Town Expenditures Higher Than Same Period Last Year

The Summerside town council held their regular monthly meeting last night, Mayor Campbell presiding over a full council.

Councillor Mollison submitted a statement comparing expenses this year with last year, showing that the amount for 1938 was \$9,231 more up to July 1938 than to July 1937. \$1,218.55 of this amount was controllable and \$8,012.46 uncontrollable.

Mayor Campbell stressed that the council must keep within its estimates and a special effort must be made to balance the budget, or the towns credit would be greatly impaired.

A motion was made to pave a number of short connecting streets between two paved streets. A motion was also made to lay a 24 inch pipe on the street from Duke street to save the street from destruction in the spring and fall. Bills and reports were submitted and passed.

NAZIS TURN (Continued from page 1)

shallow water as seen from the air. Weather continues to be perfect for flying and given a continuance the expedition may be able to complete its work this week.

The Province of Quebec is exercising its authority over Anticosti. The saloon of the Venture blowing themselves to the odd meal at the hotel find they have to pay the hospital tax on meals, even though the hotel is owned and operated by the Consolidated Paper Company.

The expedition's arrival taxed the hotel. It has scores of rooms, having been built in the boom days, but as the landlay explained, "I am afraid you will have to wait your turn for meals. Rooms, we have many but knives and forks, not so many."

The big recreation center provided by the company has taken on an extra lease of life as the naval and air men make friends with the young people of Port Menier.

CATHEDRAL (Continued from page 1)

bodies were counted. The ever, was the most pathetic, how most shocking to the war-hardened people of this much bombed city.

Bishop Antoine Fourquet, who has served 43 years of service in Canada, walked through the blood-smeared grounds after the attack, looking over the rows of bodies of many small children.

"I can't understand the reason for this," he said. "There are no guns and no soldiers in this area." "I shall refuse to leave the cathedral. It will always remain a haven for refugees."

NANCHANG BOMBED (SHANGHAI Aug. 9.—(Tuesday)—Japanese bombing planes raided Nanchang, Kiangsi Province capital in Central China, Monday killing 63 persons and wounding 83.

Two hundred houses were destroyed. A Japanese naval spokesman said military establishments near the city were struck by the raid.

Chinese asserted the Japanese advances by the Yangtze River toward Hankow, provisional Chinese capital, had been stopped in two days of severe fighting.

The Chinese said the raiders at several points, they reported, and inflicted 6,000 casualties in the two days of warfare. They admitted they suffered heavy casualties themselves.

The Chinese said they staged successful counter-attacks on both banks of the river in the vicinity of Klukiang, 135 miles downstream from Hankow.

Chinese bombing planes were said to have attacked and sunk three Japanese warships in the Yangtze and damaged four others.

Control Of Coal Importation Urged (C.P. by Guardian's Special Wire) TRURO, N. S. Aug. 8.—Proposal to establish a board to control importation of coal into Canada was before the United Mine Workers District 26 convention tonight.

Delegates to the biennial meeting, voice of 12,000 miners in the Maritime Provinces, heard President D. W. Morrison urge setting up of a board in the district executives report. He advocated the move as a means of solving the unemployment problem in the industry. They also heard sub-district which have cut the working time of Nova Scotia pits in half.

The convention adjourned early in the afternoon. About 120 delegates met in shift sleeves on internal opening day as workers on the problems of the industry were argued as officers reports were read and passed on to committees.

shots at the 600 and 900 yards ranges, 10 shots at each range. O'Connell, Capt. Neale Dow and the Lieutenant-Governor's match which closed the three-day annual meet of the Quebec Rifle Association.

Fourteen extra shots were fired before a winner was declared. At the end of the 20 regulation

Kensington Topple Vitas 6-3 In Crucial Contest

Kensington struck a severe blow to Vitamannas' playoff hopes last evening with a decisive 6-3 victory before the largest crowd of the year.

Besides being the largest crowd it was also the most boisterous and happily say contributed the largest collection which has been received from a league game.

The contest was another pitcher's duel, this time between the big Vitamannas veteran "Poney" Daley and slim right handed Ray Arsenault of the Kensington squad. The strikeouts were 9-7 in favor of Daley.

The hits 7-6 in favor of Arsenault and neither man issued a pass to first base. Another feature was the fact that not one of the 13 hits went for an extra base blow.

Kensington got away to a flying start with two unearned runs in the initial frame. Counting one in the second and one in the third the Vitamannas had things tied up by the end of the third. The 2-2 draw held until the last of the fifth when an error and four hits gave Kensington four runs and the old ball game.

Booster LeBlanc with two hits apiece in three trips, batted in all three runs. Jay for Kensington collected a single the first time at bat to knock in Kensington's first run but was struck out by Daley in his next two attempts.

There will be a game this evening between Red Sox and Pioneers.

BOX SCORE

Council Decides

There was a full attendance of councillors.

A by-law respecting dealers in second hand articles of junk was given a first and second reading and will be given a third reading at the next session of the council.

Mrs. James Bradley, wife of the late sanitary officer was granted a pension of \$20 per month for life or until marriage.

City Engineer Harold Messervy was instructed to start work on the Port Edward site in Victoria Park. An expenditure of \$15,000, supplied by the Federal Government will be made on the Port.

Greater part of the money will be used in repairing the breakwater beside the harbour. The Port Edward site was recently leased by the City from the Minister of Mines and Resources for a period of 20 years at a nominal rental, the Federal Government contributing money for renovation.

Following discussion as to conditions on the dump Coun. J. E. Blanche, chairman of Public Works was instructed by Mayor Foster to call his committee together and consider the procuring of a dump outside the city.

The committee was advised to present a report at the next meeting. The chairman of the committee, Mr. J. E. Blanche, introduced the report when he told of a very disagreeable odor from the present dump, located on the east side of the City adjacent to the roadway leading to Hillsborough Bridge.

Coun. A. A. Hennessey, chairman of streets, gave notice of a motion to amend the traffic by-law to make provision for the control of the parking of trucks and traffic in Victoria Park.

The Chairman of Police Coun. McIntyre, Chairman of Streets Coun. Hennessey, and Chairman of Public Property Coun. Blanche were instructed by Mayor Foster to get together and do what they considered in the best interest of safety with regard to traffic entering the paved roadway to Victoria Park from the road leading to the Charlotteown Tennis Club's property.

The present practice of scoring motorists in cutting across the roadway constituted definite accident hazard, Coun. McIntyre declared.

Coun. J. T. McKee, chairman of the fire and light committee when presenting his report called the attention of the Council to a house at 10 Grafton Street which had been condemned by the Board of Health some time ago. Nothing had been done as yet about tearing it down, Coun. McKee said.

Asked as to what could be done Recorder K. M. Martin replied that, according to information the building had been condemned by a meeting of the Board of Health and the owners notified. As no action had been taken the City could now pull the building down and add the cost of so doing to the taxes against the property.

\$50 was voted to enable representatives of the Fire Department to attend the Firemen's Tournament at Amherst this week.

"Collection of taxes was good." Coun. R. C. Chandler, chairman of the finance committee reported while collection of arrears in taxation was a "little better than good." \$35,000 of arrears had been collected to date as against \$41,000 for the 12 months of last year. \$45,000 was the estimated arrears for collection this year, Coun. Chandler said. Collection at the present rate should exceed the es-

FREELAND LODGE Offers Free Trip To Boston

The management of Freeland Lodge offers three free trips to Boston and six dollars in cash for three people who win the lucky door prize three times.

Ten weeks to try. You may be one of the lucky ones.

The two dollars door prize is presented at the regular Wednesday Dances at FREELAND LODGE.

Should you win it three times you will also have a trip to Boston and return.

The dates for the contest start: Aug. 3rd, Aug. 10th, Aug. 17, Aug. 24-31st, September 7, 14, 21, 28 - Oct. 5th.

CAR LEAVES FOR BOSTON OCT. 7th. Modern and Old Time Music. Tighish Orchestra. Admission 27c.

Hitch-hiking Family Find Toronto The Good Not So Good

(C. P. by Guardian's Special Wire) TORONTO, Aug. 8.—A Vancouver mother and her teen-aged daughter hitch-hiked from the coast to Toronto without being insulted once. But here it was different.

They said the three unescorted women enroute to Halifax.

"We have never been insulted, at least not until we arrived here," said Mrs. Florie, the mother. "Yes, we were struck so far for insulting remarks on the street."

Mrs. Hayes and her daughters intended to visit Ottawa on their way to the Nova Scotia capitol. She had visited Ottawa in 1936 when she played the role of Florie, the taxi-driver's sweetheart, in "Waiting for Lefty," which won the English award in the Canadian Drama Festival that year for the Vancouver Progressive Arts Club. "I was travelling in a private railway car then," Mrs. Hayes recalled.

The trip started out selling pictures of the sit-down strike in Vancouver Post Office. "But that's not news any more, so we had to sell pictures of ourselves," the mother said.

Dorothy said she prefers hitch-hiking on highways to riding trains. "We made the trip from Boston, Mass. to Port William, Ont., on top of a box-car in blinding rain," the girl said. "Give me the road, not the railways. It's easy on thumb rides, and comfortable, too."

Ready For Assault On Speed Record

(By The Associated Press) BONNEVILLE SALT FLATS, Utah, Aug. 8.—Two mechanical monsters, one tried and true, the other a newcomer, were groomed today for an assault on the world land speed record.

One was Captain George E. T. Eylon's "Thunderbolt," holder of the measured mile record of 311.42 miles per hour.

The other was fur broker John R. Cobb's "Railton" which made its maiden voyage under its own power today and surprised even its pilot by accelerating to 250 m.p.h. on a three-mile sprint.

Eylon, Utah, called for a call on the course until Aug. 25, is awaiting only a dry track to attempt to boost his own mark to 330 m.p.h.

lods followed by heavy rainfall. The tendency to harvest immature apples is very soon reflected in storage by the development of internal breakdown known as core flush. This disorder is very marked in the immature McIntosh apple, particularly Wagener apples which are not allowed to colour on the tree are very susceptible to scald in storage.

Core flush development is also influenced by fertilizer treatment and by storage temperature. Strangely enough, however, certain storage temperatures may be conducive to core flush in one variety but not in another. For example, the Pamosue apple is susceptible to this disease at 40 degrees F. whereas the reverse is true of McIntosh. Low temperatures such as 32 degrees are desirable from the point of view of control of internal decay. The problem therefore with apples is to avoid low temperature types of breakdown, and at the same time prevent rotting of the fruit.

There are several types of storage disorders and the control of these is rendered extremely complex when it is considered that each variety reacts specially in storage to the major influence of temperature and stage of maturity at harvest.
