

Was Bothered With Severe Headaches Is Not Troubled Now

Mrs. James Rossiter, Riverside, N.B., writes: "I was bothered with severe headaches, for years, and tried many different medicines, but to no effect. One day a friend told me about...

and after I had taken three bottles I found it had done me a world of good. Now I don't know what a headache is like. I certainly have great faith in Burdock Blood Bitters. Manufactured only by The T. Milburn Co., Ltd., Toronto, Ont.

Milady Beautiful

By Lois Leeds

Some girls and women have the idea that changing the color of their hair is as simple a matter as dyeing a piece of silk or cotton cloth. There is, however, a great difference between cloth and hair. The latter is a delicate, living structure which is influenced by the general health of the body...

CHANGING HAIR COLOR Some girls and women have the idea that changing the color of their hair is as simple a matter as dyeing a piece of silk or cotton cloth. There is, however, a great difference between cloth and hair. The latter is a delicate, living structure which is influenced by the general health of the body...

Tomorrow—Beauty Questions Answered Banishing Facial Wrinkles Smooth out the little wrinkles that make you feel old! LOIS LEEDS Care of Guardian tells in this leaflet how to give yourself an expert facial massage. She will be very glad to send it to you if you will enclose a self-addressed, stamped envelope with your request.

Motoring With Mary

Every revolution of the engine grinds out wisdom for the woman who drives a car, one of them has discovered.

By MARY JANE MOORE

THE DECISION TO BUY

If one can believe all this talk of the "woman's influence", the husband may sign on the dotted line when it comes to buying a car, but it is the woman who chooses which dotted line shall be signed. She it is who settles whether it shall be the dotted line presented by the salesman who represents the Fearless Four, the Silent Six, or the Elegant Eight. At least, that is what they say along automobile row.

We, no, so much editorial as marital, have just decided to buy another. I therefore know the extent to which the women really has influence—at least in one specific case, which probably is fairly typical. My experience impels me to pass on the knowledge to the growing sisterhood of the motoring realm.

When a woman comes to an experienced and conscientious hair specialist to have her hair dyed, he will not only examine her hair, but he notes other details of her appearance from which to judge the advisability of dyeing the hair. He may be very bloodshot her lids are very dark, or that her teeth are very poor. These signs point to a very low degree of physical fitness.

Art Gallery For Winnipeg WINNIPEG, Man., Oct. 30.—(By The Canadian Press)—Success has crowned the efforts of the members of the Society of Manitoba Artists in the matter of an Art Gallery here, and the opening of the gallery will take place at the end of October.

Government control of the milk supply of Australia has been asked by country milk suppliers. Representatives have pointed out to Premier Bavin that it would mean cheaper milk, less costly distribution, which would benefit both producer and consumer. The Premier is preparing a bill along the lines suggested.

Minard's Liniment for Backache. Government control of the milk supply of Australia has been asked by country milk suppliers. Representatives have pointed out to Premier Bavin that it would mean cheaper milk, less costly distribution, which would benefit both producer and consumer.

BLADDER WEAKNESS

If Bladder Weakness, Getting Up Night, Backache, Burning or Itching Sensation, leg or groin pains make you feel old, tired, peevish, and worn out why not make the Cystex 48 Hour Test? Don't give up. Get Cystex today at any drug store. Put it to a 48 hour test. Money back if you don't soon feel like new, full of pep, sleep well, with pains alleviated. Try Cystex today. Only 60c.

Freetown and Vicinity

Misses Ruth Simmonds and Helen Milligan, Summerside, spent the week-end in Freetown. The Freetown Dramatic Players repeated their four-act comedy drama entitled "The Colonel's Maid" in the Birch Grove Hall Saturday evening, Oct. 27.

Mrs. Eben Sandhorn and little children, Saskatchewan, are visiting Mrs. Sandhorn's parents, Mr. and Mrs. William Cairns, of Lower Freetown.

Mr. Wilbert Drummond has returned home from Imperial, Sask. Miss Hope Jardine and Mr. Emmett McIsaac attended the judging competition held in Charlottetown on Thursday last.

We are glad to report that Miss Evelyn Burns is regaining her former health after a severe attack of pneumonia. Mrs. Charles Bullard, accompanied by her son, Winston, have returned to their home in Massachusetts, after an extended visit with the former's sister and brother, Mrs. C. D. Taylor and Mr. Scott Jardine.

The many friends of Miss Lois Cairns, are glad to know that she is recovering from a slight attack of pneumonia. Miss Dorothy Muttart spent the week-end with her parents, Mr. and Mrs. Frank Muttart, Carleton.

Miss Minnie Lefurgey, Summerside, spent the week-end with her friend, Mrs. Emma Baker, North Bedouque. On Monday evening, Oct. 22, the friends and neighbors gathered at the home of Mr. and Mrs. Scott Jardine, after an extended visit with their fifteenth wedding anniversary.

Mr. Leslie Simmonds, in a few well chosen words explained their reason for meeting together, and wished Mr. and Mrs. Jardine many more years of wedded bliss. Mr. and Mrs. Jardine received some dainty and useful gifts, consisting of cut glass, china, etc. A very pleasant evening was spent in music and dancing, and a dainty lunch served by the ladies.

Mr. King of Long Island, N.Y., is in Freetown on business. We regret to report of the illness of Mrs. Eliza Waugh, at the residence of her daughter, Mrs. Scott McMurdo, North Bedouque.

Pownal News

Another of our Pownal girls has undertaken the great responsibility of governing a husband. The writer refers to Miss Mary Barnes, who spent part of her school days in the village where she resided with her grandfather, Mr. Ronald Vezey. Her marriage to Mr. Reginald Vezey took place at the manse, Hazelbrook, Thursday, the 25th, where two hearts were made to beat as one by the Rev. Mr. Lindsay. The bride was a picture of girlish loveliness in a frock of rose beige crepe back satin, with black picture hat.

Miss Margaret A. Jones, who has been engaged in nursing, returned recently from Cornwall. Miss Amy Smith was a visitor to the city Saturday. Miss Mary Driscoll, of Johnston's River, spent a pleasant holiday with her sister, Mrs. Ambrose McMillan.

The weekly prayer meeting of the Alexandra Baptist church was held on Friday at the home of Mr. and Mrs. Seymour McLennan. That these cottage prayer meetings are profitable and helpful to a community cannot be refuted. Why cannot every community carry on?

A quiet marriage was solemnized at the Hazelbrook Parsonage on Oct. 24, by the Rev. Robert W. Lindsay, when he united in holy wedlock Bernice Anna McCabe, of Alexandra, and Milton Gay Mellish, of Montague. The bride's dress was of powder blue flat crepe with hat to match and coat of rich fur fabric. She had no attendants. The groom is a son of Mr. and Mrs. Lester Mellish, Montague, and is in partnership with his father, who is a well known merchant of Montague. The bride is the youngest daughter of Mr. and Mrs. Layton McCabe, Alexandra, is a graduate of the Burdette Business Col-

Dispute Will Be Referred to Justice Dept.

(Canadian Press)

OTTAWA, Oct. 26.—A reference by the federal authorities to the law officers of the crown in connection with the Nova Scotia highways department and the federal department of marine and fisheries over the Straits of Canso ferry is now assured, it was said here today. The points at issue are being drafted and these will be submitted to the justice department tomorrow.

This is the next step to be taken to determine who should exercise supervision over the boats plying between Mulgrave and Port Hawkesbury and whether these should properly come within the provisions of the Canada shipping act, with respect to steamboat inspection.

Electricity to Supplant Drugs

(By British United Press)

LONDON, Oct. 31.—In 1935, or perhaps before that, doctors will prescribe so many units of electricity at a certain wavelength, when they treat patients! That is the opinion of an official of the Second International Conference and Exhibition on Light and Heat in Medicine, Surgery, and Public Health, which opens shortly at the University of London.

"Drugs," he said, "will probably still be used, but actino-therapy and heat therapy are making wonderful progress. Although the science was first developed in Germany, England has made a tremendous advance, and there is probably a bigger range of apparatus in this country than in any other."

"Elaborate apparatus to be used in hospitals and municipal clinics, which will be on show, by no means indicates the beginning and end of the usefulness of heat and light rays.

"There are now small lamps which people may buy and use as they are advised by their doctor. With simple precautions, they are quite safe—but there is, of course, a difference between first consulting a doctor and just going to a shop and buying a lamp.

"It is a great thing for medical men learn all about actino-therapy, for it is one way to combat the growth of quackery, which can be easily practiced with shining lamps and elaborate apparatus.

"In some cases the somewhat mysterious rays are more effective than drugs or the surgeon's knife, and in practically all diseases they are useful auxiliary treatment. "Rickets and so-called surgical tuberculosis can be cured by artificial sunlight, and mental capacity may be widened, especially in children, after irradiation treatment.

"Even pyorrhoea and corns might be considerably remedied. Ultraviolet rays are an aid in the detection of certain diseases.

"There are other wonderful ways of using the rays," said the official. "Margarine irradiated by the light is made as good as butter by the creation of a lot of vitamins. Milk's food value is improved, bread can be made more strengthening, and so on.

"Sunshine foods should, in fact, be very popular in the near future." Mystery is, however, closely associated with the rays as they are known at present. But distinguished British and Continental authorities who are taking part in conferences are among hundreds of scientists and others who hope, by continued research to derive what may prove a source of inexhaustible service to humanity.

Prince Shoots An Elephant

(Special to the Guardian) NAIROBI, Africa, Oct. 25.—The Prince of Wales has bagged an elephant and a big one. Advices received here today said the Prince, after stalking the perillous jungle, brought down the elephant near Murchison Falls. The tusks, of excellent ivory, weighed 65 pounds. On the previous day the Prince shot a crocodile.

The Prince was enthusiastic over his recent experiences and reported seeing numerous hippopotami, buffaloes and crocodiles. At the last hour he changed his plans and instead of returning to Entebbe, the chief Uganda protectorate, he intends to cross Lake Albert to the picturesque "Mountains of the Moon" where he will start a walking expedition.

Mrs. J. H. Judson, Alexandra, when the community folk remembered her with many suitable gifts. Also one at the manse, Hazelbrook, when the people of that church kindly remembered Bernice, she being one of the faithful members. They will make their future home in Montague, followed by the good wishes of their many friends.

That Car Of Yours

BY WILLIAM ULLMAN

Heart-to-Heart Talks With Automobile Owners and Drivers as How to Get the Most Out of Their Cars at the Least Expense

HEAT DOES THE WORK

One of the most common sins of omission in winter car operation is the owner's apparent forgetfulness of the fact that the engine is a heat machine. This is reflected in the widespread assumption that when an anti-freeze is put in the cooling system the whole matter of protection is assured. How about the large, exposed radiator surface? The anti-freeze does not permit the cooling system to become icy, but it fails to keep the engine from operating at a temperature dangerously low. It takes a radiator cover of some kind to do that.

GOOD TIRES ARE VITAL

Knowledge that the tire treads are in good condition removes a lot of the terror of bad weather driving. That is why, during the cold and slippery season, many motorists invest in new tires, even though the old ones are not entirely unserviceable. The latter can be stored in a dark place and worn out next summer.

MAKE SLOW SPEED SAFE

Drivers who decide that it is wiser to slow down when street conditions are bad do not achieve safety merely by their lessened speed. Their position on the thoroughfare is a big factor. The slower driver in the middle of the road really is a greater hazard to himself and others than the person who keeps going at a good speed. One can go slowly if one desires, but he should keep well over to the right side.

SIGNALS MORE NECESSARY

Closing all the windows of the closed car merely because the weather is a bit colder has its detriments other than in respect to ventilation. Its worst effect is that it substitutes a best, meaningless signal, or at worst, none at all, for those definite gestures that help to reduce accidents.

OLD DANGER RETURNS

This is carbon monoxide time; a period in which the unwary pay the penalty. The individual motorist should know that allowing the engine to run for a few minutes in the closed garage is deadly.

THOSE SUDDEN NOISES

Cold weather's first real visit frequently is marked by the development of a number of squeaks and rattles in the body of the automobile. If they come suddenly, the explanation is to be found in the fact that contraction of the metal and other members is responsible. In such a case, there is no need for worry.

OLD PRACTICE NOW BEST

Oil filtering devices have made oil performance much better—in the warmer season of the year. In winter, the chief deficiencies of the oil, gasoline, and water are not eliminated by the filter. It is an excellent idea, then, to revert to the somewhat ancient practice of changing the oil every 500 miles, as most car makers counsel.

CLOSE GARAGE DOORS

High winds are prevalent at this season. It is well to remember this fact when one has the impulse to leave garage doors open after trying out. Closed doors never blow off.

Man Learns He Is a "Woman"

(By British United Press) LONDON, Oct. 24.—A Leeds business man has just made the disconcerting discovery that officially he is a woman.

He is Ellis Miller, a British-born subject, aged forty-five. Recently Mr. Miller desired to visit the Continent, and applied for a passport. Instead of a passport, however, he received a formal application for a copy of his birth certificate.

Mr. Miller was born in Hull on June 1, 1883, and in order to satisfy the officials at the passport office he sent the necessary fee and full particulars to Somerset House, asking that the certificate should be forwarded as soon as possible.

He received a reply intimating that no such person as he claimed to be existed. Mr. Miller was seriously perturbed. He asked the superintendent registrar at Hull that the records of births in that city should be searched. He was again informed that no such person as Ellis Miller could be traced as having been born in Hull.

In desperation Mr. Miller came to Hull and inspected the register of births for 1883. Then the mistake of which he is the victim was made plain. He found that he was entered in the register as "Alice, daughter of Jacob and Rachel P. Miller."

But Evening Finds Her as Lovely as Ever

TONIGHT there's hardly a sign of the distressing cold she woke up with—no dull headache, no reddened, unlovely nose, no maddening sniffle to torment her and spoil her looks—no risk of ugly complications like catarrh or sinus trouble to endanger her health and to threaten her social program.

Thanks to these Quick-acting Vapors Now she can keep that fascinating engagement after all. And all because, when she first got up, she melted a little Vicks VapoRub in a bowl of hot water and inhaled its penetrating, healing vapors.

Direct—Pleasant—Effective With every breath, she could feel these pungent, refreshing, medicated vapors going straight to the trouble-zone, loosening the phlegm, clearing her head, soothing her dry and irritated throat, making her breathing easy and natural again. At noon, the same simple treatment over again. Once more, just to make sure, before she dressed for dinner—and now the worst of her cold is over.

Fine for Kid-brothers, too

For chest-colds, coughs or sore throats, Vicks is just rubbed on the throat and chest at bedtime. Then it is the warmth of the body that sets the vapors free—and, at the same time, this safe double-action salve acts through the skin like a gentle but effective poultice. There is nothing to upset delicate digestions, as too much "dosing" is so apt to do. Hence, Vicks can be used freely and often, even on the youngest child.

For free sample, write Vicks Chemical Company, No. 2 Gaston St., Greensboro, No. Carolina, U.S.A.

For all the colds of all the family

NOW OVER 21 MILLION JARS USED YEARLY

UNCLE RAY'S CORNER

WATER SPIDERS

I suppose you don't like spiders. Most persons do not; and for my while under water. They fasten the part I cannot say that I am fond of and then spin more threads in order to make the central parts of the web. After the spinning is finished, the spider does not at first see anything which looks like a thimble; but any necks. Look at one and see for yourself.

Water Spiders of the Kind

Water spiders of this kind are fairly common in England, and are also found in central Europe.

STOP SNOW DRIFTS BY SPECIAL FENCE

EDMONTON, Alta., Oct. 30.—(By The Canadian Press)—About 12 miles of the most heavily travelled main roads in various parts of the Province of Alberta will be fenced under government auspices against snow drifts, the sections chosen for the fencing being those which have most trouble last winter. Snow fences are not new in Alberta but this is the first time for the government to undertake the erection of such structures, the work being in connection with the anti-snowdrift campaign of the public works department. The kind of fence decided upon is likely to prove the most serviceable as the picket and wire-twist type, which will be erected with steel posts and will be placed on private land at a distance of about 60 feet from the middle of the road. The fences will be completed in the

Big Tombstone Is Stolen From Hants Cemetery

WINDSOR, Oct. 26.—When A. A. Rotter, monument dealer, of Kentville, went to the Falmouth cemetery this morning, in company with W. E. Brown, who resides nearby, to attend to a monument to the memory of Maggie MacDonald, deceased, of Falmouth, no trace of the stone could be found. It had vanished without leaving a trace. Mr. Rotter came this morning to undertake the work, but found that the granite monument, weighing 1,500 pounds, and valued at about \$160, had been spirited away. Mr. Brown, who had gone with Mr. Rotter to locate the grave of Miss MacDonald, found only the footstones on which the monument had rested. The community is indignant at the robbery.

A new tree, 500 years old, a landmark for generations and mentioned in history when Tintern Abbey, in the Wye Valley of Ireland, was in its glory, was recently burned. The tree was in the chapel graveyard near Tintern. An effort to rid it of bees ignited the trunk which burned for three days.
