**CONGRATULATIONS TO Trinity Ladies Aid** who are bringing Paul Collins with a complete new programme Thursday, this week. 9521-5-16-31

**BRIDGE** in Holy Redeemer Hall, Thursday, May 18th, in aid of St. Vincent's Orphanage. Tickets 50c. Refreshments. 9531-5-17-21.

**STEAMER "HARLAND"** - In order to meet freight requirements, will leave for Victoria on Wednesday the 17th at 11 A. M. Consequently the Thursday 7 A. M. sailing is cancelled. 9512-5-16-21.

**STRONG MAN IN RUSTICO** - Wednesday, May 17th in the Hall, Professor Landry the Strong Man from Quebec giving an entertainment. He and his Troop. This entertainment lasts about two hours. For men, women and children. Admission, adults 25 cents. Children 15 cents. Doors open at 8 o'clock P. M. 9510-5-16-21.

**KELLY'S CROSS C. W. L.** - The annual meeting of the Kelly's Cross sub-division of the Catholic Women's League was held on Sunday afternoon, May 7. A large number of members were present. The chaplain opened the meeting with prayer. The minutes of the previous meeting were read and approved. The Secretary then read a letter from Mrs. Regina Murray, Diocesan Convener of Education and Scholarship, stating that a deficit faced the fund and asked for additional aid from each Sub-Division. Mrs. J. H. Nantes, President, asked the officers of the different committees for their reports. A great amount of work was accomplished by this small unit, including a beautiful piano for the Parish Hall. The members decided to have a High Mass offered for the late Redmond Flood. The care of the altar linens was undertaken by Mrs. Annie McQuaid. The President who was bringing to a close her term of office read a splendid report. A vote of thanks was tendered her for her efforts during her term. The following officers were then elected for the coming year: Pres. Mrs. J. D. Flood; 1st vice pres. Mrs. George Dumb; 2nd vice pres. Mrs. Syl. Moneghan; 3rd vice pres. Mrs. Frank Hagan, recy. secy. Mrs. Katherine Creamer; corres. secy. Mrs. Joseph Kelly; treas. Miss Kathleen Cusack, councillors, Mrs. Walter Cusack, Mrs. Frank Bradley, Mrs. James Malone. Rev. Fr. Pitre then spoke a few words of appreciation and thanks to the outgoing Executive and words of encouragement and congratulations to those appointed to offices for the incoming year. The meeting then adjourned.

**FOUR HANSOMS LEFT!**  
LONDON, May 16 - London will celebrate this summer the centenary of the Hansom Cab. Once the most popular of vehicles in which to move about the city, there are but four now left upon the streets of London. Gasoline and the building of the taxicab spell the knell of the hansom.

Thirty years ago there were 7,000 hansoms in London alone. Built for two passengers, and with the driver in a "dickey" at the back, the reins passing over the roof of the cab, the hansom was in its day considered the smartest thing upon the streets. The drivers, arrayed in melon coat, with buttonhole, tall hat and be-ribboned whip, were as witty as those of the contemporary horse-drawn omnibuses. There was a spice of danger attached to riding in a hansom (which doubtless made their use all the more agreeable to the adventurous) for if the horse did come down it was likely as not that with the cab pitching forward and the doors flying open the occupants would be thrown into the street.

Nowadays the four remaining hansoms in London ply quite a fair trade around the West End amongst those who remember the old days. A full-sized hansom cab - taken off the streets, as it were - was placed a few years ago in the London Museum.

**PLAY STAGED** - On Wednesday evening, May 10, the young people of Marshfield Presbyterian Church staged the three-act comedy drama, "The Girl Who Forgot" in Marshfield Hall. Despite the unfavourable weather a goodly crowd gathered and from the rising of the curtain until the finish the audience was engrossed with the mystery of the plot. The scene takes place in a district attorney's summer home in the Hudson. David Baird, the attorney, cousin and guardian to Pearl Dawn, a rich heiress who is mysteriously going blind while under the care of Judy Elton, a nurse, and her brother, Giles Elton, a physician. Rose May, blown in by the storm, is in league with the butler, Jason, to secure some precious jewelry from the Baird home. Linda Gray, a flirt and companion to Pearl Dawn, who is always in love with someone. Greta, David Baird's Swedish housekeeper, who is very devoted to Pearl, whom she has taken care of for years. Albans Preston, who has come under the enchantment of the flirt, and who is secretary to David. Gustavus Swenson, a detective, disguised as a gardener, caught the guilty ones, and had justice served. The players were: David Baird, Rev. J. A. Pritchard, Pearl Dawn, Marguerite Therrill, Rose May, Emily Foster, Giles Elton, Rupert Godfrey, Jason Talmage Foster, Linda Gray, Jean MacSwain, Albans Preston, Robert Cairns, Gustavus Swenson, Alfred Reid, Greta, Mrs. Stanley Scott, Judy Elton, Dorothy MacFarlane. Mrs. Pritchard kindly acted as prompter. Miss Emma MacNevin was accompanist for the evening. Miss Jessie Jenkins very capably sang "The Swallows" between the first and second acts. Mr. Wm. Rhynes gave a violin selection, and Mr. Armstrong gave of his musical talent by rendering several musical selections to the pleasure of all. Many thanks go out to those who so kindly helped out with the specialties.

**RATIONS FOR WORK HORSES**  
If a teamster is to get a profitable return from the work of his horses and to keep them in good condition for their work, care must be taken in preparing and feeding a suitable ration. Many mixtures and rates of feeding have been tried and compared at the Dominion Experimental Farm, and it has been found that a grain mixture of five parts of whole oats and two parts bran, fed at the rate of one pound per one hundred pounds of live weight in the horse is a safe grain ration for horses at moderate work. As fodder either clean timothy or mixed timothy and clover should be fed, at a rate of about one pound per one hundred pounds of live weight. During seasons of heavy work the proportion of bran may safely be reduced to one-half and the ration increased to one and one-quarter pounds of the mixture per one hundred pounds of live weight.

The feeding practice followed at the Central Experimental Farm is to feed three-eighths of the day's hay in the early morning and again at midday. For the evening meal the ration given is one-quarter of the total grain mixture and one-half of the day's hay. When this plan is followed the horses go to work comfortable and with little danger of digestive trouble owing to distended stomachs while at work. On days that the horses are idle the grain ration is reduced one-half, and bran mash is given on Saturday night, and on nights previous to occasional idle days.

In the feeding of driving horses the same general precautions may safely be followed, with the exception that hay should be fed more sparingly.

In a bulletin issued recently by the Department of Agriculture at Ottawa the feeding of roots is recommended when other green feed cannot be procured. While carrots are perhaps most desirable, sugar beets, turnips and mangels are

**Prince They Call "P. G."**

The youngest son of the King of England was christened "George Edward Alexander Edmund" but to all his intimates he is known as "P. G."

It was in the British navy that they gave him this nickname, Thomas G. Middleton reveals, writing in Pearson's Weekly. The title saved a lot of trouble, because in the navy, which is proud of its democracy, to talk constantly of "The Prince" would have created many difficulties.

A side of Prince George's personality which has endeared him to everyone is his intense and open admiration of the Prince of Wales. He makes no secret that he owes most of his bigger decisions and interests to a faithful modelling of them on the lines taken by his eldest brother. The two are inseparable pals, and even share homes. They have travelled abroad and hunted big game together.

A great deal of the charm of Prince George was "caught" from the heir to the throne. His outstanding characteristics are almost perfect good temper, a natural gaiety, a happy recklessness plus a slightly shy manner. His dancing partners claim him as the best dancer of the royal princes.

He likes surroundings to be tasteful rather than luxurious. He designs the layouts and decorations of all his own apartments, and is proud of his bathroom at York House, which is a perfect picture in silver and medium blue. His study is full of books - mostly adventure tales. Kipling and Conrad are his

**Cancer - Its Cause And Control**

What is regarded as one of the most remarkable of recent developments in man's war upon cancer has been made by the Soviet scientist, Prof. M. F. Sitovich, a graduate of the military academy of medicine and bearer of the title of "Udarnik," one of the highest honors awarded by the Soviet Union. Prof. Sitovich's test is based upon the inhaling of chlorine by the patient. He says that the blood of a healthy person has invariably hemolyzed after chlorine inhalation while that of a person afflicted with cancer has not hemolyzed in any of the tests he has conducted using both humans and animals as subjects.

The newest autogiro is entirely without wings or movable elevators and consists of fuselage, engine, rotor, rudder, and two small fixed stabilizers at the tail. Complete control in the air is obtained by tilting the angle of the rotating vanes. This is accomplished by mounting the rotor on a two-strut pylon and running a shaft through the cabin roof. Inside the cabin, attached to this shaft, is a control wheel.

relished and useful. From three to six pounds of roots per day for horses at light work and less quantities, or none at all, while heavy work is being performed is recommended in the bulletin. Watering has been found to be best done before feeding, with, if necessary, a moderate drink before going to work. Copious drinking, when the horse is over-heated is a dangerous practice, liable to cause permanent injury in foundering.

**Pains Around Her Heart Tired Out After Doing Housework**

Mrs. Henry Ranch, Muriel Lake, Alta, writes: "Last fall I had had pains around my heart, and each morning, after doing a little housework, I seemed to get dizzy and feel all tired out."

Seeing that Milburn's Heart and Nerve Pills were good for those troubles I sent for a box, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no return of the dizzy spells and pains around the heart."

For sale at all drug and general stores; put up only by The E. Milburn Co., Ltd., Toronto, Ont.

**Point the Toes Straight Ahead For Foot Comfort**

The Exercises Designed to Strengthen the Arches Take Only a Few Minutes Daily But Will Prevent Many Hours of Pain.

At the first ache or pain in the arch or up the back of the leg, take action. Begin to toe straight ahead, even turning the feet in slightly. Walk a chalk line for practice, if necessary. Learn to walk without pounding your heels. When you stand point the toes straight ahead and hold the feet three or four inches apart for better balance. Keep the ankles straight and support your weight on the ball and heel of the foot.

Pull up your chest to get a better weight distribution on your feet. Throw away the shoes with sagging arches. And keep your heels straight, never letting them run down.

Promiscuous buying of arch supports is not advisable. If supports need to be worn, they should be fitted expertly to the individual arch need. An orthopedist is the one to consult in an emergency.

**Arch Exercises.**  
In the early stages of arch trouble the arches can be straightened with exercises.

To strengthen the long arch that extends from heel to toe, do the simple rising on the ball of the foot and down lightly on the heel. Up and down - twenty, thirty times. Also walk around on your toes.

Stand with the feet parallel, keep the toes on the floor, and raise the inner border of the sole up and out, keeping the knees straight. Repeat a number of times.

Sit or stand with the feet parallel on the floor. Spread the toes, then pull them in and under as if gripping the carpet.

Sit with the knees crossed. With the foot of the leg on top describe circles. Reverse the knee position and circle with the other foot.

Do the arch exercise in bare or working feet.

A good chiropodist is recommended strongly for the immediate relief he can give a corn sufferer. His (or her) implements are so efficient and so carefully sterilized, and the general skill of the performance is so satisfactory that it is foolish to go around for days and weeks suffering agonies. Possible infection from careless work or from unsterilized implements is eliminated with the choice of a capable chiropodist. The fee is usually moderate.

Relief can be got from home treatments, but you must be careful about using only sterilized padding and cutting implements. You can sterilize them by boiling them for five minutes. Corns should be cut down only after a bath.

**Institute News**

**LAKEVIEW INSTITUTE**

Lakeview Women's Institute held its April meeting at the home of Mrs. Alfred Morrow with an attendance of eight members and twelve visitors. Roll call was answered by a "Canadian product used in our homes." Mrs. J. A. Rose and Mrs. L. D. Rose were appointed school committee for Lakeview and Mrs. John A. McDonald and Mrs. Hudson Morrow for North Lake.

Program consisted of a song "Old Folks at Home" by unmarried members. Paper on "My childhood Days" by Mrs. J. H. Baker; Reading, "Forty years ago" by Mrs. E. D. Fraser; Readings by Mrs. S. J. Rose, Mrs. Hudson Morrow and Mrs. J. E. Dingwell.

Next meeting was invited to the home of Mrs. J. H. Baker on May 8th. Roll call was answered by "Gardening hints".

Mrs. E. H. Fraser and Mrs. W. M. Fraser were appointed program committee for next six months. A letter from the Red Cross Society requesting that a collection be made in the district was read by secretary and it was decided to leave this to the school teachers.

A letter from Dr. Creelman was also read and the secretary was authorized to send \$10.00 of the funds on hand to the Sanatorium.

It was decided that an ice cream social be held in June to raise funds and Mrs. S. J. Rose, Miss Moynagh, Miss Annie McDonald and Grace Dingwell were appointed program committee for same.

A letter from St. Vincent's Orphanage acknowledging the receipt of a parcel of clothing sent from this Institute was read.

Instrumental music was given by Olga Morrow; paper on "House-keeping" by Mrs. S. J. Rose; Reading "What a woman is worth" by Mrs. E. D. Fraser and a reading "Our Institute" by Mrs. Hudson Morrow.

Meeting closed with National Anthem. Roll call for June meeting to be answered by "a verse from a Canadian poem."

By using a small X-ray tube, Dr. J. W. M. du Mond, research fellow at the California Institute of Technology, has been able to ionize the interior of an electroscope 100 feet distant so as to counteract an electrical charge transmitted by friction. According to Dr. du Mond, it might be possible to develop the X-ray to such an extent it could be directed against aircraft and disable them by quenching the spark of their motors.

It will Relieve a Cold - Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Clergyman (to small boy) Well, my boy, what is your name?  
Small Boy: Bill, sir.  
Clergyman: And how did you get that name?  
Small Boy: My father says I came on the first of the month with the rest of the bills, sir.

Dr. Theophilus Leigh grandfather of Jane Austen is credited with having been a university wit, and an example of his academic humor is told by Austin Jobson. Someone told Dr. Leigh that So-and-so had been "egged into matrimony."  
Dr. Leigh replied, "May the yolk sit easy on him."
