CENTRAL GUARDIAN

This column is reserved for Queen's County news of local interest but advertising of a new nature may be inserted at 4 cents a word strictly payable in advance.

NEW COAL OFFICE—It is Mr. "H. B." Large who is representing the Maritime Coal Company here and not "R. B." as appeared.

MARSHFIELD BAPTIST church service, Sunday, June 11 at 8.30 o'clock. Dr. A. C. Vincent of Charlottetown will begin a series of sermons on prophecy.

HEATHERDALE HALL—Mr. Philip Bears will hold Divine Service in Heatherdale Hall, Sabbath June 11th, 7.30 p. m.

SUNDAY SERVICES—New London Group of the Presbyterian Church in Canada, services on Sunday, June 11th, will be as follows: 11 a. m., Long River; 2.30 p. m., Clifton; 7 p. m., Granville.

YORK PASTORAL CHARGE, Central Church, service at 11 a. m. Mr. Roy Vessey will preach; York Church, service at 7.30 p. m. Rev. H. R. Vessey, Morse, Sask., will conduct the service. Mission Band Service will be postponed till next Sunday.

MOTOR VISITORS—Mr. Ronald MacNeill, of Brooklyn, N. Y. accompanied by his sister, Mrs. M. Pembroke, of Somerville, Mass., stopped off here to visit Mr. and Mrs. L. U. Lund, Prince Street on their way to visit their old home in Wellington, P.E.I. They are making the trip by motor.—Moncton Times.

SUCCESSFUL FAMILY—There may be a few old timers in Grand River, Lot 14, P.E.I. who will recall the names of four McDonald brothers who lived there many years ago. There was "Squire" John A. McDonald, James McDonald, Patrick McDonald and Dr. Archibald E. McDonald. Dr. "Archie" went to Massachusetts when a young man and practiced his profession there until his death. One of his sons, Dr. R. C. McDonald, is a practicing physician in our neighboring city of Alameda. He was born in Boston, but spent several years of his young life in his father's native home, at one time as a student in St. Dunstan's college. Dr. R. C. McDonald has been a resident of California for 33 years and of the city of Alameda for the past 19 years. A cousin of Dr. McDonald, Mrs. Mary A. McIntyre, daughter of Patrick McDonald lives in southern California.—Oakland Maple Leaf.

WEDDING BELLS—A very pretty wedding took place in the Convent Chapel, Rustico, on May 10th, when Miss Angelina Doucette, daughter of Mrs. Alfred Doucette, of Rustico, was united in marriage to Mr. Florent Doinor, a prosperous farmer of Hope River. They were attended by Miss Cecile Gallant, niece of the groom and Mr. Theodore Doucette, cousin of the bride. The bride was attired in a sand Celanese crepe dress with hat and accessories to match, while the bridesmaid was dressed in pale blue. During the ceremony hymns were sung by the members of the Society of the Children of Mary, of which the bride was Secretary. Miss Freda Peters played the Wedding March. After the ceremony the bridal couple drove to the home of the bride's brother, Mr. Frank Doucette, where a dainty breakfast was served. They then motored to Charlottetown visiting relatives and friends, returning in the evening to the home of her brother, where the families of both bride and groom were assembled to spend the evening with them. Prior to her marriage the bride was the recipient of many beautiful and useful gifts at a shower given in her honor by her girl friends at the home of the groom's sister, Mrs. Henry Martin, also a beautiful prayer book from the Sisters of the Convent. They returned to Hope River the next morning followed by the good wishes of their friends for a happy wedded life.

GIFTED SOLOIST—The Congregation at Geddie Memorial Church last Sunday morning was fortunate in having the services of Miss Kathleen Phillips, of Tyne Valley, as soloist. Her rendering of the beautiful number, "Does Jesus Care," was deeply appreciated. Mr. V. E. Orsborn, of New London, preaches at this historic old church and his sermon on Luke 17-5, "Lord, increase our faith," was well received.

TO CONFERENCE—Rev. E. M. Aitken, B.A., Pastor of St. Andrews United Church left for Sackville, N. B., on Monday morning to attend the Maritime Conference of the United Church. He is making a trip by motor, accompanied by Mrs. Aitken and little son, who will proceed to P. E. I. to spend a few days with her parents. Also making the trip with Mr. Aitken are Messrs. John Campbell and W. J. Adams, both Elders and Lay delegates. The pulpit next Sunday will be occupied by Mr. W. C. Anderson, B. A., Theological student, in the morning and by Rev. Dr. Armstrong of Toronto in the evening.—Sydney-Post Record.

CELEBRATES BIRTHDAY—Mrs. Nell McNeill (nee Mary Walker), of Danville, Oregon, recently celebrated her ninetieth birthday. This venerable lady, who was born in New Annan, Prince Edward Island, the daughter of Robert and Elizabeth Walker, moved with her family to Danville about fifty-five years ago, says the Oakland Maple Leaf. Her husband, Neil McNeill, and two sons have been called to their rest. One son, David McNeill, resides in Boston. William F. Hunter, of Hillsboro, Oregon, is a nephew of Mrs. McNeill. Hosts of friends throughout the Townships unite in sincere and affectionate greetings to this highly esteemed resident of Danville.

INTERESTED VISITORS—Visitors to California from the "Garden of the Gull" the past few months were Mr. and Mrs. Angus N. McLeod. While in Oakland they were the guests of their daughter and her husband, Mr. and Mrs. Edward Stalder, 160 Nova Drive. They visited all the cities and towns around the Bay of San Francisco and called on many friends. In Burlingame they were greeted by an old friend, J. M. Vickers, who extended a warm welcome. Mr. McLeod is now over 84 years of age, was born in Brookvale, near Charlottetown, while Mrs. McLeod was born in Springfield. Her maiden name was Sarah McKinnon, daughter of the late Malcolm McKinnon. Looking through the old "P. E. I. Directory, 1889" and checking over the names in Brookvale (or Springvale) Mr. McLeod gave the same answer, except in one or two instances, "He has passed on." Mr. and Mrs. McLeod left San Francisco Thursday, May 18, on the steamship Santa Paula for Seattle, where they will spend a few weeks with their daughter, Mrs. Harry Rogers and family. They had a delightful trip up the coast. On June 4 they will continue their trip to Vancouver, B. C. where they will spend some time with two other daughters, Mrs. Neil Simpson and family and Miss Ella McLeod. From there they will continue their tour to the green fields, the red soil and the charming scenery of their native island, much improved in health and vigor.—Oakland Maple Leaf.

What a treat!

SERVE Kellogg's Corn Flakes and watch how eagerly appetites respond!

Kellogg's are far more than refreshing too. These delicious flakes are rich in energy and so easy to digest they help you feel keener, fitter. Made by Kellogg in London, Ontario.

Kellogg's for flavor

Rev. J. A. Ramsay Is New President Maritime Conference

SACKVILLE, N. B., June 8.—Rev. J. A. Ramsay, D.D., of Moncton was elected president of the Maritime Conference of the United Church of Canada at the first business session here Wednesday morning. The session opened in the United Church at 9 o'clock.

After prayer by Dr. John Pringle, of Sydney, and Dr. Young, of Stellarton, Dr. Brecken, of Sackville, began a series of devotional addresses and presented a plea for reality as a basis of persuasive preaching and teaching.

The conference was then constituted and the rolls submitted by the secretary.

The retiring president, Rev. W.G. Watson, D.D., expressed his thanks for the honor conferred on him and for courtesies accorded him during his term of office. He remarked that 200 ministers were receiving less than \$1200 salary this year, and some less than \$900. The situation demanded action.

For the election of officers, five names were placed in nomination, Dr. J. A. Clarke, one of the nominees having previously withdrawn. The ballot was taken and Rev. J. A. Ramsay, D.D., of St. John's Church, Moncton, received a clear majority. He was escorted to the platform by Dr. J. W. Falconer and Dr. H. C. Rice.

Rev. H. T. S. Gornall was re-elected secretary and Rev. G. A. Christie assistant.

Rev. A. G. Pentz moved that a telegram of congratulation be sent to Rev. William Ryan, of Auburn, Nova Scotia, who has attained his one hundredth birthday this year.

The report on plans for the Berwick Camp meeting was presented by Rev. D. C. Ross, of Kingston, N. S. The camp is to be held from August 4 to 14. Rev. J. S. Bonnell, of Winnipeg, a Maritime man, will be the preacher. Prof. Edwin Lewis, of Drew University, will be the Bible teacher and Dr. J. A. Clarke, of Halifax will conduct the ministerial retreat. A quartette from Boston will furnish the special music.

Rev. R. T. McKin, secretary of the British and Foreign Bible Society, spoke of the work being done by that organization.

Dr. Young, of Stellarton, presented an interim report of the condition of the Pensions fund, in spite of the difficult financial situation the market value of the securities has diminished only 2.4 per cent. less than the book value of the assets last year. Among the beneficiaries were 690 ministers, 654 widows and 150 children. The capital fund of the pension system had increased more than \$1,000,000 since 1925.

In the afternoon the lay session met, also the Pine Hill Alumni, and the remainder of the afternoon was given to the meetings of the sessional committees.

The evening was foreign missions night.

More than 500 delegates were in Sackville Wednesday night for the opening of annual meeting of the Maritime Conference of the United Church of Canada. Included among this large gathering of ministers and laymen, were Rev. Dr. W. G. Watson, of Pine Hill Divinity Hall, Halifax, president of the Conference, Rev. Dr. A. E. Armstrong, of Toronto, foreign missions secretary, and Rev. Dr. Peter Bryce, also of Toronto, secretary of the missionary and maintenance fund.

In the opening sermon, Dr. Watson declared that the world needed a new conviction of God, His power and purpose, and a willingness to bear suffering for the sake of others.

Rev. Dr. Watson presided and conducted the opening service, assisted by Dr. H. C. Rice, of Saint John, and Rev. Dr. A. L. Fraser, of Bathurst. Dr. Watson's sermon was based on Isaiah 40—"The Problem of Suffering." At the communion service held at the close of the sermon Rev. Dr. Watson officiated and the post communion prayer was given by Professor J. W. Falconer, of Halifax. Arrangements for dispensing of the elements were under the direction of A. E. Kaubach, of Halifax, assisted by elders from the various congregations.

In the afternoon Dr. Bryce met the Missionary and Maintenance Committee and Dr. Armstrong met the Foreign Missions Committee.

It is expected that the Station Sheet will be out about the end of the week. There are eight surplus ministers to be placed.

GARDENING

(Continued from page 2)

must be arranged low so diners are able to converse over rather than around, under and between sprigs of the centre piece! A good rule to follow is not to allow your centre piece to be over twelve inches high. The flowers and also the water must be fresh. There is nothing that jars Mr. Male member of the family's sense of comfort quite so much as a shattered rose petal in his water glass. His adherence to a philosophy of beauty even cannot be appealed to by way of explanation for such carelessness. He prefers not to drink his roses!

The esthetic points to be remembered in choosing flowers for a table; do not choose flowers that will clash in color with the color scheme of your food, nor flowers with a heavy scent. Heavy perfume is nauseating to some people, when mixed with the aroma of food. Of course, this rule is not one that has to be adhered to so rigidly in the summer, when doors and windows are open, as in winter when there is less free ventilation.

The next essential for an attractive centre piece is the container for the flowers. It of necessity must be low.

For the formal meal the container should be of crystal or silver, but pottery and colored glass are interesting for everyday meals. The important point in this suggestion, of course, is to choose the bowl that suits the flowers—since the effectiveness of the flowers is the essential point rather than the material of the container.

We have talked up to this point all around the centre piece and ignored the flowers themselves. After all, the beauty of your centre piece really depends on your choice and combination of flowers that are effective for table use. Upon experimenting you will find that the beauty of the individual flower will be intensified by contrasting it with other shades and lacy backgrounds.

For this time of year the following combinations are exquisite.

Long stemmed violets with dwarf pink tulips; purple iris and rose pink tulips; white lilacs and purple iris. All of the stems have to be mercilessly clipped to make them a comfortable height for the table.

Later the following combinations will be alluring: Sweet peas and baby's breath (an old favorite); sweet peas and larkspur or small spikes of delphinium; larkspur and cosmos; roses and baby's breath; roses and peonies, columbine and fern.

In the fall rakish centrepieces may be effected with marigolds and their own foliage golden glow and tiger lilies (these are particularly striking); yellow and white chrysanthemums with autumn leaves—oak leaves especially. Dainty effects may be created by combining asters with scabiosa and asters and cosmos.

In the summer the types of flowers used in centre pieces are inexhaustible, and your choice of flowers will depend upon your own garden supply. When the throes of creation are upon you, let them intrigue you into new combinations.

Low bowls for table use make a supply of wire holders and weighted "frogs" necessary to keep the balance to your bouquets.

Time is never wasted that is spent on selecting and arranging a centre piece or any bouquet—the glow of satisfaction that infuses your soul is worth all the time and thought.

The attractiveness of the table is the first impression one gets as he sits down to dine. After the meal is finished and he recalls it again to mind it is the atmosphere of the table he remembers—he might have to think hard to remember anything he ate. But flowers are atmosphere—they create charm—they even whip up the appetite.

Rogers-Baird Nuptials

The following from the Vancouver Sun of Thursday, June 1, is of interest to many friends of the bride and bridegroom in New Brunswick: "Rev. Canon Harold King officiated at the service at which Alexa, only daughter of Mrs. Rogers, 2046 Beach Avenue, and Harry Gordon Rogers, of Charlottetown, P. E. I., and Saint John, became the bride of Dr. Murray Baird, second son of Mr. and Mrs. Harry Porter Baird, of this city, formerly of Fredericton. Following the ceremony was a reception at the residence of Mr. and Mrs. Randolph H. Bennett, 1226 West Twenty-seventh Avenue. The bride, who was given in marriage by Douglas Robertson and attended by the groom's sister, Miss Anne Baird, made a lovely picture in an enchanting model of noisette nadine silk net, the shade most aptly described as robin's egg blue, enhancing the blonde beauty of the slender bride and forming a harmonizing contrast with her widely brimmed picture hat of cameo pink mohair. A coattee favoring be-puffed sleeves of elbow length, revealed the vertical tucking of the frock that billowed into fullness from above the knees to the heels of pink slippers. Lace mittens had been tinted to match the net of the gown, while Johanna Hill pink roses and pastel sweet peas formed a right-arm shower bouquet. Lace and net were alluringly combined in Miss Baird's frock, the richly patterned lace forming the skirt that was topped by a softly draped surplice bodice of net. Her picture hat of sheer mohair and shoes and gloves were parchment hued and her flowers formed a Dresden patterned nosegay. Dr. Douglas Sutherland was Dr. Baird's groomsmen, while Dr. Harold Caple and Nelson George Brown ushered the guests, approximately 100, to the pews that bore floral reservation marks. A program of nuptial music was rendered by the church organist. At the reception, the principals were assisted in receiving by Mrs. Rogers and the parents of the groom. A distinctive navy ensemble, embellished with French fagotting and drawwork, with hat and accessories of grey affording lighter contrast, was worn by the bride's mother, while Mrs. Baird's gown of black net was touched with white. Apple green triple sheer was worn by Mrs. Bennett, whose brimmed Milan of the same color shade was banded in white grosgrain and matched a topcoat, shoes and gloves of white. The wedding cake centred the tea table, at which Mrs. Douglas Robertson and Mrs. William Wright Turner presided! Serviteurs included Mrs. Sidney Abrams, Dr. Onhauser Seale, Mrs. William Brydon, Mrs. Verna Francis and Miss Jean Anderson. When Dr. Baird and his bride left later in the afternoon on a motor-trip, Mrs. Baird was wearing a chic traveling suit of black gabardine, black turban, white accessories and a silver fox scarf, the latter a gift of the groom. Dr. and Mrs. Baird will reside in the city."

Research Into Nuclear Chemistry

OXFORD, England, June 8.—Successful employment of a new type of "projectile" in probing the atom was mentioned by Lord Rutherford Friday night in a lecture before the Junior Scientific Club, which was attended by Dr. Albert Einstein and Dr. H. N. Russell, of Princeton. Results thus far obtained, Lord Rutherford said, indicated that the new projectiles—which he did not describe—would prove "of much importance."

Describing the activity which has been displayed world-wide in devising methods of producing and speeding up intense streams of protons and other particles for experiments in artificial transmutation of elements, Lord Rutherford said that progress would be much facilitated if scientists had at their disposal "copious streams of particles of much higher energy."

Doubtless also, he added, electromagnetic radiation of a very high quantum of energy would be instrumental in disturbing the stability of the nucleus and producing transformation, but probably of a different kind from that produced by swift protons. "Observations made on very penetrating radiation in our atmosphere where electrons and protons are present of energies higher than 100,000,000 volts, indicate that transformations occur of a novel kind with the appearance of a positively charged particle of mass comparable with that of the negative electron."

Speaking of the rapidity with which this work had advanced, Lord Rutherford added: "In a sense we are opening up today a new branch of knowledge—nuclear chemistry—where we deal with a combination and a dissociation not of atoms as a whole, but ultimate units which make up the minute world of the nucleus."

TRANSFER RADIO STATION BY AIR

EDMONTON, June 8.—(C. P.)—An entire radio station and all its delicate equipment has been moved by air from Lindsley Bay to Cameron Bay by Royal Canadian Corps of Signals with the co-operation of the Canadian Airways.

The station, equipped with both short and long wave apparatus, is functioning satisfactorily, it is stated. It is the first time on record such a feat has been accomplished.

Captain Stuart Hasting, commanding officer Royal Canadian Corps of Signals, announced every strategic commercial centre in the northland will be in touch with the outside world by July 1 when two standard radio stations, erected by the Dominion Government at Fort Rae and Fort Chippewyan, commence operations.

FUR TRADER NOW USES AEROPLANE

WINNIPEG, June 8.—(C. P.)—Traditional and picturesque methods of travel used by the fur trader in the far north are rapidly being abandoned in favor of the aeroplane, a canvass of the trade during the 1933-33 season indicates. More than 800 tons of merchandise has been carried to the remote areas of the Arctic and sub-Arctic by plane, and more than 400 bales of raw furs brought "outside" by air.

During the same period Hud-

\$10,000 Tube Of Radium Down Sewer

ALBANY, N. Y., June 8.—A capsule containing \$10,000 worth of radium was sought today in Albany's sewer system.

The radium, property of Albany Hospital, was lost early yesterday morning. A patient who was being treated for cancer accidentally allowed it to be washed down a drain. Men equipped with electroscopes promptly began a search of the city sewer traps. The instruments readily detect the presence of radium.

Eye Comfort

for eye workers is a matter of vital importance.

From early morn to late at night we "crowd" our eyes relentlessly, from one job to another.

How long will they stand it? Are you now enjoying that efficiency and comfort which ought to be yours?

Consult us if you are not: You have much to gain, and nothing to lose.

In any case the knowledge gained from an examination, makes it well worth while.
