood to maintain their former privileged status by force.

The first of the incidents in question, which aroused tremendous indignation in British circles in Peking, occurred recently when K. E. Bessel, British traffic manager employed by the Peking-Mukden railway at Fengtai, was savagely attacked because of a controversy over the attaching of a special military car to the regular train from Peking. After protesting that it was contrary to regulations, and while in the act of conceding to the demand under menace of violence, Bessel was knocked down by armed soldiers. While unable to defend himself he was kicked by the man, described as a Chinese policeman employed by the foreign administration of the legation reservation.

The regulations call for a dimming of motor lights and moderation of speed with Dr. Jacob Gould Schurman, American minister, and the striking and disarming of a Chinese policeman employed by the foreign administration of the legation reservation.

Starting Revelations Will Be Made Soon

IN MEMORIAM

MISS ANNIE J. MACMILLAN

The community of Wood Islands North was saddened by the news of the passing of Miss Annie J. MacMillan on April 18th, inst.

The High Commissioner for Canada has received a notification from the Ministry of Agriculture that should no further outbreak of foot and mouth disease occur in the Glasgow area, the port of Glasgow will be reopened for the landing of Canadian Store Cattle about the 16th of April.

Applications have been received by the High Commissioner for Canada from persons in Canada anxious to come over to England with a view to securing engagements in connection with the Pageant of Empire at the British Empire Exhibition. The authorities in charge of the Pageant regret that, on grounds of expense, they are unable to avail themselves of these offers, and it is expected that the persons for the Pageant will be secured from the London Area and amongst citizens of the Dominions resident in the United Kingdom.

The organizers of the 27th Chemical Exhibition to be held from June 23rd to 27th at the Central Hall, Westminster, will be happy to welcome any Canadians connected with the Drug and Chemical trades who may be visiting London at that time. The High Commissioner has been asked to make this invitation known to those interested.

The British Government has paid the Canadian claim amounting to \$81,126.22 arising in connection with costs of financing movements of personnel and stores by rail.

The British Empire Exhibition Labour Conference will be held in London in July, with the object of indicating the extent to which the Empire leads the world in labour legislation and its importance in influencing the progress in a similar direction throughout the world. Of the three principal speakers who are to be invited to address this Conference, Canada has been asked to suggest the name of a Canadian to outline Canadian developments along these lines.

The executive officers of the Council of the Church Education Corporation of Great Britain have kindly extended an invitation to visit their three schools in Sussex, Kent and Dorset to public officials and other guests from the Dominions interested in educational matters, who will be visiting London at the time of the British Empire Exhibition. The visitors' round time to time will be the guests of the Head Mistresses. The invitation has been accepted by the Honorary Organizer of the Overseas Education League of Canada.

The Canadian Official Mining News letter sent out this week consisted of an article by Mr. L. H. Cole of the Mines Branch of the Department of Mines dealing with Sodium Sulphate deposits in the Prairie Provinces. The News Letter in preparation for circulation next week is an article by Mr. R. T. Elworthy of the Mines Branch of the Dominion Department of Mines dealing with the manufacture of Carbon Black in Canada. The High Commissioner's Office has also recently sent out a bulletin dealing with the Central Electric Stations in Canada prepared from a report of the Dominion Bureau of Statistics at Ottawa on the Flour Milling industry of Canada.

The Canadian Office is advised by the London Trade Commissioner that he has learned from the Director of an important United Kingdom Trading Organization who has just returned from Russia, that prospects for Canadian Export Trade to Russia are improving, and that even now orders can be secured for certain products, provided that Canadian exporters are prepared to grant the necessary credit. The product chiefly in demand is agricultural machinery and implements. Messrs. Cooper intend their keen desire to deal in Canada and other Empire Food Products (more especially for breeding purposes) seeds, fertilizers and raw wools. Credits must be given for at least six months and probably longer. The organization interviewed is prepared to act for Canadian firms either in the capacity of merchants or manufacturers' agents.

The London Trade Commissioner has previously reported that arrangements have been made with an important Association whereby leading firms in the chief cities of the United Kingdom will make window displays of a week's duration of Canadian Food Products during the coming summer. The Glasgow Trade Commissioner states that such touch with the visitor by holding among these is Messrs. Cooper and the Secretary of the Commercial Co., Ltd., with Headquarters at Glasgow, Scotland.

THE CANADIAN HIGH COMMISSIONER'S OFFICE IN LONDON WEEW BY WEEK.

Consecrated Professor Enriches His University

(United Press) DELAWARE, O., April 30.—Perkins Observatory at Ohio Wesleyan University which will honor the third largest telescope in the world, is being built mostly with the life savings of Hiram M. Perkins, an obscure college professor.

Prof. Perkins' salary never was more than \$1,800 a year, but by keen business sagacity and fortunate investments he accumulated \$300,000, every cent of which he gave to Ohio Wesleyan. He taught in the institution for more than half a century. The professor did not live to see his life's dream realized as he died at the age of 91 several months ago.

Perkins' telescope will be a 61-inch reflecting one and workmen are reflecting the metal cap for the building, which will completely enclose it. Work on the 61-inch mirror is well under way and the telescope mounting has been ready for some weeks.

The steel top for the telescope dome weighs 168 tons, mounted on wheels so that it will revolve on a 460-ton concrete pier, which forms the base of the dome.

The total weight of the instrument will be 37 tons, and the mirror will add a weight of 270 pounds. Despite its great weight the telescope will be so delicately balanced that it will require only the same amount of current necessary for an electric lamp when in use.

The telescope will make visible to the eye stars of the eighteenth magnitude, and make possible photographs of stars of the nineteenth and possibly the twentieth magnitude, according to Ohio Wesleyan astronomers.

End of the World

(By Dominion News Service) MOSCOW, May 2.—Peasants in the Vorenezh Government in the Ukraine are so alarmed over the reports of volcanic disturbances in Kamchatka and predictions of the end of the world that they refuse to work any longer.

Russian newspapers reporting first the details of Japanese disaster, then the earthquakes at Kamchatka, have apparently begun to filter through to remote districts, and the peasants, many of whom have never heard of an earthquake before, are gravely disturbed.

SEES DANGER IN SMALL HATS

Doctor Points Out Danger to Women NEW YORK, April 30.—Dr. Charles E. Pabst, of 396 Franklin Avenue, Brooklyn, a former medical examiner, warned women yesterday of danger in the small hats now in style.

These tiny-bell-shaped hats that women are wearing are all right for the winter and early spring, said Dr. Pabst, "but in May, June, July and August, they will injure the sun to work havoc with their skin." During these months the sun has powerful actinic rays. Not only are they filled with powerful heat but they also exert a chemical action on the skin. They produce what is known to the medical profession as dermatitis, an inflammation of the skin accompanied by scaling and redness. This condition may become chronic.

"When once the skin has been exposed to the sun for too long a period, it is often too late to restore it to its former condition. Women who stay indoors during the winter usually overdo walking and sitting in strong sunlight when Spring and Summer come.

"The old-fashioned sunbonnet gave the women radiant complexion. Glasgow. This firm maintains large stores in the leading centers and their window displays will be the product chiefly in demand is agricultural machinery and implements. Messrs. Cooper intend their keen desire to deal in Canada and other Empire Food Products (more especially for breeding purposes) seeds, fertilizers and raw wools. Credits must be given for at least six months and probably longer.
