Another of the Many Advantages of the Enterprise Monarch Steel Range

It has a large feed door in front which obviates the necessity of removing pots or utensils to replenish the fire. It burns either coal or wood and will take a stick two feet long thus allowing the use of coarse, rough wood. The water tank is of copper and can be removed or attached by anyone in a few minutes. It holds nine imperial gallons and heats the water rapidly. A hot water front instead of tank if desired. Can be seen at Fennell & Chandler's, Charlottetown, or Brace McKay & Co's., Summerside.
