

THIS CHOCOLATE IS A FOOD

Cadbury's Dairy Milk Chocolate is much more than a delicious candy. Made with the highest quality chocolate obtainable, sugar and fresh whole milk, this popular Cadbury bar is really a compact meal containing the nourishment you need to develop energy and strength. In wartime millions find Dairy Milk Chocolate more satisfying than ever.

Owing to rationing and government orders, we cannot always keep the candy counters fully supplied. We regret any disappointment this may cause you.

CONSERVATION

A WEEKLY COLUMN OF PRACTICAL OPINIONS OF THE VITAL ISSUES AFFECTING THE USES AND ABUSES OF NATURAL RESOURCES BY MR. LUDLOW JENKINS.

WILDLIFE WATERFOWL

In addition to the breeding ducks of the salt marshes already discussed—the black duck and the blue-winged teal—a large number of species may be seen there in migration, though in this circular it is hardly practicable to detail their recognition marks. Ducks can be recognized as such even by those with the least ornithological experience. They are the precious survivors of a very important group of American birds now so greatly reduced in numbers that some of the species are in danger of being exterminated and all need earnest and sympathetic attention.

and the birds were given additional protection. The snow goose (Oenanthe hyperborea), a little smaller than the Canada goose, is white with black wing tips. It nests far north and winters on the Middle Atlantic coast, being seen as a migrant or straggler, however, both north and south of that section. The main population of these birds passes the winter in the sand-dune country along the coasts of Virginia and North Carolina, where they arrive and from which they depart almost in a body. These geese do not spend much time in or about the water, a habit that has protected them from the gunners. Their whole population is concentrated in a limited area, however, and they have consequently received complete legal protection ever since the passage of the Migratory Bird Treaty Act in 1918. A larger, long-necked, entirely white-feathered bird that may be seen on the marshes is the whistling swan (Cygnus columbianus). It winters chiefly from New Jersey to North Carolina but in migration is occasionally seen far north on the way to and from its Arctic breeding grounds. Most of the swan population of eastern North America concentrates on the Middle Atlantic coast in winter, a habit that would be fatal if hunting were permitted. They have accordingly been strictly protected since 1918.

Sea View and Vicinity

The potato crop in most places is proving to be a much better crop than last year, though the majority of the tubers were struck with early blight.

Many friends in this community were sorry to learn of the passing of Mrs. John D. Murphy at her home in Charlottetown. The deceased was formerly a resident of Sea View and has many friends here who deeply deplore her passing.

Mrs. Calais Gallant and little son and daughter are spending a pleasant week here the guest of Mr. and Mrs. Alwood Blakaney.

Mr. and Mrs. William Adams, Summerside, spent the week end at their old home in Sea View.

A large number attended the harvest service at St. Stephen's Church, Burlington, on Sunday evening, Sept. 13th. A large profusion of flowers and vegetables were prettily arrayed at the foot of the church. Rev. H. P. Newman conducted the service. His message was fitting and appropriate as well as the hymns rendered by the choir which were in keeping with this impressive service.

Mr. and Mrs. Elwin MacArthur and family who have been the guests of Mr. and Mrs. Clifford MacLaren, Sea View, left recently for Finsdale to visit friends there.

NO REAL BEAUTY WITHOUT HEALTH
Don't worry about your face, hair, or figure—do something about them. And it will save a good deal of explaining-time if you begin by admitting to yourself a few simple truths:
Once you've faced facts, they yield to a plan. And you'll find yourself planning efficiently almost automatically. For the facts dispose of what generally inhibits action—that is, your ails.
So, begin by telling yourself that it seldom is possible for any woman to be really beautiful unless she gets enough sleep, fresh air, exercise, and balanced meals. Admit that you could walk a great deal more and get several hours more sleep per week—if you wanted to.

CHECK THIS LIST
In addition, admit that:
Hair which is washed properly once a week and brushed vigorously by four times a week is more than likely to be shiny and lovely, while hair that is neglected inevitably shows it.
Unless there's something wrong with you physically, the real reason why you are overweight is that you eat too much and exercise too little.
Your waistline and leg muscles are no longer supple because you simply won't do limbering and stretching routines a few times a week.
The "mistakes" in your wardrobe are the result of hasty shopping. You probably haven't examined your full wardrobe in seasons. Most foolish buys would be eliminated if, before acquiring a single new fall item, you'd examine everything in your closet and decide on everything that's needed to refresh and expand it for fall and winter wear.

NEVER BUY GLOVES SMALL
Never buy a glove that is too small! On a properly fitting glove the thumb hole is large enough to contain most of the ball of the thumb. The first clasp or button should come at the wrist joint to hold the glove firmly on the hand. The right hand is usually one-quarter size larger than the left, except for a left-handed person. Always use the larger measurement. Exact glove sizes may vary with the nature of the leather and with different manufacturers, so it is unwise to rely upon being fitted to a former glove size.

WHEN WORK RELAXES IT HELPS THE AXIS
Determined to answer the challenge contained in the slogan over the shipyard gate (ABOVE), the skilled craftsman employed in the armament department of the naval dockyards race with time to repair the heavy guns. These, too, have to be thoroughly overhauled, checked, and maintained in perfect firing condition.
