## Industry is helping win the war... Industry must help build a peacetime world

Today, all industries must produce as never before—must speed the output of food, tanks, planes, guns, ships and other instruments of war—must conserve vital supplies—that we may win quickly a decisive victory.

Tomorrow, all industries must continue to produce—beating swords into plowshares—to prevent world-wide unemployment leading to ultimate economic collapse.

If the world is to prosper, there must be the same cohesion among the United Nations during the transition period and thereafter as now exists during the world-wide conflict. Internal stability here and in other nations can be gained and maintained only by sustained industrial production and by interdependence.

The people of this country, in common with the people of other lands, will prosper materially and spiritually when this war is ended but only if plans world-wide in scope are formulated promptly for A JUST AND DURABLE PEACE.
