PUT DIGNITY INTO YOUR WORK.

There are many things we might learn from the Japanese. Their attitude toward labor alone would be of infinite value to the avergae woman if she would acquire it. No task is so menial that it cannot be dignified by a Japanese.

If only the average girl could be trained to this point of view how much happier and more capable our women would be! The girl of every class in her heart considers work beneath her. She is firmly imbued with the idea that she is meant for better things. Even the daily tasks of home life are performed with an indifferent and often antagonistic feeling, if performed at all.

Girls are too often utterly untrained in any form of domestic work, and are pathetically unprepared to earn a living should the necessity arise. Her parents, so long as it is within their power, do everything to prevent her working.

The love that would spare her everything is deliberately handicapping her. She is allowed to grow up helpless and untrained; and she is in no way fitted to cope with life and wrest from the world her wage when she stands face to face with necessity.

From such home as these, from such love as this, spring girls who become unemployed women. A da arrives when they must go out into the world and seek work. The parent love is no longer there to shield and protect them, and they are forced to rely upon their own resources for self support.

A feeling for the dignity of work early instilled into girls would save many women from drifting into this condition. If they could be brought to realize that any one who works efficiently at any occupation is worthy of consideration and respect they might be willing to fit themselves in time to face the situation that eventually is forced upon them. They ought to be able to take rank as honest workers at some useful trade or profession, yet they remain unemployed because of the lack of training in their youth and a false standard of what a lady can afford to do.

One fact should be impressed upon every girl's mind. No work that is efficiently and conscientiously done is degrading. And it behoves all who have to do with their training, no matter how fortunate these girls are placed in life, to instill into their minds a sense of the dignity of work, and to impress them with the fact that any service, even the most menial, is uplifting if performed with the proper spirit.

FOR ECZEMA

A Treatment That is Guaranteed to Give Relief.

Eczema is parasitic in nature. It is said to be a contageous disease. Until the parasite or germ hidden in the skin is completely destroyed and removed, eczema cannot be cured. Fully one-third of all skin disease is in the form of eczema. It affects persons of all ages and classes. It is very prevalent among people between the ages of 20 and 40.

We unhesitatingly guarantee to return every cent paid us for Rexall Eczema Ointment in every case where it fails to give entire satisfaction. It possesses remarkable cleansing, antiseptic, healing and curative power. Its great value is very pronounced in the treatment of eczema, whether of the dry, scaly sort or of the weeping type, where there is a constant flow of an ill-smelling excretion, or of the other intermediary forms, such as ringworm, acne, pimples, blotches and discolorations.

Rexall Eczema Ointment is very useful in treating ulcers, sores, wounds, insect bites, nettle rash and hives. It is particularly recommended for the treatment of children who are tormented with itching, burning and disfiguring skin disease. We urge you to try a box at our risk. Your money waits you if you are not satisfied with the treatment. Two sizes, 50c. and $1.00. Remember, you can only obtain Rexall Eczema Ointment in this town at our store—The Rexall Store. MacKinnon Drug Co.

"The new fall suitings and overcoatings for men, are arriving almost daily. We invite you to call in and look them over. They will please you. D. A. Bruce. 8-30dtf.

CHARLOTTETOWN AND QUEEN'S COUNTY

It pays to buy in this Province.

Miss Katie Carragher, city, is visiting Bonshaw and Kellys Cross.

Mrs. (Dr.) Docherty, Cape Traverse, is visiting her mother Mrs. M. Snow in Victoria.

Mrs. R. Oakes has been spending a few days in Victoria the guest of Mrs. F. A. Watton.

Supt. G. A. Sharp's private car, was attached to the western train yesterday afternoon.

As a compliment to Hon. R. L. Borden and Premier Hazen it is suggested that citizens fly their flags today.

Among those returning to the city on the Northumberland last evening were Misses Bertha Smith and Jennie McKay.

Any person paying their electric light bill on or before Sept. 10th will receive the discount and thus save money.

Geo. Villet of Hampton has purchased the farm of Aarron Collett, Victoria, and intends moving into his new home sometime during this fall.

Those registered at the Queen Hotel in this city yesterday were: Alex. Martin, Valleyfield; Miss E. G. Sutherland, Halifax; Jas L. Tremholm, St. John.

Miss Edith Cox, Superintendent of the Faulkner Hospital, Jamaica Plains, Mass., left yesterday morning to resume her duties after a month's vacation spent with her parents R. N. and Mrs. Cox, Morell.

Harry L. Lane, formerly of Dunstaffnage, P.E.I., who has been visiting relatives and friends in Boston and vicinity for the past month, has returned to Nelson, B. C., where he is employed on the Canadian Pacific Railway.

Miss Smallwood who is teaching piano will for the first time introduce the Faelton system in this city. This system has proved a decided success in other cities and will no doubt do the same here.

Stipendiary Martin assumed his duties of office for the first time yesterday morning, there being a clean docket. One of the first changes introduced with the new magistrate will begin this morning when the police court will meet daily at 9.00 a. m., sharp instead of 9.30 as heretofore.

The residence of James Paton, 241 Prince Street, City, was the scene of a quiet and very pretty wedding last evening when his daughter Isabel Evelyn was united in marriage with John A. Fraser, City. The wedding march was played by Miss Cora Patch and the bride was given away by her father. The young couple were unattended and the ceremony was performed by Rev. J. Heaney, B. A., Minister of the First Methodist Church, in the presence of a number of immediate friends and relatives. The bride was attired in Cream Duchess Satin, made "en train" with Irish lace and wore a pearl and amethyst pendant the gift of the groom. The presents were very numerous and beautiful, the young couple having a great many friends who betokened their esteem with appropriate gifts. The young couple leave this morning for a three weeks honeymoon trip to Boston and other cities.

The recent laying of a cable over the Northumberland Straits which has been utilized since as a telephone cable created much interest here. This will also lend interest to a similar service reported from London which follows:—A short time ago the British General Post Office laid a new and improved telephone cable in the Straits of Dover, and this has recently been connected to land from lines from London and Paris, thereby increased and improved telephone facilities between the two capitals. By the extension of these circuits to provincial towns speech is rendered possible between places in England and France which could not previously communicate with each other, and, in order to determine the extent of the increased range, experiments have recently been carried out by English and French officials from a number of provincial towns on this side of the Channel. Before the new cable was provided no town north of a line connecting the Humber and Hersey could communicate with Paris, but in the recent trials it was found possible to converse with the French capital. The increase in the range of telephonic speech has been brought about by no means of the new telephone cable recently laid between England and France. This cable is fitted with loading coils which neutralize the disturbing effects on speech transmission introduced by the insultating material which must necessarily be employed when conductors are laid in water.

Mrs. J. B. Travers of St. John is the guest of her sister, Mrs. McCready in this city.

Miss Reta Stright, Summerside, spent Saturday and Sunday at her home in Victoria.

Calledge Pope, brother of Percy Pope, has arrived from Peerina on a visit to his old home after an absence of twenty years.

W. H. Collett is busy fitting up his new home in Victoria, which no doubt will make a big improvement to the village.

Arthur Curtis left for Brockton a few days ago, after visiting his old home in Victoria. He was accompanied by his cousin Miss McLeod of Cambridge.

All clergymen who attend the Borden and Hazen meetings in the Market Hall or Opera House, are specially invited to take seats on the platform.

Alden Dawson, Principal of Tryon Consolidated School, has returned to Tryon after spending a few days in Summerside and St. Eleanors'. While there he was the guest of B. Jelly who has lately returned from a short visit in Victoria and Mill View, and is about to resume his duties in the Victoria School as principal.

The marriage of William J. Butler, of the N. S. Technical College engineering department, and Miss Mary E. Benoit, daughter of Clement H. Benoit, of Charlottetown, P. E. I., took place yesterday morning at St. Mary's Cathedral. Rev. Dr. Foley performed the marriage ceremony and celebrated a nuptial Mass. The bride was given away by her mother, wore a tailored coat and skirt of tan cloth with black hat and ostrich feathers. Mrs. LeBlanc, of Charlottetown, attended the bride, and wore a costume of white with black hat.. The bridegroom was supported by his brother, E. B. Butler. Owing to a recent bereavement in the bridegroom's family, the ceremony was very quiet; only the immediate family connection were present. The bridegroom is a son of W. J. Butler & Co., insurance agents, Hollis St. Mr. and Mrs. Butler left by the Intercolonial express for Quebec, Montreal, Toronto, and other cities, where the honeymoon will be spent.—Halifax Exc.

There were placed on exhibition in a window of Chandler and Reddin's store, Queen St., yesterday three exceptionally fine photographs of the raising of the battleship Maine which has remained sunken in the Havana Harbor for the past thirteen years. These Photos, mammoth in size, two being about five feet by one and the other three and a half by one, are excellent depictious and show clearly the bent twisted and barnacled mass of scrap iron which constitutes the remains of a battleship at one time a terror in her class. Another point brought out forcibly by the camera is the evidence of the tremendous force of the explosion as shown by the tangled mass of the strongest armament. A turret is shown which, though of most massive steel and weighing eight tons, was found seperate from the ship altogether, having been wrenched free and tossed away from the vessel. The photos also clearly picture the hitherto unique method of ship salvage when a huge coffer dam built of immense circular piles touching one another and surrounding the ship, the water from the centre around the Maine being pumped out. These piles are of mud, enclosed by 75 foot slabs driven 25 feet into the harbor bottom. The photos were brought to this city by Oswald Hornsby and are of more than ordinary interest.

Euthymol Shaving Cream

is a delightful preparation for a quick and satisfactory shave.

Makes a quick creamy lather. Keep the face soft, is non-irritating and antiseptic.

DUNSTAFFNAGE FACTORY

(Continued from page three)

and others who were prominent in the construction was plainly felt. With a commendable spirit the patrons assisted individually and thereby minimized the cost of erection.

The new building erected is one and a half stories, 28x52, with boiler and coal house attached 22x40. In addition they have an ice house with a capacity of 60 tons and a shed for waiting teams. The new building was designed by the patrons themselves to meet their own requirements.

They considered the fire an opportunity to put everything in first class shape and in doing this they have successfully coped with a number of knotty problems. Ed. Mullin, French Fort, was foreman of construction, and was a most capable official.

The drainage question, hitherto a continual worry, was effectively disposed of by digging a blind well 50 yards south of the factory and connecting it with the floor. The system works perfectly at the present time and all the usual odors where a stream is used to convey the drainage are absent.

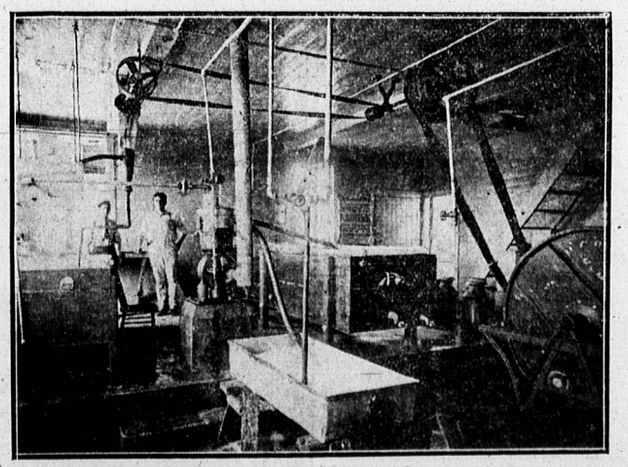
The room in the new building where the milk is received and churned is large, well lighted and ventilated and is as clean as a whistle. It is neatly painted throughout, even the pipes being aluminumed. A concrete floor adds to the complete sanitary arrangements and in sustaining cleanliness, often a hard task, the manager's work is by it greatly facilitated. Here is the receiving vat, the tempering vat, capacity 4000 lbs., the big combined churn and worker, capacity 600 lbs. butter, and the large Simplex separator.

Mr. Simmons, the manager, very lucidly explained and demonstrated the working of the different appliances, of which space forbids a lengthier reference. He also gave an interesting demonstration of the testing for butter fat by which a rate is fixed at which patrons are paid for milk.

A comfortable office is located off this main department while on the east side is the refrigerator. This is one of the most successful of its kind in operation here. It is 7x12x9, interior measurement, and is called the cold air circulation system. To one side is a closely sealed box containing 80 tons of ice solidly frozen. This is connected with the refrigerator by ventilators at the top and bottom and through these the cold air is continually passing. The temperature is maintained evenly at 36 degrees. The refrigerator is airtight and the ice is put in in the winter and has not to be touched till the following winter. This method has given entire satisfaction.

In the engine room are the 12 h. p. boiler and 8 h. p. engine. Water is supplied by a force pump in a never-failing well which fills a tank from which the entire building derives a complete system of waterworks. Throughout the premises the piping is so erected that it can be drained dry when not in use in winter.

DUNSTAFFNAGE BUTTER FACTORY.



The Interior showing the make room. Mr. Simmons, the Manager, is seen at the back near the door.
