ENTERTAIN LADIES SOCIAL
Club—Mrs. C. W. Ramsay, the president of the Ladies Social Club of Trinity United Church entertained the ladies on Friday evening at her home on Friday afternoon. Rev. Wm. Ver Wolf presided at the simple luncheon service. The choir of the Presbyterian Church of which the deceased was a member sang the beautiful hymn "The Old Rugged Cross" and "Softly and Tenderly Jesus is Calling." The palbearers were Messrs. Donald Baker, Arthur LeRoy, James LeRoy, Roy McIvor and Harold Walsh. Interment was in the People's Cemetery, the body being laid to rest beside that of Mrs. Gay who predeceased his wife almost two years ago.—S.

FUNERAL OF MRS. STANFORD GAY
—Friends and neighbors attended the funeral of Mrs. Stanford Gay which was held at her late home on Friday afternoon. Rev. Wm. Ver Wolf presided at the simple luncheon service. The choir of the Presbyterian Church of which the deceased was a member sang the beautiful hymn "The Old Rugged Cross" and "Softly and Tenderly Jesus is Calling." The palbearers were Messrs. Donald Baker, Arthur LeRoy, James LeRoy, Roy McIvor and Harold Walsh. Interment was in the People's Cemetery, the body being laid to rest beside that of Mrs. Gay who predeceased his wife almost two years ago.—S.

Y'S MEN'S MEETING
—The regular weekly supper meeting of the Summerside Y's Men was held in the club rooms and very well attended. Mr. Albert Silliphant occupied the chair. There was no speaker. Several business matters were put through. After some discussion it was decided to hold the annual meeting of the club on Friday evening at the club house. The club voted eighty dollars to be invested in war savings certificates. A gift of a tub of Labrador herring was received by the club from Mr. Fred Osbourne, light house keeper at Belle Isle, Newfoundland. Mr. Silliphant has spent a few weeks in Summerside a few years ago, and who had made many friends here. He appreciated the gift very much and appreciated the fact that it was sold the herring among the members and donate the proceeds to the club. The meeting adjourned with a sing song.—S.

AGORDAT ACCOMPANY
(Continued from page 1)

and there were no casualties. Once spectators heard the clatter of machine gun fire as a German Messer chrit tried to shoot down the British bombers returning from France. The Nazi flier was beaten off about halfway across the Channel. Another Messerschmitt chased a British bomber as far as the English coast.

Sources here declined to say the attack on the French coast was on a "large scale" but preferred to call it "an operational raid" which serves along the coast said they thought the R. A. F. was giving the German "merry hell" on the other side of the Channel.

On Saturday German raiders slipped through the fog overhauling the Dover Strait on a series of "reconnaissance" raids while German long-range guns once more pounded the Dover coast from the French shore.

Although the Nazi planes were reported high over areas as far north as Liverpool and the West Midlands, bombs were reported on one or two East Anglian towns, where 10 persons were injured.

Nazi shell-fire from heavy guns mounted on railroad cars lasted about three hours in the early morning but drew no answer from British anti-aircraft batteries. One officer described the bombardment as "just bait for us to open fire and give our positions away."

British air sources re-emphasized Britain's need for "fast American bombers if we are to continue long range night bombing this spring and summer."

As night gradually shortened, they pointed out, the need for hours of darkness for long flights over Germany grew fewer and bombing time contracts.

Once the weather-enforced hull ends, it was said, Germany will improve in the quality of her attacks, with her air power because she "must bring England to her knees in 1941 if she is going to win."

Britain, however, was said to be accumulating air power with the accelerating aid of America and will keep up attacks as fast as planes are available.

Large Movement
(Continued from page 1)

Increase of the Royal Canadian Navy to 413 ships and 26,920 men by March 31, 1942, compared with present strength of 175 ships and 15,319 men.

Despatch overseas, in successive formations, of the following:—
The balance of the corps troops for the Canadian corps of two divisions now in England.

An army tank brigade for service with the Canadian corps.
The 3rd Canadian division with its complement of corps troops.

A Canadian armored division.
After detailing proposed moves of the armed forces, the Prime Minister said a "vast increase in war equipment and supplies has been arranged." Canada would concern itself on making for Britain those things which the United States was not making, such as Mark III tanks, small arms, Bren guns, aircraft, machine guns and anti-tank guns; and ammunition for them.

Mr. King said these decisions had been reached after a week of discussions in cabinet war committee with Defence Minister Ralston and Munitions Minister Home who recently returned from England.

He said there was "complete agreement between the British and Canadian governments" on these plans, and the new measures were being timed to fit into the program of the admiralty, the war office, the air ministry and supply departments of the United Kingdom.

"Hitler has made his purpose clear," Mr. King said. "Total war means an indiscriminate attack on every front by every means, however fiendish."

"Practiced by Nazis, as we have seen it is war against homes, hospitals, schools and churches. It is war on men, women and children. It is war by shot, shell, fire and poison gas."

NEWEST U.S. SUBMARINE
In a driving rain, the \$6,000,000 submarine Gudgeon slides down the ways at Mare Island, Calif., toward the Tuna, launched two months ago. Another trigger, is to have its keel laid shortly.

To Maintain Quality Canadian Bacon Hog
One of the major effects of the war on Canadian agriculture has been to increase sharply the movement of the hog product to the United Kingdom market, and leading to a better price relation of the hog product to the consuming countries.

Hog production has reached record volume, and the quality of the hog is not kept up. The hog product has been an inevitable result of a Dominion-wide record hog breeding program stimulated almost entirely by the increased demand for hogs for the war time bacon requirements.

Nevertheless, the number of hogs available for market places on the basis of quality is being reduced. The percentage of hogs meeting the requirements of the Dominion Department of Agriculture is being reduced. The percentage of hogs meeting the requirements of the Dominion Department of Agriculture is being reduced.

Greeks Capture
(Continued from page 1)

The Ministry said that in the month ending Jan. 26, 160 homes and 50 refuse huts were destroyed and "about 300" were damaged. It added five churches collapsed and three schools and four hospitals were hit by bombs.

Greek occupation of the key Albanian town of Tepeleni was said Saturday night to await only a few more operations and disbanding from the front reported that recent gains had put the Greeks on the threshold of "new big victories."

Tepeleni, the dispatches said, had been enclosed on three sides, leaving open to the Italian defenders only the road toward Valona and the Fascists were reported retreating toward the seaport, the next major goal of the Greek counter-attacks.

Tepeleni and Klisura, which already is in Greek hands, control southern Albanian roads leading to the Italian-held harbor.

The high command described Italian maintain positions captured near Tepeleni as the best fortifications in Albania and of "great importance."

A communique of the Royal Air Force said British fliers, backing up the Greek ground offensive, bombed an important military camp and buildings yesterday southwest of Tepeleni, setting fire to one building and machine-gunning Italian soldiers as they emerged from their tents.

Truro Explosion Injures Woman
When an acetylene tank blew in Russell Hoyt's transfer truck terminal in Truro, N.S., it dealt him double trouble. Not only did the explosion and fire that followed wreck the big structure, one of the largest in that town, but flying glass from shattered windows injured Mrs. Hoyt as she was walking down a street several blocks away. She was rushed to hospital with pieces of glass in the back of her neck and her face.

A WOMAN'S VIEW
(By ALICE HEMMING in Vancouver Province.)

"The land of forgotten snows" the poet calls it, the land beyond Golden. Just now the snows up in that country are far from being forgotten. The Big Bend Highway, opened with much eclat this summer, now reveals those snows to the public eye for the first time.

But in spite of the work of engineers, man has had to bow to nature. A number of cars that tried to solve the mystery of that romantic road, under the spell of its first winter snow, very nearly met disaster.

The snow has come much earlier than usual this year to "the trail that leads to Golden." It has clothed Banff and its environs in a magic beauty, but it has closed the roads to Jasper and other favorite spots. The silent white snows of Banff makes it seem akin to some of those little Tyrolean villages in Bavaria, where in happier days I have been for winter sports.

Another trigger, is to have its keel laid shortly. Banff, if one were not pursued by regrets for the picturesque Alpine village of Garmisch Partenkirchen, and if one could escape the radio news bulletins that bring the war into one's hotel bedroom.

They say of Banff, as they used to say of the Cafe de la Paix in Paris, that the world would be peace enough, everyone you ever knew in the world would eventually pass by. In any case, like Tunbridge Wells in England, Banff manages, at one time or another, to harbor some guest.

Miss Haskins told me "Journalists, photographers with flash bulbs, and movie men surrounded the house from dawn till dusk. Even publishers were sitting on my doorstep eager to print my poems."

Phantom Ship Worries Nazis
A phantom ship is haunting the Norwegian coasts these long winter nights, causing trouble and worry to the Germans occupying Norway. The Nazis have tried in vain to trap the elusive vessel, which raids the left lower jaw and penetrating the right lower jaw and terminating in the ascending border of the posterior border of the sternomastoid muscle, having a length of 12 inches and terminating in Y shape, 1 1/2 inches below the tip of the lobe of the right ear.

WOUNDS ON HANDS
"On dorsal surface on left hand—a linear wound 1/2 in. long and 1/4 in. deep over inner surface of 2nd index finger."
"Incised wound 1/2 in. long on dorsal surface of skin over proximal phalanx of 3rd finger."
"On palmar face of left hand, an incised wound 1/2 in. long and 1/2 in. in depth at angle of thumb and index finger."
"On palmar surface of right hand—an incised wound 1/2 in. long and 1/2 in. deep at the base of right index finger. Also, transverse incised wound 1/2 in. long near the tip of the right little finger. The most severe wound of all is an incised wound at the back of the neck. This wound extends from a point 3 inches in front of posterior border of the left ear and extending downwards and backwards severally to the posterior border of the sternomastoid muscle, having a length of 12 inches and terminating in Y shape, 1 1/2 inches below the tip of the lobe of the right ear.

WOUNDS ON HANDS
"On dorsal surface on left hand—a linear wound 1/2 in. long and 1/4 in. deep over inner surface of 2nd index finger."
"Incised wound 1/2 in. long on dorsal surface of skin over proximal phalanx of 3rd finger."
"On palmar face of left hand, an incised wound 1/2 in. long and 1/2 in. in depth at angle of thumb and index finger."
"On palmar surface of right hand—an incised wound 1/2 in. long and 1/2 in. deep at the base of right index finger. Also, transverse incised wound 1/2 in. long near the tip of the right little finger. The most severe wound of all is an incised wound at the back of the neck. This wound extends from a point 3 inches in front of posterior border of the left ear and extending downwards and backwards severally to the posterior border of the sternomastoid muscle, having a length of 12 inches and terminating in Y shape, 1 1/2 inches below the tip of the lobe of the right ear.

MY MUSCLES SURE GET STRAINED AT THIS FREIGHT JOB!

But at the First Ache or Pain—on Goes Sloan's. That Soon Brings Relief!

It's easy to overwork willing muscles or give them a sudden, nasty wrench. And hours of pain are sure to follow unless treatment is applied promptly. Thousands of active men know from experience that Sloan's Liniment affords quick relief. Sloan's sends a penetrating warmth to the aching tissues. Circulation is accelerated and comforting ease follows. Sloan's Liniment has the advantage of not being greasy. Furthermore, there is no need to rub it in. Just pat on Sloan's wherever soreness is felt and leave this fine oil liniment to do its healing work. Better keep a bottle handy. You may need it in a hurry.

WAR SUPPLIES ARE MOVING CONTINUALLY

Quick Relief For: STIFFNESS, SORENESS, BUMPS, ACHES, PAINS FROM BRUISES, SPRAINS AND CHEST COLDS

No rubbing required—JUST PAT IT ON!

SLOAN'S Family LINIMENT

HELPS NATURE HEAL FASTER!

Phantom Ship Worries Nazis

A phantom ship is haunting the Norwegian coasts these long winter nights, causing trouble and worry to the Germans occupying Norway. The Nazis have tried in vain to trap the elusive vessel, which raids the left lower jaw and penetrating the right lower jaw and terminating in the ascending border of the posterior border of the sternomastoid muscle, having a length of 12 inches and terminating in Y shape, 1 1/2 inches below the tip of the lobe of the right ear.

HEADACHES

Stop suffering needlessly from splitting headaches. Do as countless thousands are doing—GET FASTER RELIEF with Barker's Clinostat Tablets. These powerful tablets instantly stimulate and refresh, induce a beneficial relaxation of nerves. NOW RELIEF WITHOUT REACTION! 15 doses 35c.

Poultry Notice

I will be in Hunter River Tuesday Feb. 4th buying poultry and Soliciting Baby Chick orders.

FARMERS

I have been informed that owing to lack of shipping space, egg exports have slowed up, for the moment you are not doing the poultry industry any good by selling your product at exactly cost price.

If your flock of hens was not thoroughly culled last Fall. The chances are you are feeding some birds at cost price, perhaps at a loss. Why not remove these at once.

I will ship empty poultry crates to all parts of the Island. Will pay the expressage on your shipment. Buying for cash or can send you baby chicks as soon as the chick season opens up.
