

THE MAGAZINE GUARDIAN Teachers, Parents, Pupils, Farmers, Dairymen, Horsemen

AMONG THE HORSES

SOME HORSE TRADING TRICKS. Various are the tricks the unscrupulous horse trader has in his bag for the discomfiture of the unwary. For example, there is the hiding of spavins, side bones and ringbones. These soundnesses may be covered up by bruising or burning the parts, producing a temporary inflammation that may seem quite innocent to the buyer until it disappears a few days later.

The cow takes up oxygen from the air and gives off carbon dioxide, which in sufficient quantity will destroy life. When no method is provided for letting fresh air into the stable and for removing the foul air from it, the health of a cow is jeopardized and her efficiency decreased, says Hoard's Dairyman. If a cow is to do her best work, make the best use of all the feeds fed her, she must have an adequate supply of fresh air.

WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Keep lice out of the manes and tails of horses. Lice are introduced when the animals rub against the stalls or stable. Use any good coal-tar dip or insecticide. All horses not being worked should be given plenty of exercise. This is one of the important points in the winter care of live stock, which is most often neglected.

WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach. Dairymen, generally realize the full importance of pure air to the herd, because they know the condition in which an unventilated stable is found on a cold morning. They know the air in such a barn is bad, and that the damp, frosty barn is an unhealthy place for the cattle. Not only is such a condition injurious to the stable itself, affecting the walls, rafters, ceiling and equipment, causing wood to rot and metal to rust; but most important of all is the injurious effect of the lack of fresh air on the vitality of the animals.

PRACTICAL STABLE VENTILATION

Dairymen, generally realize the full importance of pure air to the herd, because they know the condition in which an unventilated stable is found on a cold morning. They know the air in such a barn is bad, and that the damp, frosty barn is an unhealthy place for the cattle. Not only is such a condition injurious to the stable itself, affecting the walls, rafters, ceiling and equipment, causing wood to rot and metal to rust; but most important of all is the injurious effect of the lack of fresh air on the vitality of the animals.

SUNDAY SCHOOL LESSON

JESUS SENDING FORTH THE TWELVE. Mark 6:1-21. March 17, 1918. Freely ye have received, freely give. Matt. 10:8.—Golden Text. From the miracles of last week's lesson we come today to the first Church extension work of which we have any record. Last Sunday we learned that Jesus is mightier than storms, than disease or death. Today we read that the people of Nazareth, even with such strong evidence to prove that He was indeed the Saviour, refused to hear Him. He had been several months away from the village which knew Him as the village carpenter who went about fixing doors and roofs. During that time His former friends and acquaintances had heard wonderful things concerning Him. On the Sabbath Day He went to the synagogue and was no doubt asked by the rulers to speak. The people were astonished at His knowledge and could not understand how the poor carpenter could do the wonderful things they had heard of Him. He was not the kind of redeemer that they wanted. He was not a King and conqueror who would overthrow the Romans. He did not teach that the Jews were sinners. They were of course and disappointed and would not believe His message. No doubt Jesus longed to be recognized by the friends of His boyhood, whom He still loved, sad and wondering at their belief He went away never to return.

WHEN THE STOMACH IS WRONG LIFE SEEMS TO BE A BURDEN

Indigestion Comes With a Debilitated and Run-down Condition of the System and Can Be Cured Through Enriching the Blood. There are many symptoms of indigestion, such as acute pain after eating, belching of wind, nausea and vomiting, bloating and pains in the region of the heart, a dread of food for the misery it causes. Dieting and the use of pre-digested foods may give ease, but can't cure—they only further weaken the stomach. The work of digestion depends upon the blood and the nerves, and the only way to cure indigestion is to tone up the stomach through the blood to do the work nature intended it should do. The very best way to cure indigestion is through a course of Dr. Williams' Pink Pills, which renew the blood, strengthen the nerves and enable the stomach to do its work with ease and comfort. Neglected indigestion means prolonged misery, and a more difficult cure. If you have any of the symptoms of this trouble try the tonic treatment with Dr. Williams' Pink Pills at once, and you will be gratified with the results.

DAIRY FARM VENTILATION IN BARN. Fresh air is as free as God's sunlight and as necessary as water, meal, and hay to animal life, yet many dairy cows are not receiving a sufficient supply. Fresh air helps keep the cows healthy, and to permit them to make the best use of the solid foods given them in breeding.
