Whatever is Ailing You? You're Not Yourself at All

It is almost uncanny how quickly a wife can detect any thing wrong with her husband's health. And how worried she is until he does something about it. When it is a question of trouble with the nerves she can usually get him sound advice for most women know about Dr. Chase's Nerve Food from personal experience. Few ailments, if any, get a man down so badly as disorders of the nerves because mind as well as body is usually affected. Worry and sleeplessness waste the nerve force in the body. Digestion is usually upset, bodily organs slow up for lack of motive power and he feels gloomy, discouraged and despondent. Life is robbed of its pleasures, efficiency is lowered and a nervous collapse is threatened. But long before such a condition is reached the wife detects trouble and if she is persistent in recommending Dr. Chase's Nerve Food can usually halt the disorder, for this treatment greatly helps to restore the nervous system. Dr. Chase's Nerve Food supplies in condensed and easily assimilated form the ingredients from which nature creates new, rich blood and nerve force. In this way it instills new pep and energy into the nervous system and the body generally. Every organ, every part of the body must naturally be benefited by the flow of new, rich blood through the arteries and a full supply of new nerve force through the spinal column, the nerve centres and the myriad of nerve fibres which go to the uttermost parts of the body. When you decide to use Dr. Chase's Nerve Food do not go at it in a half-hearted manner. You should buy at least half a dozen boxes to begin with and then take the medicine regularly and persistently until health and vigor and the joy of living are fully restored.

"Believe It Or Not" A cheap suit may be all right in fine weather and after getting wet to use for a bathing suit. Having learned the making, cutting and fitting in large cities and know the clothing business, would advise purchasing the better stuff as they fit better and hold their shape. A rifle and a bayonet can do a lot of damage. That's what they're for, but in the army they often come in handy after the damage has been done. They are two of the most important items when it comes to improvising splints for men with broken bones. The bayonet can be used for an arm, as here and the rifle for leg fractures. Web equipment and puttees make good slings.
