Good Blood

Good blood, good health; bad blood, bad health; there you have it. Why not help nature just a little and change the bad to the good? Bad blood to good blood; poor blood to rich blood! Ask your doctor how this applies to Ayer's Sarsaparilla, and how it applies to you! Could anything be more fair?

We have no secrets! We publish the formulas of all our medicines! J. C. Ayer Co., Lowell, Mass.

I'll make it from the latest New York patterns, and do it all for practically the same as you pay for shoddy goods. THE other morning as the Montreal express was setting off a car at Moncton the locomotive frightened a driving horse of Paul Lea's which was being driven by a young lad who is the guest of Mr. Lea. The horse bolted while going over the crossing and ran into a heavy truck sloven nearby breaking the shaft bar and rim of one wheel. The collision threw the driver out of the wagon onto his left shoulder and the horse having cleared himself and the wagon sprinted up Main St. at a lively gait and was captured near the north crossing. The young lad went into a nearby store and on examination was found to be unhurt.

A SAD wave has recently passed over the community of Wheatley River, in the death of Mary McCallum, dearly beloved wife of John Rackham, who passed away on the 11th of April 1906 at the early age of fifty-seven years, after a short and severe illness of five weeks. Sellar who lives a short distance from home, Chester who lives at Wheatley River Bridge, and Malcolm and Gertrude at home. She leaves a large circle of friends. FIFTY-ONE years ago the editor of Hazzard's Gazette writing on January 10th., on The Weather, said: "During a period of upwards of thirty years which the writer has passed in Prince Edward Island, he has never before seen the harbor open so late as the 8th. of January, the day on which he is writing this article. It was in the year 1828, we think that two vessels arrived in Charlottetown harbor on the 5th. day of January, one from Antigua and the other from Halifax. In this year 1855 two vessels arrived in the same harbor on the 7th. January, and this we think will be the latest on record. It is perfectly well ascertained that the different harbors in the Island were formerly closed by ice at a much earlier period. One reason for this, we take it, arose from their being more sheltered by the forest. Even in our recollection, the bank known as the site of the old windmill has been diminished by several yards by the action of frost and the encroachment of the tide." This old windmill spoken of was situated near where the city stone crusher is now operated on Pownal Wharf.

IN the debate on the estimates some interesting facts regarding tuberculosis were discovered. Hon. Premier Peters quoted from a volume compiled by a number of learned authorities, from which he said he had formed the opinion that the tuberculin test when applied to cattle was not always to be depended on. He stated that cattle which had reached under the test had been killed and their lungs and portions of their bodies examined, without a trace of the disease being discovered. The test, the Premier said, could not always be depended on. Dr. Warburton while admitting the value of the authorities quoted by the Hon. Premier said that he had personal knowledge of the test being applied the cattle examined, and the examination showing only too plainly that the animals were diseased. But that does not prove that the test is infallible. Mr. McKinnon however quoting from the book which the Premier had referred to showed that the test might be depended on in the majority of cases. All this proved that the best authorities differed. Hon Premier Peters read further from this volume to show that tuberculosis was not a thing that could be easily prevented, it prevailed amongst the best herds and the most carefully looked after stock; in King Edward's stables the percentage of animals suffering from tuberculosis was very large. The Premier maintained that no alarm should arise over this matter, the Government was wide awake and could be trusted to do every possible thing that could be done to drive out the disease.

How Much For Your Eyes?

Would you voluntarily consent at any price to dispose of your eye sight?

I think not, and yet perhaps you are one of those who, by neglect, are irretrievably losing at least a portion of their eyesight.

If your eyes need help, the most likely way to assist them is by wearing glasses, properly fitted,

My business is to properly fit glasses. This I do as cheaply as is consistent with good work.
