PRICE MAINTENANCE.

Its Necessity to Aid Consumer.

Many big industries engaged in national trade have often in the past done openly what the small concerns in their limited fields have done secretly—varied prices according to the degree of competition at different times and places. Their object has been to secure the highest price to be had, irrespective of whether the buyer was held up or not.

The principle of selling goods at a close margin at one price to meet or to kill competition, and charging a high price, to make up for it, where little or no competition exists, is economically wrong and unfair to the buyer. Every article offered for sale should have a uniform price plainly marked upon it. Manufacturers will then have to see that the price of their goods is a reasonable one, so they will sell, and at the same time they will provide enough profit to pay the jobber and dealer fairly for handling the goods at a uniform price. This will inspire confidence in the consumer, because he will know the price can not be cut and must, therefore, be a reasonable one to permit the goods to sell. He will buy such goods in preference to a small selling article sold at exaggerated profit.

Everybody will benefit from price maintenance in this way. It will protect the manufacturer who has built up well-known brands, also the newcomer who is seeking to do so. Distributors will be protected in handling it at a fair profit, and they will not be forced, through fear of cut-throat competition, to build up their own private brands at much expense.

When you buy Certain-teed you have our real guarantee that it will last at least five years for 1-ply, ten years for 2-ply and fifteen years for 3-ply, and this guarantee is backed by the world's largest roofing mills.

There is a dealer in your city or town who handles Certain-teed products. He will be glad to give you information—ad prices.
