MOVEMENT TO RAISE THE BATTLESHIP MAINE.

On Tuesday night, February 15, 1898 the United States battleship Maine blew up in the harbor of Havana and 266 of her officers and crew were killed.

At the time the Maine was moored to a buoy selected by the Spanish authorities in Havana. Most of the officers were ashore at the time attending a reception, but the ship's commander, Captain Sigbee, was in his cabin, having just finished a complete inspection of the ship.

Captain Sigbee was one who escaped from the wreck and sent a brief midnight report of the disaster, which to his credit ended with an appeal to the American people "to suspend judgment."

The Spanish authorities vehemently denied any knowledge of the affair and expressed the belief that the explosion was accidental and had occurred within the ship.

The Spanish board of inquiry conducted an investigation also. Expert testimony was taken and divers were employed. After weeks of ineffectual American board reported that the ship was destroyed by the explosion of a submarine mine, but no evidence was obtainable to fix the responsibility on any person.

The Spanish board reached the official conclusion that the explosion had been within the ship.

Representative Sulzer brought the audience to its feet when he said he would demand immediate action by Congress one way or the other.

The truth of history," he said demands that the wreck of the Maine be raised and the fact demonstrated whether she was blown up from inside or without.

The wreck of the Maine must be raised. Gratitude commands it, patriotism demands it, and the honest thinking people of America will never rest content until it is done.

Other speakers, among whom were Joseph M. Choate, who presided and Major General Sickles strongly supported the demand that the wreck shall be raised.

It is to be hoped that this will yet be done.

CREATING A NEW NATIONAL CAPITAL. Before Confederation the united Provinces of Upper Canada and Lower Canada had a long period of trouble over the selection of a capital city.

For years the Government and Parliament was a movable affair, sometimes located at Montreal, or at Quebec or Kingston, as the case might be.

Unable to settle the question at home the choice was relegated to Queen Victoria, by whom Ottawa was chosen and has since remained the honor.

Australia has had something of the same trouble since the Commonwealth was set up, and it is only recently, after ten years of federation that the site for the national capital has been definitely located.

As yet it is a site only and not a city and the coming capital has not yet been given a name.

But the location is near the main line of railway between Melbourne and Sydney and not very far from the boundary between New South Wales and Victoria, in the former State.

Here nine hundred square miles of land have been set apart for the purpose as a sort of neutral territory after the manner of the District of Columbia in which the capital of the United States reposes.

the ship and was the result of negligence.

From that day twelve years ago the wreck of the Maine, has lain at the bottom of Havana harbor. Had it been raised the question whether the ship was destroyed by a mine beneath her, or by explosion from within would have been most effectually answered.

And the bodies of the brave men who were so suddenly sent to their death would have received decent burial. This latter feature has weighed upon the minds of many and from time to time an important section of the American press has demanded that the wreck be raised.

It has even been objected that the reason why no action was taken was lest the proof should be furnished that the wreck was caused by an internal explosion.

On Sunday afternoon last some two thousand persons attended a service in Carnegie Hall, New York, held in commemoration of the destruction of the Maine. Commander, now Rear Admiral Sigbee, and Father Chidwick, the former Chaplain of the Maine, were present and spoke.

The New York Herald tells that, "fanned by patriotic speeches, the enthusiasm of those present was voiced in protest that the battleship had not been raised and the bodies of the sailor victims recovered."

Representative Sulzer brought the audience to its feet when he said he would demand immediate action by Congress one way or the other.

The new capital will have an altitude of 2,000 feet above sea level, and will form the

centre of an amphitheatre of hills. The Snowy River will furnish it with cool water. Here the costly buildings of the Australian capital will be erected.

As it will be the creation of an entirely new city upon a most extensive scale by a people of so much enterprise, public spirit and taste as the Australians have proved themselves to possess, the new capital of the southern Commonwealth promises to be something to dazzle and instruct the world, a thing of beauty and a joy forever.

We venture the hope, however, that the massive weight and grandeur of the southern capital will not be so preponderating as to disturb the earth's equilibrium.

THE NAVY QUESTION EXCITING QUEBEC. Some days ago our despatches told of several Catholic clergymen in Quebec Province addressing their parishioners in opposition to the Government naval program.

The Montreal Gazette tells of a meeting of over two thousand at Longueuil on last Sunday, at which the matter was discussed for hours in the open air, while the multitude listened and applauded despite the wintry chill.

There were no members of Parliament or other very prominent persons present, although the politicians had been invited.

The movement seems not to be political, as both the Laurier and Borden plans were denounced. The speakers followed the line of Mr. Monk, and seemed to show that a good many of his compatriots share his views.

All the speakers held that the people should be appealed to in a plebiscite before the country shall be committed to so radical and costly a new constitutional departure.

We are yet to learn whether this is a mere "flash in the pan" or a movement of some considerable significance affecting the French-speaking Province.

Had Weak Kidneys For Two Years. Doctor Failed to Help. Doan's Kidney Pills Cured Him. Mr. Edmund Assels, New Carlisle, Que., writes: "I feel it my duty to let you know of the great cure I have obtained by using Doan's Kidney Pills."

I was troubled with my kidneys for two years. I tried a doctor, but he failed to help me. I read in the B.B.B. Almanac about Doan's Kidney Pills, and began using them, and after the first box began to feel better.

I only used four boxes and they completely cured me. I am very thankful to have found so speedy a cure, and would advise everyone suffering from kidney disease to try them."

Perhaps no other organs work harder than the kidneys to preserve the general health of the body and most people are troubled with some kind of kidney complaint, but do not suspect it. It may have been in the system for some time. There may have been backache, swelling of the feet and ankles, disturbances of the urinary organs, such as brick dust deposit in the urine, highly colored, scanty or cloudy urine, bladder pains, frequent or suppressed urination, burning sensation when urinating, etc.

Do not neglect any of these symptoms, for, if neglected they will eventually lead to Bright's Disease, Dropsy and Diabetes. Price 50 cents per box, or 3 boxes for \$1.25, at all dealers or The T. Millburn Co., Limited, Toronto.

In ordering specify "Doan's."

We read of the cold weather in other less favored sections of North America—thirty-eight below zero in Winnipeg, fifty-eight and all records broken in Colorado—and all the while this winter so far, the mercury has not got below zero in Charlottetown. Once it touched the cipher and then thought better of it and went up again. Practically we have had no zero weather yet this winter and March is almost here. We condole with our western and southern neighbors or the severity of their climate.

Skin Diseases.

Under this name such troubles as Salt Rheum, Eczema, Erysipelas, Tetter, Shingles, Psoriasis, Scurf, Itching Rashes, Eruptions, Boils, Pimples, etc., are included. Skin diseases, as a rule, are not dangerous, but are unsightly, irritating and often terribly annoying to the sufferer; they depend mainly on bad blood, from one cause or another, for if the blood is pure and the circulation good no skin disease can exist, except it arise from lack of proper cleanliness or from contagion.

To get rid of skin diseases it is necessary to observe strictly all the laws of health; maintain regular action of the bowels; avoid high living, eating only plain nourishing food. Cleanse and keep the blood pure by taking Burdock Blood Bitters, which unlocks all the secretions, and makes new rich blood by acting on the entire system.

Mrs. E. M. Myers, East Jeddore, N.S., writes: "I don't think there is anyone in this Dominion who recommends Burdock Blood Bitters more than I can. I suffered terribly with Salt Rheum for six years, and did everything for it without relief. For curiosity sake I bought six bottles of Burdock Blood Bitters, and it completely cured me. I would advise others to use it."

Have You Made a "Business Bull's Eye" by Advertising? Merchants who can hit the mark with their ads always "bag the game" but the good advertising marksmen are not numerous. Proper and profitable advertising include numerous details, every one a study in itself. To derive full value from your advertising space and printed matter you must know how to present the selling points of the goods advertised, how to write the ads to give the full information clear and concisely, how to create in the readers mind the desire for the article, and withal, have the same set in type that harmonize with the goods advertised, to have the whole presented forcibly and attractively. I have made a study of every detail of advertising, and in addition, have a thorough grasp on the underlying principles of attractive advertising—typographical display. Only one merchant in each town in any particular line will receive my service. For particulars Phone Office 123 Residence 356—L. D. J. BONNELL, Advertising Specialist. Newson Block, Charlottetown, P.
