### THE ROB ROY MINES ARE IN THE GREAT DIVIDEND PAYING

# Selkirk Range

#### OF THE ROCKY MOUNTAINS.

The Govt. Reports for 1900 are out and it will be seen that of the 29 Dividend payers of B. C. 21 are in the Selkirk Range. This is a wonderful Range of Mountains and literally teems with wealth. On the Rob Roy for instance, tons and tons of Ore are lying scattered and down the Mountain side, while a Shareholder who visited the property recently said that he had been intending to sell out his interests, but after seeing the quantities of Ore lying exposed and showing in the tunnels, he concluded it wiser to hold on to his shares and he is doing so. The Company have given an English Co. an option on their properties and have stopped selling Shares altogether in Ontario until this is settled.

I bought over 15,000 Shares last month and I know the Rob Roy mines (Scottish Canadian Co's property) well, and think I did well in buying them. Buying myself I have no hesitation in recommending others to do the same. Shares are .15 each. The Comstock Gold Mining Co's property is alongside the Rob Roy and is well worth investing in too. It carries Gold, Silver, Copper and Lead and as soon as the snow goes, work can be commenced right on the Lodge and Ore taken out from the first blow of the pick. Shares are .10 each. If you have a little money drawing 3 or 4 per cent why not try an investment in these Shares? There is a good chance for profit. I will gladly give particulars.
