BLACK BEAUTY — Showing Wood Islands Monday, Sturgeon, Tuesday, Canoe Cove Wednesday, Annandale Thursday, Eldon Friday, Bridgetown, Saturday.

Mr. Arthur Jenkins, Georgetown was a business visitor to Montague on Thursday.

Dr. L. A. Johnston and Mr. Levi Power left on Friday morning for a hunting trip to Nova Scotia.

Messrs. Raymond Grant and Alie Carver, Charlottetown, were visitors to Montague on Wednesday.

Mr. and Mrs. Gordon Thompson, who were recently married at Halifax, are visiting in Montague, guests of Mrs. Thompson's grandmother, Mrs. Malcolm Gillis.

Mrs. G. H. Nelson, Montague, and Mrs. E. H. Nelson, Charlottetown, left on Wednesday for a two weeks vacation trip to Boston, where they will visit friends and relatives.

Mr. Lester MacLeod, Montague, accompanied by Misses Winnifred and Minnie Greene were week end visitors to Halifax. They were accompanied by Truro by Mrs. Wallace Campbell.

Mrs. Allister Stewart, Georgetown, spent Thursday in Montague visiting her son Clarence at the home of Mr. and Mrs. Bruce MacPhee. Clarence is attending Grade XI in Montague.

A very enjoyable birthday party was held at the home of Mr. and Mrs. Bud MacIntyre on the occasion of the celebration of the 5th birthday of their young son Ganet. With his young friends, guests a very enjoyable party was had by the youngsters.

Owing to some misunderstanding in the conditions set up for the Southern Kings baseball play-downs it has been found necessary for Montague and Georgetown to play off for the cup. Since Montague had won the first section, and Peakes the second section, it was understood that these two teams should play off for the cup, which Montague won.

Peakes, however, during this play-off series, Georgetown, the third place team and Cardigan, the fourth place team, played off with Georgetown winning this series. Now it is proposed that Montague must play Georgetown to schedule the winner of the summer series. The first game of this series was played in Montague on Wednesday with Georgetown taking the first game of the series by the score of 5-4, in what was a short inning game. The second game was the best out of seven games, with the winners taking the cup. In view of the short evenings, the dramatic impact of a turbulent plot first makes itself apparent.

On Saturday afternoon, September 28th, the 15th annual meeting of the Baby Band of the United Church of Montague was held in the classroom of the church with fourteen adults and sixteen children present. The devotional period was conducted by Mrs. A. S. Adams who also gave a short talk to the mothers on the joy and importance of training the children while they are very young. With Mrs. Leslie Macdonald at the piano all joined in singing "Jesus Loves Me" and "Jesus Bids Us Shine". The Band prayer "Our Father" was repeated. Young Gillian Taylor sang "Cuckoo", Dorothy Macdonald recited "God's Gifts", Dianne MacLeod sang "Praise Him" and David MacLeod recited "God's Promise". The Band Secretary, Mrs. Lester MacLeod, read the names of eight children graduating from the Baby Band to the Mission Band, and certificates were presented to those present. Mrs. MacLeod reported that there were twenty-one members enrolled, and that twenty-five dollars was raised last year. She also reported the enrollment of five new members. There are twenty-four Baby Bands in the P. E. I. Presbytery with a membership of 785 members who raised \$377.95 last year. Young Billie Kydd collected the Mite Boxes and Dianne MacLeod took up the collection. All joined in singing "Away in the Manger", after which Rev. A. S. Adams said grace, and a committee from the W. M. S. provided a delicious lunch of ice-cream, cake and cookies, which brought the enjoyable afternoon to a close.

Friday morning, opening of the fall shooting season, saw many trepid hunters take to the fields in search of the wily Huns. Early at the break of day many were seen slowly moving along the country roads, as hunters scanned the fields watching for the nodding heads of the feeding birds. Some hunters relate that the Huns were flushed with one party having flushed nine coveys in three hours which is good flushing. A few reported taking a bag limit, while others came home without a Hun pointer to mark the day's shooting. On looking over some of the specimens, some were found to be quite small and undeveloped, while others were full grown. Some experts of the late season might account for the underdevelopment of some of the birds. One large covey was flushed and which was reported to be a very small, which is undoubtedly the result of the past year's late season. Some hunters seem to be as many Huns as ever this year as last, and many parties were hard put to raise even one covey throughout the morning.

On Thursday evening, Sept. 30th, a card party was held at the Legion rooms. The card play was for ducks and the proceeds for the Souris Branch of the Legion.

Mr. Jack Creamer is at present ill at his home with pneumonia. Mr. Creamer is operator of a modern meat market on Main Street and a member of the Trustee Board of Souris High School. —So

Mr. and Mrs. Jack Daigle is still in hospital following an accident which they both encountered while returning by horse and wagon on the highway from blueberry picking. The horse escaped with a few scratches while the wagon was completely demolished. Mr. Daigle was seriously injured while Mrs. Daigle came out of the accident a little more fortunate.

On Tuesday evening, September 28th, P. Troop, 26 L.A.A. held their first parade after summer camp in Saint Mary's Hall, Captain Bands A/7 staff was present and four new members were enrolled. At present troop 26 L.A.A. has a strength of approximately fifty men. This winter troop 26 L.A.A. is planning a busy winter season for its members. Parades are held every Tuesday night.

On August 8th, 1948, the doors of Souris Hospital were officially opened and since then thousands of citizens from Souris and surrounding districts have passed in and out, with nothing but the highest praise, both for its efficient staff and the modern building with all its conveniences. The hospital, overlooking Souris harbour, presents a wonderful view for its patients, which is medicine in itself. Dr. Callaghan has been the hospital's capable surgeon since its doors opened. Dr. Callaghan is now joined by Dr. Burdette whose office is located on Main Street in the same building where Miss

Georgetown And Vicinity

A week-end visitor at St. David's Manse was the Rev. W. S. Godfrey, D. D., superintendent of Home Missions for the Maritime Conference of the United Church. Dr. Godfrey was the guest preacher at the 68th anniversary at Sturgeon United Church on Sunday.

Among Georgetownians who have recently left for college is John H. Boyce, son of the Rev. and Mrs. S. J. Boyce of St. David's Manse after completing the course for the Engineering Certificate at Mount Allison, John was employed for over a year by the Dominion Department of Public Works at Charlottetown. He has now entered Nova Scotia Technical College, Halifax, to study for his Engineering Degree.

A large crowd attended the Bingo, lunch and dance held in the Rink on Monday evening, under the auspices of the Georgetown Community Welfare League. Bingo was enjoyed by a large number of citizens until about 10:30 p. m. following which a lunch was served and the remaining hours of the evening given over to dancing, which was thoroughly enjoyed. The community Welfare League wishes to thank all those whose patronage made a successful and enjoyable evening possible.

Favoured by ideal weather, on Sunday, September 28th, the sixty-fifth anniversary of the opening of the present Sturgeon United Church was fittingly held. Services were conducted by the minister, the Rev. Sidney J. Boyce B. A., who on behalf of the congregation, gave a cordial welcome to all who gathered in such large numbers and also to the guest preacher, the Rev. Dr. W. S. Godfrey, superintendent of Home Missions for the Maritime Conference of the United Church. Dr. Godfrey gave inspiring messages in which he urged the fullest support of the greatest institution in the world, the Christian Church, and stressed the need of recruits for the Ministry. The Montague United Church Choir led the service of praise in the afternoon with Mrs. Howard Vickerson presiding at the organ. An Anthem by the Choir and solos by Mrs. Storey and Mr. Howard Vickerson added much to the spiritual tone of the gathering. At the evening worship a selection was rendered by the Sturgeon Choir, solos were given by Mrs. Storey and Mr. Storey. Mr. Howard Vickerson added much to the spiritual tone of the gathering. At the evening worship a selection was rendered by the Sturgeon Choir, solos were given by Mrs. Storey and Mr. Storey.

Mr. and Mrs. Martin Currie who recently left Montague to take up residence in Charlottetown, were guests at the home of Mrs. Elsie Watterworth on Sunday evening when a number of their friends held a social sing-song. After a delicious lunch served by the hostess, Mr. and Mrs. Currie were presented by Mrs. Storey and Mr. Howard Vickerson with a gift of money by members of the United Presbyterian Church as a token of their appreciation for the valuable work she performed as secretary.

King's County Board of Trade Special Meeting

A special dinner meeting of the King's County Board of Trade was held at the Pictou Hotel on September 30th, with R. W. Beck, the president, presiding. The meeting was attended by twenty members from various points throughout the district. Following a delicious dinner served by the management of the hotel, several speakers delivered addresses to the meeting. The first speaker was Mr. Vernon MacKay, who with Mr. Don G. Miller, and Mr. David A. Gray, represented the Pictou Board of Trade.

Mr. MacKay referred to the primary item on the agenda, that of the proposed Pictou-Georgetown winter ferry service and heartily supported the project. Last fall the Board of Trade held a special meeting at the Curling Rink at which it was proposed to have the Prince Edward Island ferry, which is now at Borden given a winter ferry service between Pictou and Georgetown. This service would be highly advantageous for Prince Edward Island, giving it an eastern outlet for produce during the winter season with the mainland. This would reduce transportation costs of many commodities both from and to the island and Nova Scotia.

Following the address of Mr. MacKay, the secretary read a copy of a resolution forwarded to Dr. Grant, M. P., in January, 1948, also the letters received from Dr. Grant. Dr. Grant also spoke, advising the Board to proceed with their resolution again this year. He spoke very encouragingly of this project, and advised the Board of Trade to renew their efforts.

The Board of Trade has always been the fore in fostering better means for trade and commerce, and their efforts in this project are to be commended, and should receive the support of all who can in any way assist their efforts.—Lan

Busy Season For Federal Inspectors

Behind the movement of potatoes and turnips which has become a big seasonal business in Prince Edward Island, is the highly efficient work of numerous inspectors employed by the Federal Department of Agriculture. The moving of table stock potatoes, turnips and fruit is under the supervision of District Inspector C. E. Shaw with William MacLeod as senior inspector. In order to properly carry out this work some thirty-six full or part time inspectors are stationed at various points in the province to inspect the produce of frost and some slight decay due mostly to delay in harvest but generally the work was so successful that enquiries for Island seed are being received daily.

After the inspection is made a certificate is issued to the shipper while a tag showing shipper's name and particulars of shipment of table stock potatoes, turnips or fruit is not moved until this is done. The certificate number must also be shown on the shipping way bill. This department makes a small charge for the certificate issued.

The inspection of seed which is under the supervision of Mr. S. G. Peppin is much more thorough. The product must first be inspected at least twice in separate times offener in the fields. Should the various fields pass these inspections, a certificate allowing shipment is then issued in the form of a tag showing the grower's number. One of these tags must be attached to each bag, before the shipment is allowed to move. It must again receive what is known as bin inspection, and if it meets requirements it is allowed to be loaded, where it is again inspected. If passed, a tag, showing contents grade and kind of potatoes loaded, is attached to the car. Prince Edward Island is the only province where this latter procedure is carried out. The carriers cannot move the car until this card is attached to the car.

Over 37,000 acres were inspected in 1948, and about 8,000 acres are to be inspected. When a growing field is turned down the

Nelle Caret operated her Lady's Wear Store with two doctors, Souris. Still has Dr. Macdonald, who is widely known for his long period of faithful service. Up until 1946, Dr. Macdonald was the only doctor in this part of the province, but despite his long and busy practice, he still carried on a big practice.

Hayling Island, Hampshire, England, Sept. 30—(Reuters)—Miss Frances Stigson, 26-year-old Lancashire champion, today won the British women's golf championship. She was one up in today's 36 holes final against Mrs. Zara Bolton, the Kent champion.

WORLD-CLIMATE BECOMING WARMER? For a decade now there have been occasional press comments that the earth's temperature was rising. Most of them merely mentioned the circumstances, but one or two connected the report with the fact that glaciers in different parts of the world were shrinking: "dying back" as it were.

And now comes a further report that the polar ice cap in the Antarctic is thinning out. A Norwegian scientific expedition headed by Holger Holgeresen, has just got back to Oslo with the news. The scientist said that evidence of climatic changes was gathered in the Bellinghousen Sea, the Amundsen Sea, and on Peter I Island. Observation on the ice showed that many glaciers had been considerably reduced since 1928, (when Norway claimed and explored the island with the news. The scientist said that evidence of climatic changes was gathered in the Bellinghousen Sea, the Amundsen Sea, and on Peter I Island. Observation on the ice showed that many glaciers had been considerably reduced since 1928, (when Norway claimed and explored the island with the news.
