BREEDING STOCK should be fed a different ration to that fed to pelters. Ross-Miller Vita Crumbia (Reg'd) "B" is specially devised for breeders and Ross-Miller Vita-Crumbia (Reg'd) "A" for pelters.

ANNOUNCEMENT—Mr. and Mrs. H. L. Callbeck, formerly of Moncton, have announced the marriage of their daughter, Lorna Elaine, to William Duncan, son of Mr. and Mrs. Walter G. Humphrey, of Moncton, at Charlottetown, P. E. I., on May 14th, 1937. —Moncton Times.

CALEDONIA STUDY GROUP—At the regular meeting of the Caledonia branch of the Adult Education Group on Monday evening, Oct. 25th, the guest speaker was Mr. C. E. MacKenzie of Milton. Mr. MacKenzie's subject was "Dairying", and in the course of his remarks gave valuable information on this very important branch of agriculture, principally on the breeding, feeding and care of live stock, and very clearly demonstrated that the successful dairy farmer not only had a continuous income from dairying, but also by the proper utilization of the by-product, "skim milk", he had possibly the greatest adjunct to successful mixed farming. The speaker urged upon his audience the importance of winter dairying and its allied industries as a means of combating old man depression, and further suggested that this group keep in touch with experimental work at the Charlottetown Experimental Station, in the matter of feeding, crop rotation and especially fertilization of pastures and the growing of corn and green feed in the making up of balanced rations. Mr. Charles Walker capably filled the position of chairman and very nicely conveyed the thanks of Caledonia Group to the guest speaker, which included an invitation to come again.
