Catarrh Of The Stomach Is Dangerous

Thousands Have It and Don't Know It, Says Physician. Frequently Mistaken for Indigestion—How To Recognize and Treat.

"Thousands of people suffer more or less constantly from furled, coated tongue, bad breath, sour burning stomach, frequent vomiting, rumbling in stomach, bitter eructations, gas, wind and stomach acidity and call it indigestion when in reality their trouble is due to gastric catarrh of the stomach," writes a New York physician.

Catarrh of the stomach is dangerous because the mucous membrane lining of the stomach is thickened and a coating of phlegm covers the surface so that the digestive fluids cannot mix with the food and digest them. This condition soon breeds deadly disease in the fermented, unassimilated food. The food is polluted and carries the infection throughout the body. Gastric ulcers are apt to form and frequently an ulcer is the first sign of a deadly cancer.

In catarrh of the stomach a good and safe treatment is to take before meals a teaspoonful of pure Bismarck Magnesia in half a glass of hot water as hot as you can comfortably drink it. The hot water washes the mucus from the stomach walls and draws the blood to the stomach while the bismarck magnesia is an excellent solvent for mucus and increases the efficiency of the hot water treatment. Moreover the Bismarck Magnesia will serve as a powerful but harmless antacid that may be in your stomach and sweeten its food content. Easy, natural digestion without distress. Bismarck Magnesia is not a laxative, is harmless, pleasant and easy to take and can be obtained from any local druggist. Don't confuse Bismarck Magnesia with other forms of magnesia, milks, citrates, etc., but get it in the pure bismarck form (powder or tablets), especially prepared for this purpose.

ROSEBUD

Smoking Tobacco

TO the man who enjoys a rich, satisfying pipe tobacco, ROSEBUD is as sweet and fragrant as the flower after which it is named.

It is always in condition. You can cut it to suit your own taste. Sold everywhere.

The work of catching the clams is hard, dirty, and unhealthy, but the lure of a valuable find calls many new fishermen to the field each year.

Several "wholesale" methods for catching the clams have been experimented with. Steam shovels, sand pumps, and other curious devices have been used, but with poor success, owing to the habits of the clam and the formation of the river bottoms.

It has now been fairly proved that the most successful method of catching clams is the "one-man outfit." A

flat-bottomed rowboat, or in some cases a craft with a small gasoline engine is used. A set of drag-net, consisting of two eight-foot iron bars, to which is attached a section of five netting filled with from three to five hundred four-point steel hooks, is carried. The net-bars rest in brackets along the side of the boat, and are cast into the water one at a time. The weight of the hooks and bar holds the net on the riverbed, while the force of the current drives the boat down stream. The clams are found feeding upon the mud deposits, lying back down, with shells open. As the net is dragged along the hooks enter the open shells, causing the clam to close, grasping the hook with a grip that holds until removed by force.

After a short drag has been made, and most of the hooks are filled, the net is hoisted into the boat and the empty one thrown out, to be filled while the catch is removed from the first. This operation is continued until the boat is well loaded, when a return

(Continued on Page Eleven.)

FRESHWATER PEARL FISHING

A Great Industry is the Catching of Clams.

It will probably seem strange to many people to hear of pearls being found in fresh waters. Yet it is true enough. Many of the inland waters of the United States abound in pearl-bearing clams, commonly called muskells. These clams have always been numerous, and have been used for many years for various purposes such as bait for fish and pig-feed while the shells have been crushed and used in road-building and the making of lime for fertilizers. All the time, however, the true value of the freshwater clam was unknown.

Within the last few years it has been discovered that they are pearl-bearing, and that many contain pearls of high value. Soon after this discovery a great industry developed in the catching of clams, and today thousands of people are engaged in

How Fat Actress Was Made Slim

Many stage people now depend entirely upon Marmola Prescription Tablets for reducing and controlling fat. One clever actress tells that she reduced two to four pounds a week by using this new form of the famous Marmola Prescription and, now, by taking Marmola Tablets several times a year, keeps her weight just right. All druggists sell Marmola Prescription Tablets at \$1 for a large case. Or you can get them by sending price direct to the Marmola Co., 361 Woodward Ave., Detroit, Mich. If you have not tried them do so. They are harmless and effective.

Economy to Fox Men

Good boneless horse meat shipped in boxes of 100 lbs. net, costs about half of what you pay for same quality feeds. No trouble—a post card brings it to you.

Discount of 50c per box on all orders shipped by Dec. 6th.

P. A. FARQUHARSON, Charlottetown. Phone 655 and 752 2693-12-1M51.

FARMS WANTED

If you really want to sell your farm, list it in the 10th ANNUAL ILLUSTRATED FARM CATALOG, (which for the first time will include P. E. I. farms.) It will be read by 12,000 persons interested in buying farms in many parts of the world and it will be unusual indeed if someone is not looking for just such a farm as you have. It is a medium that goes right to the class of people you want to reach. It has sold hundreds of New Brunswick farms, and there is no reason why it should not sell yours.

Communicate at once with district representatives, John B. Roper, Charlottetown, or F. J. E. Wright, Summerside.

The only charge is a listing fee of \$5.00 to cover cost of inspecting and reporting on property offered for sale.
