ANNOUNCEMENT

We wish to inform the Employees of the Prince Edward Island Railway that our firm has been appointed Official Watch Inspectors for the P. E. I. R.

As Official Inspectors, we have purchased a large and well assorted stock of the different grades and makes of Standard Railroad Watches.

We will be pleased to have any employee make us a visit and give us an opportunity of showing him our stock of these high grade watches.

Our Service

A thoroughly satisfactory pair of glasses involves a careful examination, accurate grinding of the lenses, selecting the mounting best adapted to the wearer's features and correctly adjusting the completed glasses to his face.

Because we give experienced attention to all these points our glasses, in addition to giving distinct vision, fit securely and comfortably, and are becoming to the wearer.

Dress up Your Circular Letters--

You would not think of sending a shabbily dressed, dirty-faced boy to your valued customers to act as your dignified representative.

It is even more unbusiness like to address an ordinary printed circular letter bearing a message to your customers, because it is a reflection on their better judgment.

Every letter you send out should be either typewritten or printed by the **Multigraph Process,** (and you can't tell one from the other.)

A letter produced by the **Multigraph Printing Service is identical** to typewriting in every respect. It is printed from moveable type, printed through a ribbon making the appearance and effect of the finished product the same.

There is nothing more effective than a direct personal letter to your customers. This letter can be produced the Multigraph Way at a very nominal cost. You can have a hundred printed—or ten thousand, as you wish. The last copy will be as legible as the first.

Can be printed in most any size or color.

Let us tell you more about it.

..*CAMPBELL'S COVE AND VICINITY— The many friends of Mrs. Angus A. Campbell will be pleased to hear that she is recovering from the severe injuries she sustained a few weeks ago. She was attended during her illness by Miss Ellen McAulay and Miss Margaret McPhee and many thanks to the generous young ladies. —Mr. Mathias Rose of Bayfield is now engaged with his gasoline engine sawing wood.— Mr. Joseph McEachern, Bayfield, was visiting friends at Fairfield on Sunday last the guest of William Campbell.— Miss Lauretta Campbell spent the latter part of the week visiting friends at Lakeville the guest of her cousin Mrs. Alfred Rose. —Mr.Dan and Mr.Thomas Conway are busily engaged hauling Cord Wood for the firm of Charles Sterns, Fairfield —Mr. Thomas McMahon, Mr. Andrew F. Campbell and Mr. Joseph N. Campbell are now busily engaged erecting a very large building on the premises of Mr. Duncan Campbell. It is intended to be used as a Dance Hall and is to be equipped with all modern improvements.

::The worms that infest children from their birth are of two kinds, those that find lodgment in the stomach and those that are round in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc there. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

IN MEMORIAM

MR. JAMES B. McDONALD

The death occurred at his home at Monticello at 6.30 yesterday morning of James B. McDonald, at the age of eighty-one years. Funeral takes place on Thursday morning at 9 o'clock to St. Margaret's.He is survived by two sons, Rev. S. J. MacDonald, P. P. of Lot 7; John A., at home, and one daughter, Ida McDonald; also two brothers, Right Rev. Monsignor McDonald, of Tignish, and Allan, of Peake's Station, and one sister, Mrs. M. E. Gillis.

MRS. JAMES LAWLESS.

There passed peacefully away at her home at Freetown, on the morning of the 27th of February, Mrs. Jas. Lawless, in the 37th year of her age. She was a woman of sterling qualities loved and respected by all who had the pleasure of her acquaintance; a loving wife, a devoted mother and a kind neighbor. She died trusting in her Redeemer and her last words were of Him Who gave His life for her. She leaves to mourn their sudden and sad bereavement a loving husband, and eight children, the youngest one year and ten months, a father, three sisters and five brothers, besides a large circle of relatives and friends. The sisters are Mrs. William Folland, Granville; Mrs. Wesley Folland, Margate; Mrs. John Cameron, Kelvin. The brothers are James Somers, of Norboro; Bruce, of Margate; Walter, of Clifton; Hartle, of Charlottetown, and Cleveland, New Glasgow, who came home to attend his sister's funeral, which took place on the 28th ult, to the Methodist cemetery at Margate, Rev. Mr. Sellar officiating at the house and grave.

A verse by her two little daughters, Etta and Viola:

Oh, mother, thy gentle voice is hushed,
Thy warm, true heart is still;
And on thy pale and peaceful face is resting death's cold chill.
Thy hands are clasped upon thy breast,
We have kissed thy lovely brow.
And in our aching hearts, we know,
We have no mother now.
5065.

::A CURE FOR FEVER AND AGUE.— Disturbance of the stomach and liver always precede attacks of fever and ague, showing derangement of the digestive organs and deterioration in the quality of the blood. In these ailments Parmelee's Vegetable Pills have been found most effective abating the fever and subduing the ague in a few days. There are many who are subject to these distressing disturbances and to these there is no better preparation procurable as a means of relief.

AH! HOW "TIZ" HELPS TIRED, ACHING FEET

INSTANT RELIEF FOR SORE, SWOLLEN, TENDER, CALOUSED FEET AND CORNS.

You're footsick! Your feet feel tired, puffed up, chafed, aching, sweaty, and they need "Tiz."

"Tiz" makes feet remarkably fresh and sore-proof. "Tiz" takes the pain and burn right out of corns, callouses and bunions. "Tiz" is the grandest foot-gladdener the world has ever known.

Get a 25-cent box of "Tiz" at any drug store and end foot torture for a whole year. Never have tired, aching, sweaty, smelly feet; your shoes will fit fine and you'll only wish you had tried "Tiz" sooner. Accept no substitute.

HON A. E. ARSENAULT

(Continued from Page One.)

know what the trouble was. That epidemic passed off and it has not been felt since nor has there been any sign of it and it may be the same with the disease which has attacked the oysters. It may be an epidemic which will disappear. Whatever it is, however, I am sure the Biological Board will ascertain, and that we will receive full information later in regard to the trouble.

RETURNED SOLDIERS.

A great deal has been said in regard to the question of the employment of our returned soldiers, and it has been intimated that a bill will be introduced for the purpose of providing for our returned soldiers. A number of members have expressed the opinion that if we were to put soldiers on waste lands we would thereby be paying them a poor compliment, and I quite agree with the sentiment. If we were to place our soldiers who have been at the front on waste lands in this province, without anything more, I should think it would be a poor return indeed for the magnificent service they have rendered their country. I shall not anticipate the Bill, but I can assure the House that if such were the proposition, I for one would not support it. When the proper time arrives the question of returned soldiers settling on land will be adequately discussed, and we on this side will be quite ready and willing to receive suggestions from the other side and I promise them their suggestions will receive the attention of the Government. As far as the employment of soldiers already returned is concerned, I may say that for those who have desired employment we have tried to do the best we could. We have, at each session here, given employment to those of our returned soldiers who desired such employment. These young men who are here to-day are not altogether dependant on this employment; they are young men who have other occupations, but are given an opportunity to come here as well, in preference to others. I find there have been 69 returned soldiers. Of these, 20 are receiving medical treatment in hospitals; 7 have been given employment; 4 have re-enlisted; 3 have returned to former employment; 12 have signified no desire for employment, and 2 remain unemployed. For some of the other men we are trying at present to obtain positions.

One hon. member (Mr. A. E. McLean) said that we had some recruiting officers who were not returned soldiers, and that it would have been well for us to have given the positions they hold to returned soldiers, or at least tried to obtain them those positions. Well, let us look for a moment and see who the recruiting officers are. One of them, the Chief Recruiting officer for the province, is Major Fullerton, a South African Veteran. I don't think a better man could have been chosen, a man who, from the inception of the War, has devoted a great deal of his time and energy to recruiting, long before he was appointed Recruiting Officer; a man who perhaps has done more than any other man in the province towards recruiting the body of men we have sent forward. Nobody could say he was not entitled to the position. We have for Queen's County Lieutenant McQueen, a returned soldier. We have had for Prince County Licutenant White, a returned soldier. I don't know whether he is yet a recruiting officer; but I don't think he is, because he has accepted a commission in the 105th Reinforcements. We have also, as a recruiting officer, Captain Campbell, a returned soldier. They are all returned soldiers except Major Fullerton, who is a veteran of the South African War; and therefore I think we can honestly say that so far as we are concerned we have tried to do the best we could for those who have returned from the front.

GROUNDLESS ATTACKS.

Now, year after year the Department of Agriculture has been attacked, and it is unfortunate that those who make these attacks never take the trouble to ascertain the truth before launching into wild criticisms of the Department. I am sure if those gentlemen would only make a few enquiries and look about them a little, they would restrain themselves more and not make charges which they cannot substantiate. We have been criticised for having men employed here at high salaries, and that we were not getting returns for the money spent by the Department of Agriculture. Well, let us see what truth there is in the statement. It will be admitted that a great deal of the land in Prince Edward Island needs one of two things, and sometimes needs both: That is, it needs enriching and it needs drainage. Some of the lands need fertilizing too. This has been a crying need for many years,—the want of proper fertilizer. This matter received the attention of the Department of Agriculture. We have in our bays and rivers one of the best best fertilizers known, and it exists in immense quantities. Unfortunately, that fertilizer could only be got at in winter on the ice by a few machines that did very slow work. One of the best deposits was untouchable. It was inacessible for the reason that the ice did not form on that bed and the diggers could not go on it in winter. I refer to the place at Morell. The Department of Agriculture undertook to secure this fertilizer. It made the necessary enquiries, and after prosper research, had a dredge built. This dredge has now been in operation for two seasons, and during that time no less than two thousand carloads of this valuable mussel mud, equal to something like thirty thousand ordinary sleigh loads, has been secured and spread over this province from East Point to Cape Traverse. This, it is estimated, has covered about two thousand acres of land. The dredge will still be in operation during the coming summer. But more than this: It has stimulated the people to obtaining this mussel mud, and now the demand is far greater than can be met. It is estimated that something lie a thousand carloads of mud have been taken off Morell bank during the past winter. This has been an incentive to the people to obtain the mud in other places, and never in the history of the province has there been more mud digging than during the past winter.

There are thousands of acres of rich land in this province, but unfortunately, it is all low land. In my own district, a section of lot 17, a great part of lot 15, part of lots 16 and 14 are low lands. Here for the past three or four seasons the farmers of those sections—and there are no better farmers in the province—have had failures of crops through wet weather and the fact that their lands are low. These lands are good, but unfortunately the people, although they are industrious, although they are economical have not been successful or prosperous as their efforts entitled them to be, for the reason that a crop could not be taken except every second or third year off these lands. The Department had the good fortune to secure in Mr. Reek—who we regret has left us—the services of a man who had a vast fund of experience in the matter of underdrainage. He came from a County in Ontario that was a pioneer in under-drainage. He was intimately acquainted with everything connected with the subject and knew the advantages to be derived from under-drainage. From the time he came to this province he started a campaign in underdrainage. Previous to that the Department had had in contemplation the inauguration of under-drainage, but unfortunately there was nobody who had sufficient experience to take hold of it and the scheme had lain dormant for some time.

TILE DRAINAGE A GREAT SUCCESS.

When Mr. Reek arrived here he took the matter in hand, and I am glad to say that I was instrumental in helping him to a certain extent—that is, in Prince County. Under the direction of the Commissioner of Agriculture, he laid out a demonstration plot in lot 15, Mt. Carmel. As to the success of this plot I cannot do any better than read from the Report that appeared in the Agricultural Gazette dealing with it:

"The Department of Agriculture secured, in the fall of 1915, all the available tile on the Island for the demonstration field; during 1916 none was imported and no further work could be done.

"Oats were sowed in the demonstration field in May, 1916. This field had yielded no crop for several years previous, because of the water-soaked condition of the soil; it was poor and inclined to be sour. The surface of drainage was excellent, but the hard-pan bottom prevented any drainage below and the precipitation was so heavy that evaporation did not take care of the surplus. The part drained constituted but half of a field. The yield was 98 bus. 10 lb from 3.86 acres. The undrained part yielded no crop during 1916. The total yield, though small, can be credited to the underdrainage, because no fertilizer was applied. The cost of installation was $21.15 per acre. Proper manuring and cultivation will ensure normal crops. Now, that was a practical demonstration of what could be done by under-drainage. At the last session of Parliament, as everyone knows, we passed a drainage act. Moreover, Mr. Reek was also instrumental in interesting parties in Prince County to start a tile and brick plant. I have to say that we have in Summerside some very progressive young men, men who are not afraid to make a venture if they see any possibility of a return,—men who do not think that money is of necessity to be tied up in mortgages or bonds but should be kept active for the benefit of the province. These men got together, and after listening to Mr. Reek as to the possibilities in connection with the manufacture of tile and brick in this province, and becoming interested in the proposition, put up a sufficient amount of capital to start the industry. We have in this province some of the best brick and tile clay procurable anywhere. You saw here on this desk a few days ago samples of pottery that had been manufactured with this clay, and I have the authority of the Leader of the Opposition, a man who has travelled widely, has visited a great many parts of the world and has seen samples of pottery everywhere,—I have his authority, and he assured me here in the presence of others, that the pottery here was equal to or resembled some of the pottery he had seen in the East, and that it was rich in colour. This plant was not as successful last year as we might have expected. Like all new industries, it met with difficulties; certain things had to be overcome. I am glad to say, however, that those difficulties have to a large extent been surmounted and today the company has large orders not only for tile but for brick as well. I think the orders now on hand for brick for home consumption is something over a million brick. This is only part, however, of what the Department of Agriculture has accomplished through this man, for whom it is said we paid useless money.

EGG CIRCLES.

We have in this province Egg Circles. I think everybody will admit that the egg circles have been of great benefit, that they have been very successful. These egg circles were started by some of the high-salaried men who are said to be of no benefit. Yet the Circles have been the means not only of encouraging the keeping of poultry, not only of bringing a large amount of money to this province, but also of educating the people. It has been the direct means of producing a better quality of eggs and a better class of birds. To-day these egg circles are doing a work of immense value, and we have to thank these men that we have in the Department for the benefits accruing from their work.

I might also draw the attention of the House to the co-operative marketing of wool. It has been in operation only two years but already its benefits are manifest. It shows to the farmers which are the best breeds of sheep and which kind of wool brings the best results, and it has also shown them how to market and care for their wool.

EDUCATION.

Now I come to another subject in respect to which the Government has been attacked, and that is the subject of Education. I don't know where the members of the Opposition have acquired their great knowledge of this subject, I don't know that any of them

(Continued on Page Eight.)

Had Chronic Indigestion Thought She Would Die

After Years of Suffering Attributes Cure to Dr. Chase's Kidney-Liver Pills.

Eating too much or using foods that do not agree are the usual causes of indigestion.

The trouble usually begins not in the stomach, but in the liver, since it devolves on this organ to filter the excess waste matter from the system.

Now, since Dr. Chase's Kidney-Liver Pills are the greatest of liver regulators it naturally follows that they are unexcelled as a cure for chronic indigestion.

With the liver, kidneys and bowels active the poisonous waste matter is quickly removed from the system and there is nothing to interfere with the organs of digestion. In this way only can lasting cure be effected.

Mrs. Rebecca Elliott, Magnetawan, Ont., writes:—I feel it my duty to write you in regard to Dr. Chase's Kidney-Liver Pills. I had grastristis of the stomach for three years, and could get nothing to stop it until I tried Dr. Chase's Kidney Liver Pills. I would have an attack of this trouble with my stomach every three of four weeks, and was so bad at times that my friends thought I would surely die. Thanks to these pills, I have not had an attack for six months and believe that the cure is thorough. My husband has had very satisfactory experience with Dr. Chase's Nerve Food. He was much run down, and very pale and weak. I persuaded him to use the Nerve Food, and after having taken five boxes he looks and feels real well."

It is such experience as these that have made a place for Dr. Chase's medicines in the great majority of homs. They do not fail, even in the most complicated cases. Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box. Dr. Chase's Nerve Food, 50 cents a box, 6 for $2.50. All dealers, or Edmanson, Bates & Co. Limited, Toronto.

MOTHERS!

12 o'clock at night. Baby has a Croupy Cough!

You who have had experience know the value at a time like this of having a medicine on hand you can trust. For 47 years thousands of mothers have relied on SHILOH in all such emergencies. It's reliable, you can always depend on its being exactly the same. It is pleasant to take. Children love it. It is economical because of the smallness of the dose. For the same reason Shiloh does not upset the stomach. A bottle of Shiloh today may prove the best investment you ever made.

At your druggist 25c, 50c and $1.00
