CHINA WANTS SOME EDUCATIONAL CHANGES

SHANGHAI, May 27—Dr. Charles W. Elliot, president emeritus of Harvard University, addressing the University Club here, declared the great need in China is "educational changes."

"In China," he said, "the present is clouded and the conditions are very grave. America, I feel sure, hopes to give to this great country the best that she can. We have witnessed a great change here, and it could not have been accomplished unless there had been long preparation for it in the minds of thinking Chinese."

"Educational changes are needed in China. The great advance in America is due in the main to the introduction of the inductive method of teaching, and it is a method that must be established in China. Lecturing is the most important of all systems of instruction of today."

Buckley, who is known in the church as the "bishop-maker," has been in charge of the paper. There is considerable discussion among the candidates as to whether he will continue in his present position.

A NEW THEORY.

HALIFAX, May 26—Capt. H. C. Johnson, Dominion government inspector of light-houses, who was in charge of the expedition sent out to the government steamer Montagny in search of Titanic bodies, reports a remarkable discovery made at the scene of the Titanic wreck, which he believes accounts of the disaster.

This is a change in the Arctic current which thereby formed a great pocket of cold water within the usual course of the Gulf Stream. This change was not known to Captain Smith, and Captain Johnson says this explains why he did not avoid the ice of which he was warned. The apex of the cold water pocket, where warm water ordinarily is, he found was at latitude 51° N., longitude 50° W. Captain Johnson, who had the charts before him as he spoke of his discovery, said: "After making a careful examination of the currents I am convinced that Captain Smith, after receiving warning of the ice, took precautions which ordinarily would have saved his ship, but that from the unusual phenomena she was lost. The Arctic current from some unaccountable reason—possibly prevailing winds in the vicinity of the Titanic—drove itself into the Gulf Stream for at least 100 miles. In crossing into this cold water from the Gulf Stream Captain Smith would get a temperature of 60 at the stern and 48 at the bow of his ship."

"I believe from my observation on the Montagny that this pocket of cold water forced into the Gulf Stream by the Arctic current acting for Captain Smith allowing his ship to strike the iceberg."

"Instead of following westward on the steamship line, which is used unless there is some great reason for doing otherwise, he changed his course when he received the ice warnings, going to the south and at the time of the accident was thirty miles south of the usual track."

Captain Johnson is confident that it was this remarkable and unusual fact, the return of the Arctic current and the Gulf Stream that is responsible for the accident.

LIBERALS WIN IN SASK. BYE-ELECTIONS.

EDMONTON, Alb., May 28—Early returns today from the five provincial bye-elections, four of which were for new cabinet ministers in the Sifton government, and the fifth to fill the vacancy caused by the resignation of the member in Cardston, show a complete sweep for the Liberals.

The present indications are that the five seats are retained by the supporters of the Sifton administration, through the result in Claresholm, where the provincial treasurer, Malcolm McKenzie is running will be very close.

Attorney General C. W. Cross, was re-elected for Edmonton, over A. F. Ewing, after the most spectacular fight in the political history of the province.

There is still some doubt as to the actual majority. Liberals claim 590 and Conservatives 485. Conservatives claim that there were many irregularities and state that the election will be protested.

There were a number of fights at polling booths, and a great deal of bitter feeling was shown during the day. In Sturgeon, Minister of Education Boyle had an early majority of 350 with twenty-two out of forty-seven polls heard from.

Returns are slowly coming in from Sedgewick, but twenty-five polls out of 119 give Hon. Chas. Stewart, a majority of 140.

These polls are nearly all along the railway line. It will be a day or two before all are in, as some are considerable distance from a telephone.

THE DOCTOR'S WIFE

Agrees With Him About Food.

A trained nurse says: "In the practice of my profession I have found so many points in favor of Grape-Nuts food that I unhesitatingly recommend it to all my patients."

"It is delicate and pleasing to the palate (an essential in food for the sick) and can be adapted to all ages, being softened with milk or cream for babies or the aged when delicate. For fever patients or those on liquid diet I find Grape-Nuts and albumin water very nourishing and refreshing. This recipe is my own idea and is made as follows: Soak a teaspoonful of Grape-Nuts in a glass of water for an hour, strain and serve with the beaten white of an egg and a spoonful of fruit juice or flavored. This affords a great deal of nourishment that even the weakest stomach can assimilate without any difficulty."

"My husband is a physician and he uses Grape-Nuts himself and orders it many times for his patients."

"Personally I regard a dish of Grape-Nuts with fresh or stewed fruit as the ideal breakfast for anyone—well or sick." Name given by Canadian Postman Co., Windsor, Ont.

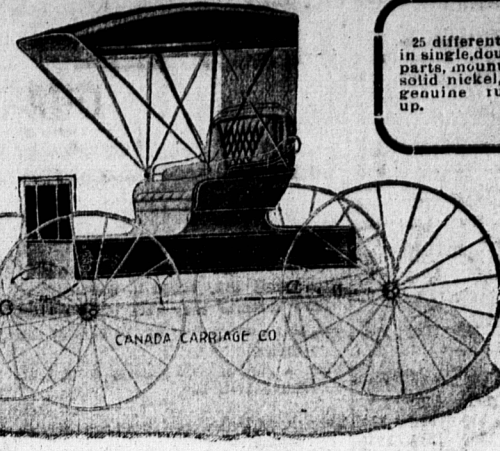

In any case of stomach trouble, nervous prostration or brain fog, a 10 days trial of Grape-Nuts will work wonders toward nourishing and rebuilding, and in this way ending the trouble. "There's a reason" and trial proves.
