

I'm Giving my OATS, BARLEY & WHEAT A BREAK

TREATING SEED FOR ALL THREE CROPS WITH NEW IMPROVED CERESAN

This dust, says a Division of Botany report, effectively controls the smuts of oats, covered smut of barley, and bunt of wheat. It also improves seed germination.

Year Canadian Milk Production 1929 - 14,349,023.000 pounds 1930 - 15,126,459.000 pounds 1931 - 15,772,852.000 pounds 1932 - 15,917,868.000 pounds 1933 - 15,948,724.900 pounds 1934 - 16,329,285.400 pounds 1935 - 16,356,681.300 pounds 1936 - 16,741,613.100 pounds

Compared to all other products of the Canadian farm, milk is today the single most important source of revenue. This statement is not true for the chief wheat-growing provinces, but it is true for Canada as a whole.

Estimated Gross Annual Agricultural Revenue of Canada Year Dairy Products Wheat 1931 \$191,390,000 154,760,000 1932 159,000,000 123,958,000 1933 170,892,000 123,958,000 1934 183,791,000 169,631,000 1935 191,496,000 173,065,000

Wool Propaganda in South Africa CAPE TOWN, Feb. 22 The South African Wool Council has decided to conduct a national publicity campaign for wool.

This is part of a co-ordinated international campaign, sponsored by all wool-producing countries, to counter the advance of synthetic textile materials with propaganda showing the immense advantages that natural wool has over its chemically-produced competitors.

The greatest need for lovers these days is a non-removable engagement ring

Poultry & Egg Grading Course -AT- Prince of Wales College, Charlottetown MARCH 14-26th. Under the DOMINION-PROVINCIAL YOUTH TRAINING POLICY

Open to boys and girls in unemployed circumstances between the ages of 18 to 30. Those applying should have in view a useful training tending toward profitable employment. Course open to not more than 35 students. Students who have attended previous youth training courses are not eligible. Send applications to W. R. SHAW, Deputy Minister of Agriculture, Charlottetown

How Dairy Industry Has Developed (By R. K. JONES) Dairying in Canada has come to be one of our largest industries. It employs far more people than mining, automotive manufacture, steel, or the pulp and paper business.

The depression showed conclusively that economic setbacks in other lines do not stop the flow of milk. The fourteen and a quarter billions of pounds of milk produced in 1929 increased by the time the year 1932 to nearly sixteen billion. And by last year this had further advanced to about sixteen and three-quarter billion - as the following table from the Dominion Bureau of Statistics illustrates:

Year Canadian Milk Production 1929 - 14,349,023.000 pounds 1930 - 15,126,459.000 pounds 1931 - 15,772,852.000 pounds 1932 - 15,917,868.000 pounds 1933 - 15,948,724.900 pounds 1934 - 16,329,285.400 pounds 1935 - 16,356,681.300 pounds 1936 - 16,741,613.100 pounds

Milk and its products brought last year to Canadian farmers more than two hundred million dollars - \$223,238,128. As the total gross annual agricultural revenue is around nine hundred and fifty million dollars, it is seen that more than a fifth of the agricultural income is derived from the milk cow. This was not so a decade ago when milk was only an eighth of total farm income.

Compared to all other products of the Canadian farm, milk is today the single most important source of revenue. This statement is not true for the chief wheat-growing provinces, but it is true for Canada as a whole.

Hydro Debates Will Animate Ontario House

ECHOES OF OCTOBER ELECTION AND QUESTION OF NEW POWER CONTRACTS TO ENLIVEN SESSION OPENING FEB. 23.

(By HAROLD J. FAIR) (Canadian Press Staff Writer) TORONTO, Feb. 22 (CP) - Power policies, rather than a heavy legislative program, appear headed for the political spotlight when the second session of Ontario's 20th legislature opens Feb. 23. Power is expected to furnish one of the main items of debate.

Lieutenant-Governor Albert Matthews will make his second appearance at Queen's Park opening in two months, appointed in November to succeed Dr. Herbert A. Bruce. He opened the special "succession duties" session called in December after Premier Hepburn's Liberal government was returned in the Oct. 6 general election.

A week after prorogation of that session the Ontario Hydro-Electric Commission announced it had renewed contracts with three Quebec power companies - Beauharnois, Hebert and Power, MacLaren, Quebec and Gatineau - whose agreements were denounced in the 1935 session that saw an ineffective Conservative government filibuster to prevent cancellation of these contracts and one with the Ottawa Valley Company.

The power question balked large numbers of the Conservative Party back to Queen's Park with support of 66 members in the 90-seat House. Liberals charged a Conservative opposition in the absence of the government with "double dealing" and the argument will continue when the administration seeks the renewal of the agreements.

Leopold Macaulay, member for York South and former highways minister, leads the 33-man Conservative opposition in the absence of the government with "double dealing" and the argument will continue when the administration seeks the renewal of the agreements.

The premier counts a straight Liberal vote of less than 50 after the election, due to vote in March. In addition Mr. Hepburn has the support of two Liberal-Progressives and one Independent Liberal, Labor Minister M. M. MacLaren. Only third-party member in the House is Parthasarathy, United Front member, representing the party from Grey South.

First death in the newly-elected legislature occurred Feb. 3 when Milton D. Connor, Liberal member for Lambton, died of pneumonia. The other vacancy occurred when William F. Schwenker, Liberal member for Hamilton Centre was appointed a county court judge.

Conacher Shoots The 17 Liberals and 12 Conservatives who succeed former members in the Oct. 6 voting got into the House to proceed with the three-day special session, opened Dec. 1, to buttress the succession duties act. It had been called by the Premier to face a court test on collection of succession duties, one of the province's best in the fight for world supremacy.

An idol of the ice lanes and formerly one of Conacher's greatest athletes, Lionel Conacher, Liberal member for Toronto, Ontario, will fire the first shot in the Premier's opening debate when he moves the address in reply to the speech from the throne, Romeo Begg, Liberal member for Russell, has been chosen speaker.

One piece of forecast legislation concerns appointment of a special committee to investigate cancer treatment. So far, the government has announced it will investigate treatments of Dr. J. E. Hett of Kitchener, Miss R. M. Cause of Etobicoke and that of Dr. William F. Koch of Detroit.

Labor legislation was forecast by that is distributed in Ontario Mr. MacBride when the Ontario executive of the Trades and Labor Congress of Canada made its annual representations but he warned he didn't want "a lot of ill-considered legislation placed on the statute books to which the courts might take objections." He added there would be a "certain amount of legislation" before the session.

The usually drawn private bills committee will have an adventurous aspect when Port Arthur seeks legislation permitting Aviator A. K. Cheesman to sit on the city council. Elected in the municipal election, he was unable to take his oath of office because he was thousands of miles away with Sir Hubert Watkins, seeking the last Russian trans-Polar flight somewhere in the arctic.

But the power question overshadows other issues. The Niagara River ice jam which crippled one Commission power house and plant failed to affect the province's power supply because the newly-contracted Quebec power was not yet in operation. The election had contained such a jam would show the province faced power shortage because reserves were low after government cancellation of the old contracts.

Power Deal Details Dr. Thomas H. Hogg, who succeeded T. Stewart Lyon as commission chairman in the post-election reorganization, announced the new contract for a total of 61,000 horsepower under agreements which will reach their maximum in six years and continue thereafter.

Dr. Hogg said the new agreements revised former contracts with its respective companies, reducing the price from \$15 per horsepower to \$12.50 per horsepower. Under the amended agreements the commission estimated a saving of \$17,200,000 between now and 1945 and a net saving during the life of the agreements of \$78,923,000. The Ottawa Valley Company contract had been amended previously.

Beauharnois provides 125,000 horsepower immediately. This will be increased early by 25,000 horsepower for 50,000 per horsepower until the maximum of 250,000 is reached in 1943, when 250,000 horsepower will be delivered annually until 1976.

Gatineau supplied 120,000 horsepower in addition to the 140,000 being taken the maximum to be reached by 1939. The Gatineau contract expires Nov. 1, 1970.

Power from MacLaren-Quebec has increased from 40,000 horsepower to 50,000 per horsepower in 1944. The contract runs until 1970.

Anticipating a surplus above current needs, the government seeks a licence from the Dominion government to export a certain amount of power to the United States. Prime Minister MacKenzie King refused Premier Hepburn's application for the permission and the question has been placed before parliament.

How Dairy Industry Has Developed

(By R. K. JONES) Dairying in Canada has come to be one of our largest industries. It employs far more people than mining, automotive manufacture, steel, or the pulp and paper business.

The depression showed conclusively that economic setbacks in other lines do not stop the flow of milk. The fourteen and a quarter billions of pounds of milk produced in 1929 increased by the time the year 1932 to nearly sixteen billion. And by last year this had further advanced to about sixteen and three-quarter billion - as the following table from the Dominion Bureau of Statistics illustrates:
