## CHANGED HERSHOES FIVE TIMES A DAY

Suffered for 20 Years with Rheumatism

Try and picture the life this woman led for twenty years—changing her shoes several times a day in a vain endeavor to attain some relief from the rheumatic pains that were constantly troubling her. Then imagine her joy when she found that Kruschen was driving away the rheumatism. This is what she writes:—  
"I have been using Kruschen Salts for four years. For twenty years previously I had suffered with my feet, sometimes changing my shoes five times a day, and frequently without any as the same pair of shoes all day with comfort. I cannot speak too highly of Kruschen Salts. Only those with their feet for years can realize what it is to be free."—(Mrs.) E. A.

It is deposits of excess uric acid, lodged between the joints, which are frequently the cause of rheumatism. Kruschen Salts contain two ingredients—sodium and potassium—which are effective solvents of uric acid.

## Notes Business Improvement In Eastern Canada

**MONCTON, N. B., March 9**—Business conditions in Eastern Canada are showing a much greater improvement this year than for any year since 1929, according to traffic figures quoted by W. U. Appleton, vice-president and general manager of the Atlantic Region of the Canadian National Railways at a conference of agents on this region which opened here today.

With the exception of 1929, density of freight traffic for the month of January this year on the region surpassed in volume that of any corresponding month since the amalgamation of the various system lines in 1923. While this year's net ton mileage per mile of road was 18.5 percent less than the 1929 figure, it reached nearly 120 per cent over 1935, and in comparison with 1936, a gain of 33.5 percent was shown. Loaded cars delivered to the central region increased 66.8 percent and receipts were up 21.7 percent.

**PRINCETOWN, N. J. March 9**—(AP)—Whether it be illiterate or colloquial, the word "Ain't," says Professor Harold Bender, has been for some 162 years.

It was first recorded about 1775 as a contraction for "Are Not" but later was applied also to "Am Not" and "Is Not," said Bender, Princeton University authority on word origin today.

## How Can a Hen Over-eat and Still Be Starved?

A good egg mash must do two things:  
(1) Encourage heavy laying of eggs;  
(2) Keep the laying hens healthy.

If you do not supply your birds with foods that give them extra nourishment, you cannot expect extra eggs. A hen cannot produce any more than her food makes possible. If she does not get sufficient nutrition, she will use up her reserve vitality and her own body tissue to supply the egg-making materials the food lacks. She will, for a time produce eggs at the expense of her health. That not only decreases the number, size, and quality of her eggs, but weakens her resistance to disease and shortens her life. Poor feeding means poor production, short life, of laying hens and low profits—or no profits. Good foods mean good production, long life of hens and good profits.
