Dartmouth Youth Charged With Attempted Murder

(C. P. By Guardian's Special Wire)
 HALIFAX, March 23—Two Dartmouth youths charged with attempted murder acted as their own counsel today during the swearing in of a supreme court petit jury.

Defence counsel was unavailable at the opening of the trial of John Saccary and Herbert Painting, accused of having fired shots at police pursuing their automobile through town today during the trial to save time.

Saccary made five objections before John W. Longley was designated defence counsel just as the jury was being sworn in.

The crown contends several shots were fired from the front seat of the accused car at Police Officer Walter D. Page of Dartmouth with "intent to commit murder" during a chase Nov. 17. Although the car from which the shots were fired escaped, the pair were arrested later the same night and the car seized. Pieces of glass, said to fit into broken sections of the rear window of the car were to be produced as crown evidence.

Saccary and Painting have also been charged on two counts of obstructing police officers in the course of their duties.

Make Appointment To Labor Post Released By Halifax Customs

(C. P. By Guardian's Special Wire)
 OTTAWA, March 23.—An Order-in-Council appointing Humphrey Mitchell, former Hamilton, Ont., Labor member of Parliament to the post of director of labor transfer, was tabled in the House of Commons today by Hon. Norman McLeod, Minister of Labor.

Closing of relief camps by the government was necessary because of the large numbers of men in employment elsewhere. Arrangements have already been announced under which the two railroads will employ many of these men, but others must be absorbed elsewhere. Mr. Mitchell, it is understood, will direct government activities in connection with transfer of these men.

The salary attached to the post of director of labor transfer is \$500 a month.

"Nickel" Shipment Released By Halifax Customs

(C. P. By Guardian's Special Wire)
 HALIFAX, March 23—Still shrouded in mystery, 223 cases of Canadian cargo labelled "nickel" were shipped today aboard the steamship Drottningholm for Gothenburg, Sweden.

Originally consigned to Hamburg, Germany, the nickel had been held here by customs authorities for more than a week while an investigation was carried on from Ottawa.

The cargo was seized just before it was to be shipped aboard the American freighter Liberty for Hamburg and its release came just as suddenly.

"We received notification from Ottawa to release the nickel and we did it," R. H. Pope, collector of customs here, said tonight. But the customs official would say no more.

Motorvessel Seized For Damages

(C. P. By Guardian's Special Wire)
 HALIFAX, March 23.—The British motorvessel Isabel H. eluded the American coast guard cutter Icharus in Bermuda waters last fortnight, only to be seized in a \$20,000 damage suit shortly after her arrival here.

Leo Murphy of Yarmouth, former member of her crew, laid the claim for injuries suffered while working on the ship. In addition he sought back wages totalling several hundred dollars.

The Isabel H. was seized by Sheriff R. A. Breton pending hearing of the claims in Admiralty court here. It is understood the vessel will be released on bond before the case comes up.

Murphy claims his hand was torn off in an accident aboard the boat.

B. C. Recreation Plans For Young Proven Success

(By Ivan Corbett, Canadian Press Staff Writer)
 VANCOUVER, March 23.—(C. P.)—Nearly 4,500 boys and girls who might be viewing sport from the sidelines are engaging in it themselves as a result of work of the Physical and Recreational Education department of the British Columbia government created in 1934 to see that every boy and girl who so wishes, especially unemployed and part time workers, has opportunity for recreational training in idle hours.

The scheme was sponsored by Hon. G. M. Weir, minister of education, and developed by Ian Eisenhardt, director.

Ages of the youths enrolled range between 16 and 24. They are trained by instructors in calisthenics, volleyball, basketball, softball, handball, boxing, wrestling, archery, track and field sports, gym hockey and tennis. Other games played if equipment is available are English and Canadian rugby, grass hockey, badminton and soccer.

Participants need not be outstanding as the department hopes they will be recognized by private clubs able to devote time and equipment to their coaching.

Each centre has weekly sessions where the classes compete among themselves. On scheduled dates all centres stage a mass meet in one particular sport, featuring the best from one centre against other centres for an aggregate point total. Prizes consist of medals and certificates.

The department staged a novice boxing championship and swimming gala in Vancouver, and held their first annual indoor track and field meet in New Westminster early in February. Weight-lifting championships were held here recently with athletes from Vancouver and its suburbs, New Westminster and Nanaimo taking part.

Other events on the programme concluding at the end of March are the second annual cross-country road race at Stanley Park, gymnastics competitions and a mass display at all centres.

Even after some of the boys and girls find positions in the commercial world, the enjoyment they received in endeavoring to develop their bodies keeps them coming to the sessions.

Enrollment has increased from 2,700 in 1934 to 4,482 to date, with 2,184 men and 2,298 women. There are more than 20 centres and applications have been received for establishment of 10 others.

Mr. Eisenhardt has been in communication with eastern centres with a view to establishing the project into a Dominion-wide recreational organization.

Cities supporting one or more organized centres are Prince Rupert, Victoria, Nanaimo, New Westminster and Vancouver.

Hess Appeals To War Veterans

(C. P. By Guardian's Special Wire)
 CASSEL, Germany, March 23.—(C. P. Havana)—Rudolf Hess, confidant of Chancellor Hitler, in an election speech here tonight appealed to German Great War veterans to associate their ideas as regards war with those of King Edward of England.

"In that great empire," Hess said, "the young King himself is a former soldier. He saw the war in all its horror. Moreover, we still believe that Great Britain is a refuge of peace. It were far better, indeed, if all those who are making plans for peace, would be from the ranks of former soldiers."

Hess said the Communists were trying to introduce "world revolutionary ideas through our western frontier." It was Germany, not France, whose security was threatened, he said in reference to the Franco-Soviet pact.

WORLD'S SUNDAY SCHOOL CONVENTION IN JULY AT NORWAY, WITH EXTRA TOURS

The World's Twelfth Sunday School Convention will this year be held at Oslo, Norway, from July 6 to 12, and the steamship lines of officially selected for travel to the Convention are the Norwegian America Line and the Scandinavian American Line. Arrangements have been made for the delegates to cross the Atlantic on the flagships of these two lines: The S. S. Stavangerjord and the S. S. Fredrik VIII, both sailing June 24 from New York for Oslo.

Many outstanding leaders of religious education from all parts of Canada and the United States will be members of the official delegations crossing on these steamers. There also will be prominent representatives from Latin America and the Far East, providing opportunities throughout the voyage for interesting personal contacts with Sunday School workers, as well as preliminary conferences and discussions.

The recreational aspects of the voyage are well provided for. The ships offer every facility for deck sports and games, and for social evenings designed to bring people together in a friendly and interesting way, and to promote pleasant companionship in travel. The opportunity to rest on board ship, for the enjoyment of sea air and sunshine, forms ideal preparation for the more serious work of the convention.

In conjunction with those departments from New York, two pre-convention tours across Norway at reduced fare have been arranged for the delegates, returning in time for the convention. In addition to these, seven post-convention tours featuring some of the most delightful journeys in Northern and Southern Europe by steamer, rail and motor, may be secured at an all-inclusive fare from New York.

For the homeward crossing, following the post-convention tours, steamers of the Cunard-White Star Line have been selected, with sailings from various continental and English ports, co-ordinating with the tours of Europe, and offering pleasant and economical Atlantic crossings, requiring from five to eight days. The return movement on these ships will be delightful in every way. Groups of people who have travelled together through Europe will enjoy a final period of recreation at sea, comparing impressions of the Old World and reviewing the work and study accomplished at the Convention.

Gravity Studies And Mining Development

OTTAWA, March 24.—In the present day, with the development of the mineral resources of the Dominion occupying a foremost place in our national economy, the advancement of our knowledge of the force of gravity and of the causes of the variation in its "pull" has become of added importance. The variation in the attraction of the earth in several causes, one being the difference in density (weight) of the minerals which lie beneath the surface. The Dominion Observatory of the Department of the Interior, in common with similar institutions in other countries is engaged in a study of the earth's gravity and the measurement of its force.

A recent practical application of the results of gravitational studies was made by the Dominion Observatory in co-operation with the Geographical Bureau of Canada when a torsion balance survey was made of the Malaszech salt deposit in Nova Scotia. An area of roughly one square mile was covered. About two per cent of this area is known to be underlain at a depth of about 100 feet by salt. Over this ground large and characteristic gravitational effects, apparently due to the salt, were measured. The salt is, on the average, lighter than the rocks in which it occurs and two areas of low gravity were disclosed, one outlining the deposit now being mined and another, favorable for the occurrence of salt, covering a larger area, hitherto unprospected.

This method, one of those known as "geophysical prospecting," is also applicable in searching for other valuable minerals.

The most sensitive method of measuring gravity is by timing the vibrations of a pendulum. The greater the force of gravity the faster it will swing, and the less that force the slower. On top of a mountain the pendulum will lose time because it is farther from the attracting centre and on a plain the pendulum will swing more quickly because it is nearer the centre. If the observations are made in the north the pendulum will gain if toward the equator it will lose. This is because the earth is not a perfect sphere but is flattened at the poles so that an observer at the pole is nearer the earth's centre than at the equator.

Before it is possible to make a valid comparison of the value of gravity at different places it is therefore necessary to make careful corrections for the elevation above sea level, for the latitude, and for the effects to topography over the whole earth, as well as for various agencies affecting the pendulum itself; these latter include temperature, the air-pressure in the sealed pendulum case, the arc of swing of the pendulum, and even the flexure or bending of the concrete base upon which the apparatus is mounted. All these factors are carefully measured and their effects meticulously computed, and the corrected time of swing of the pendulum is deduced to the ten millionth part of a second.

IN MEMORIAM

MRS. SARAH BEATON

In the earlier evening hours of Saturday, Feb. 22nd, Mrs. Sarah Beaton, a very highly esteemed resident of Iris passed peacefully away at the home of her son-in-law Mr. John A. Stewart at the ripe old age of 89 years.

The deceased had been in a condition of failing health for some years so that the coming of the end was not unexpected.

All that medical skill and kind friends could do to bring comfort to the departed in her declining years was done.

For some time it was evident to the loved ones that her supply of reserve energy was gradually growing less and less until on the above mentioned date her gentle spirit winged its heavenly flight.

Mr. Angus Beaton, husband of the deceased, passed away on September 29th, 1912. Mrs. Beaton now leaves to mourn the loss of a kind and loving mother one son and two daughters. The son is Mr. John M. Beaton, Grimshaw, Alberta, and the two daughters are Mrs. Fred L. Nelson, Cherry Valley and Mrs. John A. Stewart, Iris.

One sister, Mrs. Mary Thayer, Greenfield, Mass., also survives. Mrs. Beaton was a lady who was

quite widely and favorably known. Besides having been ever loyal and devoted to the members of her own family she took a deep interest in all things pertaining to the highest welfare of the school, the church and the community. Whenever any need was made known to her she was ever ready to help meet it. To her home all worthy comers always found a hearty welcome and no one needing aid ever called upon her in vain.

In times of illness she was to many a real "mother in Israel." She will live long in the memory of the many to whom she had often brought comfort and good cheer. The coming of the end had no fears for her. She "knew in whom she had believed and she was persuaded that He was able to help what she had committed to His trust waiting for the loving call of that Master whom in life she was delighted to serve and to honor—that Master whom at times during her long illness through the eye of faith she spoke of seeing in the home beyond, awaiting her coming—no, she was only waiting for His loving call "Good and faithful servant, well done, come home."

The funeral which was quite a large one was held on the afternoon of Tuesday, February 25th. The service was conducted by Rev. R. Hensley Stavert and was a very solemn and impressive one. The

Murphy claims his hand was torn off in an accident aboard the boat.

Railway Announces Excursion Fares to Easter Holidays

MONTREAL, March 24.—In preparation for the Easter holiday period, when many people wish to take advantage of the spring weather for travelling to visit relatives and friends in other centres, the railways of Canada will place in effect special low round trip excursion fares for the general public and also for teachers and pupils between all stations from coast to coast and Newfoundland, according to C. P. Riddell, Chairman, Canadian Passenger Association.

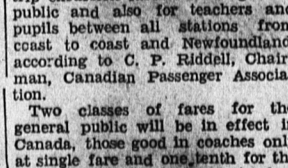

Two classes of fares for the general public will be in effect in Canada, those good in coaches only at single fare and one-tenth for the round trip; also good in standard sleeping cars, tourist sleeping cars or parlor cars at single fare and one-third for the round trip on payment of regular charge for such accommodation. Railway tickets will be good going between Thursday, April 9, and up to 2 p.m. of Monday, April 13. Return movement will be permitted leaving destination not later than midnight of Tuesday, April 14.

Fares for teachers and pupils during the Easter vacation period will be issued on the following basis: good in coaches only at single fare and one-tenth for the round trip; also good in standard sleeping cars, tourist sleeping cars or parlor cars at single fare and one-fourth for the round trip on payment of regular charge for such services. These railway tickets will be good going between Friday, March 27, and Tuesday, April 14th. Return movement will be permitted up to midnight of Tuesday, April 21, and pupils will be required to provide certificates of identification when purchasing their tickets.

With the arrival of the spring season, inducing greater incentive for travel, it is anticipated that the railways will experience a considerable increase in patronage during the Easter period, for which preparation is now being made.

CANADIAN NATIONAL

SUCCESS WOMEN'S INSTITUTE

The regular meeting of Success Women's Institute was held at the home of Mrs. Hugh Campbell on the evening of March 17th with thirteen members and five visitors answering roll call with a St. Patrick's joke. The President opened the meeting in the usual way. The minutes of last meeting were read and approved. Under the item of new business plans were made for increasing our funds. Two questionnaires were filled in, one on Public Health by Miss Grace Campbell,

the other on home economics by Mrs. Fred Campbell. Mrs. A. M. Green entertained the members with a contest and Mrs. Hugh Campbell read a form for a will. Program committee for next meeting are Mrs. John MacGregor, Mrs. J. M. Campbell, Mrs. Francis Murray and Miss May MacGregor. Meeting adjourned to meet next month at the home of Mrs. Bert MacKay. Roll call to be answered with a name of a book I have read from the Carnegie Library. Collection amounted to 56c. Ice cream and cake were served by the hostesses assisted by Mrs. Bruce MacKinnon.

Old English Wax
