NEW CIVIC

(Continued from Page 1)

Hogan, manager of Island Furrers, was heard by the Council. Mr. Hogan told the Council that outside furrers were coming into the City and taking away a lot of money as the result of their sales without leaving any through taxes or rental expenses.

Coun. Lowther said he was in "full sympathy" with the views expressed by Mr. Hogan. The City Clerk, however, had received information recently from the City Councils of Halifax and Moncton that they were unable to prevent the outside furrers from coming in, the reason being that those outside furrers were careful to be sponsored by local firms.

Mr. Hogan said he appreciated the Council's problem. He did not mind so much those local firms who were legitimate sellers of furs, bringing in those outside furrers, though he considered the practice unfair, but he did object to furniture dealers doing the same thing.

Mayor MacDonald assured Mr. Hogan that the Council would do all in its power to look after the complaint which, he said, he considered to be a just one.

Coun. M. A. Farmer, chairman of the Police Committee, said he would recommend a new police patrol be purchased for the Police Department and that, in future, the patrol wagon be "turned in" after a year's use and a new one acquired.

He believed this would be a more economical arrangement than the present one of keeping an outworn machine and paying heavy repair bills for its upkeep. The present patrol wagon had travelled 63,000 miles since June, 1946. He also recommended that the whole police force of 15 be provided with new uniforms since they had not received any last year.

Relief Expenditures

The question of relief was brought up by Coun. Farmer also. So far as he knew, there was no provision in the City statutes for relief expenditures. Some people, he said, were under the impression that because the City had received some money from the Provincial Government, it should be spent for relief. But no money was given the City which did not belong to it.

The situation would likely be all right during the coming summer, Coun. Farmer said, but he thought preparations should be made for next winter. It was a triple matter, possibly, of responsibility by the Dominion, Provincial, and municipal Governments.

Coun. E. C. Johnstone said the Market building was clean and the rest rooms in good condition. There was constant supervision of the rooms between the hours of 9:30 and 5:30 and the Provincial Government had been approached with the object of having the Government share any expense involved in supervision after those hours.

Coun. Lowther said the City would not be petitioned for relief as frequently as it did this Province have Mothers' Allowances. A great number of requests for relief came from mothers.

Coun. S. F. Doyle said it had been drawn to his attention that last winter when the search for the "fire bug" was on, several policemen had spent many of their off-duty hours on the lookout for the "bug." The time spent in searching for that person, Coun. Doyle said, could have been more pleasantly spent by the men at their homes. It was his opinion they should be paid for the extra work.

Coun. Farmer said he understood that the men were given time off during the search. He thought

Clear Your Skin

If ugly, disfiguring blemishes, pimples, spots, itching skin, freckles, acne, blackheads, or red blotches embarrass you, work fast to help bring you a clearer, softer, smoother skin. Soothes itching, burning, clearing in 7 minutes. Kills many germs and parasites, often the real cause of skin trouble. Stops heat the skin. Money back unless Nixoderm satisfies you. Ask your druggist for Nixoderm today.

that paying them would establish an undesirable precedent.

Traffic Lights

An estimate from the Northern Electric Company of \$27,000 as partial cost for the installation of electric traffic lights was shelved for the time being. Coun. Farmer, who submitted the estimate, agreed with the Mayor that the expenditure could not be considered at present.

Before the meeting adjourned, the following resolutions were passed:

"That the offer of Miss Power and Mr. William Power to grant lands to the City to enable the extension of Brighton Place northwardly from York Lane and Admiral Street, being approximately 25 feet, or half the width required, be accepted and that a plan and conveyance of the land offered be prepared and that a similar offer of Mrs. Goodwill, conditional on the full opening of such extension be acknowledged and filed pending Mr. Platts making available the remaining land necessary to complete the project."

"That the basic rate for labour employed in the City of Charlottetown shall be at the rate of 55 cents per hour."

"That Mr. George Abbott be confirmed in his position as Assessor's Clerk at his present salary."

"That Miss Ruby Reynolds be confirmed in her position as stenographer and cashier at her present salary."

"That the tender committee be instructed to call for tenders for the supplying of a new police patrol vehicle, and to request that tenders quote a tentative plan of annual replacement of the vehicle offered."

Street Dept. Report

The text of Coun. J.D. Stewart's report on the work of the Street Department follows:

"The Streets Department has been exceptionally busy during the past month, hauling refuse, ice, etc., opening catch basins, clearing intersections, etc. However, notwithstanding the great amount of snow and the severity of the winter, there were not large freshets as in other winters and the winter's ice has cleared over very well. The severeness of the winter has caused more than usual damage to our asphalt streets and our

catch basins.

"We have already started repairing the catch basins and anticipate our street patching not later than the first week in May, to enable this work to be completed before the busy tourist season is upon us."

"In order to set up our asphalt plant we must purchase a boiler and steam engine; with the acquiring of these two pieces of equipment we will be ready to pave Kent Street between curb and sidewalk from Queen to Prince, and also to widen North River Road if the Council so desire."

"Considerable ashes has been hauled and placed on our streets and with the use of the split log drag streets are now fit for traffic which otherwise would have been impassable. However, a scarcity of the right type of ashes has curtailed our efforts in this regard."

"The street broom and flusher have also been used to great advantage and with weather permitting we will start immediately to clean and haul the dirt from our streets."

"The ramp at the entrance to the ice at Richmond Street has been salvaged and this lumber will be used to patch wooden sidewalks."

"It has been necessary to shut off the lower end of Kent Street between Edward and Fitzroy. The frost coming out of the ground in this area has made it dangerous to motor traffic. This is a low swampy area and notwithstanding the fill of broken stone, gravel, etc., in this area, the street is spongy."

"The cement mixer and roller have been overhauled under the supervision of Mr. Sam Crockett; also the sweepers, carts, cans and street barrels have been repaired and painted."

"Just as soon as it is possible, we will widen York Lane and we hope also to be able to extend Brighton Place to Admiral Street while we are doing this work."

"At the next meeting of our Street Committee, we will discuss what concrete sidewalks are to be laid and bring in a recommendation to the Council for their approval."

Fire Dept. Report

The report of Coun. P.E. Holland, on the Fire Department was as follows:

"We held a number of meetings of our Committee, also the full Fire Board Committee, also a number of discussions on fire matters with Mr. Beer, Secretary Fire Underwriters Association."

"The considered opinion of your Committee was that a City Fire Marshal should be employed primarily in a clean-up and fire prevention capacity, more particularly on account of the housing situa-

A Short-cut to Smoking Pleasure TURRET FINE CUT TOBACCO

tion which creates more hazard and more difficulty in fighting fires.

"While we pared our mechanical needs budget to the irreducible minimum, in order to assist this new item of expense, we regret to say it was disallowed on the grounds of economy. We still feel the necessity of this employee more than offsets the first cost and therefore respectfully ask for a careful reconsideration."

"We found a great deal of confusion with regard to placing calls for fires, the general practice being to call the Police Department. They in turn relay the call to the Fire Department. We had a meeting with Mr. Guss, Manager, Island Telephone Company, in an effort to have the correct information placed in the current issue of their directory, but as same had already been placed in the Printers' hands, we had a card distributed to all taxpayers."

"I have much pleasure in attaching a report for month of March by Fire Chief Mr. Jewell, which I believe of interest and information to all. At this time, I wish to thank the gentlemen named above, also the entire Council, as well as employees at City Hall for a whole lot of assistance and kindness."

DANISH POPULATION RISES

In 1769 the population of Denmark was about 797,580, and about 20 per cent lived in the towns. In 1940, the population totalled about 3,844,312 with about 47 per cent living in towns and cities.

GET 'EM EARLY

A cavity is never too small to fill, dental authorities say. Regular use of the tooth brush and avoidance of excessive use of sweets are sure-fire methods of preventing tooth decay.

said, the time would be ripe to start a new world organization, without Russia, for mutual defence of the United States and "like-minded" countries.

Introduced as a resolution by Senator Homer Ferguson (Rep. Mich.), who called it "the new answer to Soviet Russia," the plan was referred to the Foreign Relations Committee, with indications that it would not get a warm reception.

The Senators' plan calls for these changes in the U.N. charter, in A.B.C. fashion.

A—Outlawing the big power veto in questions of aggression, armament for aggression, and admitting new countries to the U.N.

B—Banning atomic weapons, through the United States plan for an atomic development authority, and limiting other heavy armaments under a quota system to be set up by the Security Council.

C—Formation of an international, peace-keeping police force, made up of volunteers from small countries. There also would be five "reserve" forces supplied by Britain, the United States, China and France.

Deep-sea Strike Settled In East

MONTREAL, April 12 (CP)—Settlement of the six-week-old strike of officers of deep-sea east coast vessels was announced today, bringing wage increases, vacations and adjustments in working conditions.

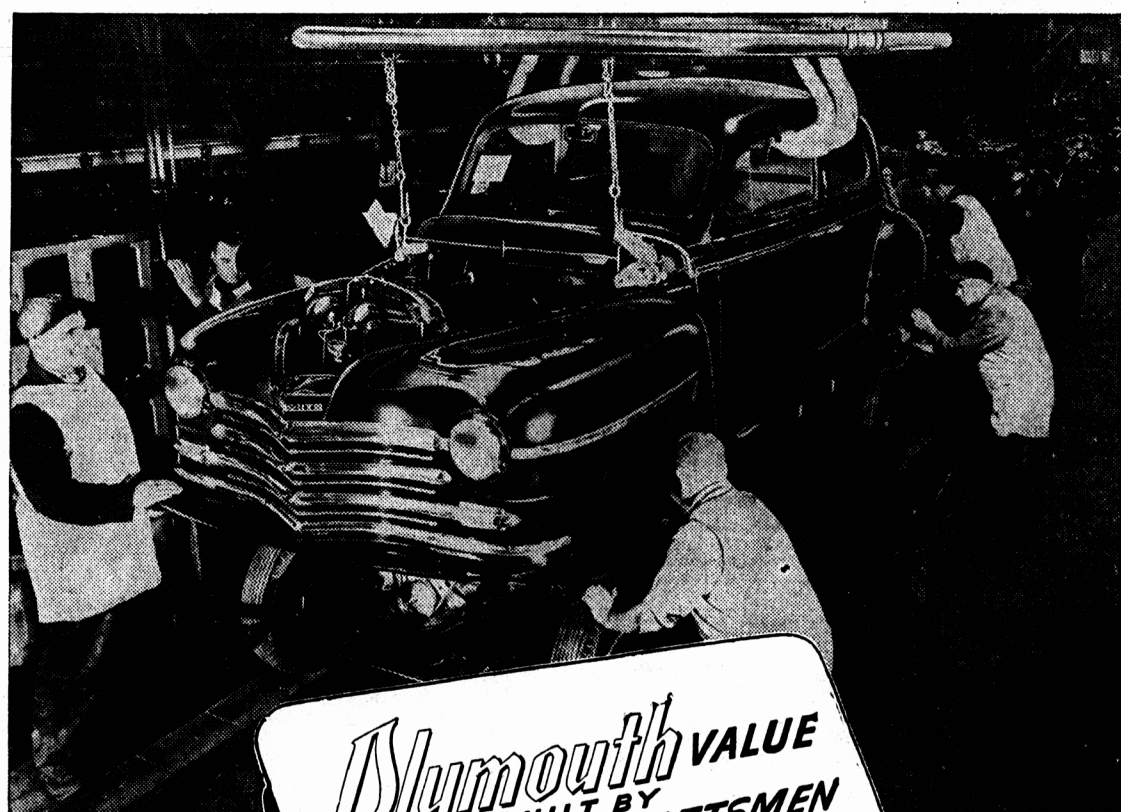

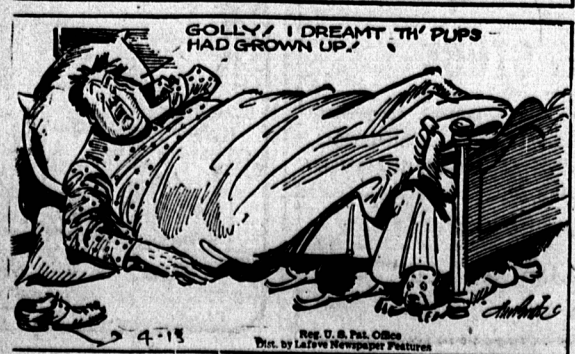

A joint statement by the Shipping Federation of Canada and representatives of three unions involved said it was expected a similar settlement would be reached with strikers on the west coast.

Since the strike began March 2, about two score vessels have been strike-bound on both coasts and more than 750 officers affected.

PROTECT YOUR WOOLENS

MOTH-DED MOTHPROOFING SPRAY CONTAINS S.T.D.D.I. SAFE - SURE - ECONOMICAL

Napoleon and Uncle Elby By Clifford MacBride

Plymouth VALUE BUILT BY CANADIAN CRAFTSMEN IN WINDSOR

A MOMENT—the body drop! The shining, neatly-trimmed Plymouth body is about to be lowered and securely fastened to its sturdy chassis with rubber-cushioned mountings.

Earlier, on the production line, the sturdy chassis has been fitted with Plymouth value features, such as—Front-end Sway Eliminator—Amola Steel Springs—famous Plymouth Safety-Rim Wheels and Super Cushion tires for blowout protection and Plymouth's big, 95 horsepower, floating-power engine.

When the handsome Plymouth comes off the assembly line, lubricants are added and it is ready for a final thorough check and road test. After being put through its paces by expert Chrysler inspectors, the necessary adjustments are made and another fine Canadian-built Plymouth rolls out of the busy plant ready to give reliable performance, greater safety and increased economy to its new Canadian owner.

The Chrysler Corporation's passenger car plant at Windsor, Canada. This huge plant contains over 13 acres of floor area, where 2,265 skilled Canadian craftsmen, modern machines and equipment produce fine Canadian automobiles.
