Equitable Distribution of Fertilizer Supplies is Ordered

To give greater assurance to farmers of their fair share of the various kinds of fertilizers to be available in 1944, the following regulations have been put into effect:

All fertilizer distributors are now required to observe the following:

1. A distributor must supply his usual customers before accepting new accounts.
2. He must not supply any customer or himself with fertilizers containing potash in a quantity exceeding 73% of the potash which he supplied to the customer or himself in 1943.
3. If additional supply is available he must supply any new customers (providing they are bona fide farmers) with reasonable quantities.
4. If any customer has already taken delivery of fertilizer containing more than his fair share of potash, i.e. more than 73% of that which he obtained in 1943 in all fertilizer which he bought, he must report fully by March 1, 1944, to the Fertilizers Administrator, Ottawa, regarding such deliveries with respect to quantity of each fertilizer and its potash content.

Cases of hardship which might develop out of the new regulations should be presented for consideration to the Administrator.

Farmers are advised that orders for fertilizers should be in hand not later than March 15, otherwise supplies may be difficult to obtain.
