MORE THRILLING THAN "PAID" OR "THE TRIAL OF MARY DUGAN!"

Former Islander Meets Death While Cleaning A Rifle

The following article, describing the accidental death of a native of Georgetown, this Province, appeared in a Duluth, Minn., newspaper recently:

Accidentally shot when he started to clean a rifle in his office, 315 Torrey building, this morning, William A. Hicken, pioneer Duluthian, real estate operator and the city's first safety commissioner under the commission form of government, died instantly.

Mr. Hicken reached into a closet where the gun was kept in a case and pulled it towards him to clean it a few minutes after he told E. M. Kelly, who had been in the office, that he thought he had better clean the rifle.

He had inserted classified ads in the Duluth Herald and the News-Tribune yesterday offering the rifle for sale.

Police Chief R. E. Donaldson, who investigated, said the shooting was evidently accidental. Coroner C. F. McComb confirmed this.

Miss Theresa Anderson, 2231 West Sixth street, his stenographer, was the only one in the office at the time of the accident.

Mr. Hicken was widely known in the city and had been active in politics for many years, and in church affairs in Duluth.

He served in the state legislature in 1917 and was a city alderman during the aldermanic form of government.

When the commission form of government was adopted here in 1913, he was elected as the first safety commissioner, serving two years, 1913 to 1915. During that time he inaugurated a number of reforms.

Came Here in 1880

Born in Georgetown, Prince Edward Island, Canada, Mr. Hicken came to Duluth in 1880 to engage in business. He was active in the early development of the city. He was also active throughout his life here in civic affairs and with the Duluth Board of Realtors.

He is survived by his wife, two daughters, Estelle and Alice, of Duluth, and a son, William P., of Charlevoix, Mich.; two brothers, Joseph, of Duluth and J. H. Hicken, of Missoula, Mont., and two sisters, Mrs. Stephenson and Mrs. McLeod, both of Winnipeg. The family resides at 4621 Cooke street.

IN MEMORIAM MISS RUBY I. FORD

On Tuesday, September 20th, Miss Ruby I. Ford, a very highly esteemed young lady of Glasgow Road, passed peacefully away at the home of her father and mother, Mr. and Mrs. James Ford, at the age of 22 years.

The deceased had been in a rather poor condition of health for some time, but it was hoped that during the summer months her health might be quite fully restored. For several weeks though, before the coming of the end, it was evident to all that instead of gaining in strength, she was losing. As time went by, her supply of reserve strength was gradually less and

The whole world called her bad—but her only sin was love and a sacrifice no one would ever know!

Bayard Veiller, that master of thrilling drama, here tops his greatest triumph!

IF ROOSEVELT IS ELECTED

(Canadian Press)

OTTAWA, Oct. 29.—Election of Governor Roosevelt to the Presidency might pave the way for freer exchange of goods between United States and Canada, the House of Commons was told today by Hon. W. D. Euler, former Minister of National Revenue.

In anticipation of the Democratic candidate's election "and it looks that way," Canada should not bind its hands in trade and tariff negotiations with other countries, Mr. Euler said. The five year term of the Anglo-Canadian trade treaty placed a severe handicap on the concessions Canada might give United States in return for accepting Dominion products at lower tariff rates.

"I have no particular love for our American friends as far as business is concerned, said Mr. Euler, but I would not cut off my nose to spite my face. It may be that after the next election—and it looks that way—the United States Government may change its attitude and it may be found that Governor Roosevelt if he is elected, will make certain proposals, possibly allowing our lumber to go into that country. And our fish might be another product.

Hon. Hugh Stewart, Minister of Public Works, "He (Roosevelt) did not say so." "He has not said no," returned Mr. Euler who then referred to Governor Roosevelt's plan to call an international conference on tariff matters.

The Minister of Public Works again interrupted. "Did you notice a recent announcement in which he (Roosevelt) assured the farmers of United States there would be no reduction of their protection."

Governor Roosevelt, said Mr. Euler, qualified this statement with the word "temporarily"—"and that would indicate the time may not be very long." The House dived all day on the treaty debate in anticipation of a vote Monday. For the most part Government supporters withdrew leaving the floor to the opposition.

Winnipeg Youth Missing Since Last Saturday

(Canadian Press)

CHICAGO, Oct. 29.—The search for 14 year old Ross McDiarmid, son of John McDiarmid, Manitoba Minister of Mines, and Natural Resources, missing since last Saturday from Winnipeg, continued today with the aid of relatives here. John McDiarmid, the boy's brother, and Peter McDiarmid, Ross' uncle, announced they had traced him to Red Wing, Minn., and Lacross, Wis. They said Ross probably was attempting to hitch-hike around the world, as he previously had planned. The boy's description was broadcast and police were instructed to make an effort to locate him. Young McDiarmid disappeared a short time after attending art classes last Saturday.

On a ship which recently left Peterhead, Scotland, for Lenograd, Russia, were 14,700 barrels of herrings.

Vital Statistics For September

According to a Bulletin issued by the Dominion Bureau of Statistics, births registered in September in 52 cities of Canada numbered 6,399, deaths 3,421 and marriages 2,767 as compared with 7,096 births, 3,574 deaths and 3,187 marriages in September of last year showing a decrease of 9 1/2 percent in births, 6 1/2 percent in deaths and 13 percent in marriages.

Births registered in the same cities during the nine months January-September of this year totalled 61,163, deaths 34,189 and marriages 20,752 as against 65,338 births, 34,255 deaths and 22,532 marriages during the corresponding period last year. The reduction in deaths was very slight but in births it amounted to 6 percent and in marriages to 8 percent.

New Glasgow

Mr. Edwin Murphy, merchant, Sea View, left for Halifax, N. S., on a business trip.

Mr. and Mrs. J. H. Williams and family, of Charlottetown, were visitors to New Glasgow Sunday last.

Miss Mildred Brown, P. W. C. student, spent the week end with her parents, Mr. and Mrs. George Brown.

Mr. and Mrs. James Andrews, Hunter River, have returned from an enjoyable motor trip to Halifax and Moncton. They were accompanied by Mrs. James Bulman, New Glasgow, and Mrs. Elias Bishop, Summerside.

Mr. Peter Martin and his sister, Miss Ella Martin, Hunter River, have returned from Halifax, where Mr. Martin was showing a number of live stock exhibits at the Exhibition. Mr. Martin was the lucky winner of some valuable prizes.

Mrs. John Clark and daughters, South Rustico, were the week end guests of Dr. and Mrs. A. B. Stevenson.

Mr. and Mrs. Blois Andrews, Charlottetown, were Sunday guests of Mr. and Mrs. Blair Andrews.

The New Glasgow Women's Missionary Society assisted by the Grace Bishop, Mission Band, held a Thankoffering service in the New Glasgow United Church Sunday evening, October 23rd. The Pastor, Rev. W. A. Patterson, presided, and the following program was carried out: Dialogue, Prayer, Hymn, "Jesus Shall Reign," Scripture reading and Prayer by Rev. W. A. Patterson. Solo, "The Beautiful Garden of Prayer," by Miss Bernice LePage. Responsive reading, "Thy Kingdom Come," by Circle members; Solo, "Carry Your Cross With a Smile," Miss Anna Stevenson; Dialogue, "Christian Stewardship," by the Misses Margaret Howatt, Inez Stevenson and Florence Laird. The offering was received by Misses Lynetta Brown and Inez Stevenson; Solo, Mrs. W. A. Paterson. The meeting closed by singing, "Breathe On Me Breath of God," and Benediction, pronounced by Rev. Mr. Patterson. The offering received was a generous one, which goes to the Missionary Society.—N.

While off duty 433 London policemen were injured by falling or slipping on streets last year and 397 were knocked down by motor vehicles.

New Industry Will Increase Farm Stock

HALIFAX, N. S., Oct. 29.—That the Maritime Provinces can produce more and better stocks by using a new Nova Scotia product, fish meal, is the belief of Dr. Stanley Beatty, of the Fisheries Experimental Station here.

Following Dr. Beatty's years spent in research into the possibility of improving farm stock through the use of fish meal, a by-product which has hitherto been thrown away and totally wasted, a new industry has grown up in Nova Scotia. Firms are now exporting this fish food to the United States, Ontario, England, Germany and Holland. There are plants located at Lunenburg, Liverpool, North Sydney, Lockeport and Halifax in Nova Scotia, and at Black's Harbor in New Brunswick.

"There is a market of 8,000 tons annually in the Maritime Provinces if the farmers will only realize its possibilities and use it in the same proportion recommended by the feeding standards and in the same proportion as it is now being used by prosperous producers in the United States and Germany," said Dr. Beatty. "That is three times the amount now being produced by our Nova Scotia plants."

He described the value of this fish food to growing animals: "The sea is a reservoir for every element known to mankind. There is probably a million dollars worth of gold—and every other valuable mineral in the waters of Bedford Basin. Lime and phosphates are only correctly balanced in fish meal and milk. These constituents are valuable in preventing the destructive disease of rickets.

"Fish meal has the properly proportionate quantities of iodine. There are iron properties in it useful in blood formation and constituents helpful in the formation of bone and teeth.

"Goitre in the Maritimes is almost unknown because of our proximity to the sea. But in the Great Lakes and Western districts it is often a curse. Frequently in limestone regions where the leaching process has washed iodine from the soil, the plants and the soil are so lacking in these elements that disease spreads rapidly to alarming proportions. Animals and human beings in these districts have enlarged thyroid glands. In Nova Scotia, fortunately, this condition is seldom met with.

"I have known," continued Dr. Beatty, "of stillborn children in the western districts caused undoubtedly from lack of iodine."

Dr. Beatty said that in Northern European countries, especially Germany, 60 per cent of the hogs were fed and fattened on fish meal. Holland consumes 20,000 tons annually with excellent results.

"The quality of Canadian hogs has not been uniform enough for the English market—that is why the Danes have captured the sales. But with a preference in our favor the Maritime farmer should make every preparation for capturing that market."

The scientist told an interesting story of the Indians in the Pemberton Valley, British Columbia, who fed their pigs, salmon otal. Goitre was unknown amongst them. When the white man came, however, there was an epidemic of this disease and it was found that the reason for it was that the white population had failed to use fish by-products in feeding their animals.

Notre Dame Academy

(Written by a Graduate) On June fifteenth, Notre Dame Convent, opened her stately portals and bade welcome her old graduates, the occasion being the seventy-fifth anniversary of her establishment in Charlottetown. Gladly we returned after long years to rest awhile within your hallowed walls. Dear Alma Mater, how wisely and gently you guided our youthful steps, and fondly we recalled the

Predicts Change In Steamship Design

PASADENA, Calif., Oct. 29.—A revolutionary change in the design of steamships involving a five per cent. increase in length which would bring an increase in efficiency of almost 100 per cent., is near birth in the experiments of German scientists, Dr. Fritz Zwicky, physicist of the California Institute of Technology, said yesterday.

Dr. Zwicky, who returned recently from a trip through the United States and Europe in which he studied tests of steamship models, said the principal experiments indicated that if most ocean liners were severed in the middle and a section inserted, increasing their lengths but slightly, an immense improvement would be obtained.

He told of watching tests near Hamburg, Germany, in which paraffin steamship models were propelled at the rate of 30 miles an hour. From these tests have come the theory of an improved design through increased length, the physicist said, and equally important research is under way on the shapes of prows and sterns.

The scientist predicted the future would bring considerable change in the types of prows. One of these would be designed with a bulge both at top and bottom, leaving the centre concave. Another proposes a straight profile, jutting forward at the top. Tests of this the "barge" type, have indicated it is better adapted to rough seas.

sweet routine of prayer, study and recreation, the dear old chapel, where we trod in silence, and offered the sweet incense of prayer. Will ever be a lasting memory. When we entered our classroom and gazed upon each familiar scene, unbidden tears did flow. Clearly we remembered the last essay written before graduation by the class of '85 "Trip around my desk," and which the writer still possesses. On graduation day, when we knelt to have placed on our heads, by the hands of Venerable Bishop McIntyre, the floral circle, which was the distinguishing emblem of the graduate, our hearts were swelled with a pardonable pride, for that was our day, but our joy was tinged with sorrow, for we realized that on the morrow we must leave our loved home, and stand upon the threshold of an unknown world, but we had naught to fear for Alma Mater sent forth her graduates, armed for the defense, with hearts and minds courage and culture of deportment, which can only be acquired in a convent. After graduation came separation, some returned to pass their lives within her peaceful enclosure for

They heard a voice we did not hear, That said you must not stay, They saw a hand we could not see, Which beckoned them away. Some answered the summons of the Angel of Death, whilst others enjoy their own firesides and impart to their children the teachings of Notre Dame.

With the passing years silver locks adorn our heads and lines furrow our brows but our hearts remain youthful for Notre Dame taught us, that it is the clear, active mind that can enjoy God's beautiful Creation.

Her doors are again closed and sadly we retraced our steps, but the class of '85 has entwined Alma Mater in the wreath of memory, the leaves of which never wither.

At the morning service of the United Church at Centreville Bedeque, Rev. W. N. Byers, Maritime Sec'y. of the Lord's Day Alliance, was the special minister, who delivered a very inspiring message to a large congregation. The members of the choir, rendered singing and music very effectively.

Bedeque Mr. and Mrs. Charles G. Dunn and Messrs. Frank and Merrill Dunn, all of Ellerslie, spent last week-end very pleasantly with relatives and friends in Preetown and vicinity. Farmers in this section of the country have been busily engaged in grading and hauling to the market, their surplus potato crop, such as has been stored in sheds, etc. The price of 20 cents has been received, which is somewhat more encouraging than last season's price of ten cents per bushel.

Scout News and Notices The Purpose of Scouting What to do with our boys is a problem of ever-increasing perplexity. For many the Boy Scout Association supplies an attractive and effective answer; and anything that benefits the boy, our future citizens must be a benefit to our province. Our Island provides an ideal spot for Scouting, in the woods and streams there are many opportunities for the outdoor interests of our boy; and the community provides room for the exercise of the real Scout spirit—Loyalty to God and King, and usefulness to others.

Mrs. David Schurman (a former resident of this community) left last Saturday for her home in Reading, Mass., after spending the summer months with relatives in Bedeque, Summerside and other parts of the Island. A number of friends from Bedeque attended the funeral services of the late Mrs. Daniel E. Mahan, from her late residence in Darnley, on Tuesday afternoon, which were very largely attended.

Mr. and Mrs. Charles Murray, have recently returned to their home in Norboro, after a delightful vacation spent with relatives in Boston, and other American cities. Rev. L. P. Archibald was the special minister at the services in the United Church, at Georgetown on Sunday, October 23rd. The sincere sympathy of the community is extended to Mr. and Mrs. William Heckbert (nee Miss Sadie Craig of Chelton) in the sudden passing of their baby girl, little Florence Ruth, at the tender age of one month. The little one was taken ill with whooping cough and all that medical skill could do and tender nursing proved of no avail. There are left to cherish her memory, the heartbroken parents, and one little sister. The funeral took place on Thursday afternoon, and was quite largely attended. The remains were tenderly laid to rest in the People's Cemetery.

Miss Lily Wright, of Tryon, who has been spending a holiday with relatives and friends in New Annan has returned to her home. Mrs. John E. Cameron has returned to her home from a holiday spent in Halifax, N. S., the guest of her daughter, Mrs. Ronald Shaw. Mrs. Charles Black of Centreville Bedeque has been spending a few days visiting friends in Summerside the guest of Miss Arthur. At the morning service of the United Church at Centreville Bedeque, Rev. W. N. Byers, Maritime Sec'y. of the Lord's Day Alliance, was the special minister, who delivered a very inspiring message to a large congregation. The members of the choir, rendered singing and music very effectively. Miss Catherine Cash has recently returned to her home in Cambridge, Mass., after a short but very pleasant holiday with her parents, Mr. and Mrs. P. L. Cash.—B
