If you've seen the man pictured above, don't tell Adolf Hitler. He's Dr. Karl Goerdeler, former Lord Mayor of Leipzig and pre-war Nazi price director. The Gestapo offers a million marks (\$400,000) reward for information leading to his arrest on charges of complicity in the July 20 attempt on the Fuehrer's life.

Claim Blum Forced To Help Build Own Gallows

MOSCOW, Aug. 10 — (A.P.) — A story that Leon Blum, former popular front Premier of France, was forced to help build a gallows upon which he was then hanged came today from Lublin—once notorious Nazi death factory. It was reported by Konstantin Simonov, correspondent for the Russian Army newspaper, Red Star, and was the first hint that the former premier might have perished with hundreds of thousands of others, mostly Jews, at Lublin. A dispatch July 4 from Spain, said it was understood the aged Blum was being held in a chateau in Central Germany. Simonov said an "extermination camp" had been set up, consisting of crematories and a system of galleys which Blum was forced to help build. Simonov talked with two Lublin engineers who said they saw Blum dragging planks at the death factory last May, and he was pointed out to them by a Lublin Jew. One engineer said he stopped the old man and asked: "Yes," the old man replied. "I am Leon Blum." The old man said he had been brought in "with a group of French prisoners" and had made no attempt to save himself because "I decided to share the fate of my people."

PATTERN FOR DESTRUCTION Alcohol Plays a Vital Invasion Role

Day and night, Allied bombers carry their crushing, destructive might far beyond the enemy's flagging lines. Daily the tempo of the war's world-wide battle mounts; and daily the demand for War Alcohol grows. For planes, and countless other material of war, Alcohol is vital. War Alcohol is used in the plastic binder of plywood planes and gliders; it is in the plastic plane-windows, the synthetic tires and oxygen masks, the de-icing fluids, the anti-freeze even the paint on the fuselage! It is in the propellant that sends shells screaming at enemy strong-points. From Alcohol too, comes carbon-tetrachloride, the magic life-saving gas that smother's flame as quickly as pinching out a candle, or inflates—just as quickly—the life rafts and life belts that keep men afloat till help arrives. Today—and as long as the need lasts—every Hiram Walker and Goodyear & Worts plant, is distilling War Alcohol to bring Victory nearer!
